

NEWHAM WEEKLY COVID-19 STATISTICS

Updated: 23rd December for period 13th to 19th December

www.newham.gov.uk/coviddashboard

WHAT DOES THIS MEAN?

This week has seen further dramatic increases in the Covid-19 pandemic in Newham as across much of London. Nearly 2,700 people tested positive for Covid-19 in the borough in the past 7 days, a very significant increase which means there is very substantial transmission occurring in Newham.

The consequence of these infections is that our NHS is under very significant pressure.

Please protect yourself and your loved ones over the holiday season:

- Try to limit your contact with other households over the next few weeks
- Please do not visit other peoples homes other than when caring roles are necessary
- Please ensure your face is covered when going to shops or other indoor places
- If you and those you live with are required to isolate and it is difficult, please ask for help

Jason Strelitz
Director of Public Health
London Borough of Newham
