

# NEWHAM WEEKLY COVID-19 STATISTICS

Updated: 2nd December for period 22nd to 28th November

## WHAT DOES THIS MEAN?

As we come out of national lockdown, Newham has not seen a reduction in cases. Over the past week there have been 825 new cases in Newham which is 33 more cases than last week. The proportion of people getting tested who get a positive result remains virtually the same as last week (15.5%), a level which suggests that not enough people are being tested in the borough.

Rates amongst older people are high too and that means more people becoming unwell. Now that London has moved into Tier 2 after lockdown, we need to continue making significant efforts to keep the virus in check and protect those most vulnerable.

People are strongly urged to follow the rules and public health advice, wherever you are, to reduce the risk of infection spreading.

Please stay home as much as possible; get tested if you have Covid-19 symptoms; cover your face in public, wash your hands regularly, do not mix with other households indoors.
