

NEWHAM WEEKLY COVID-19 STATISTICS

Updated: 30th December for period 20th to 26th December

www.newham.gov.uk/coviddashboard

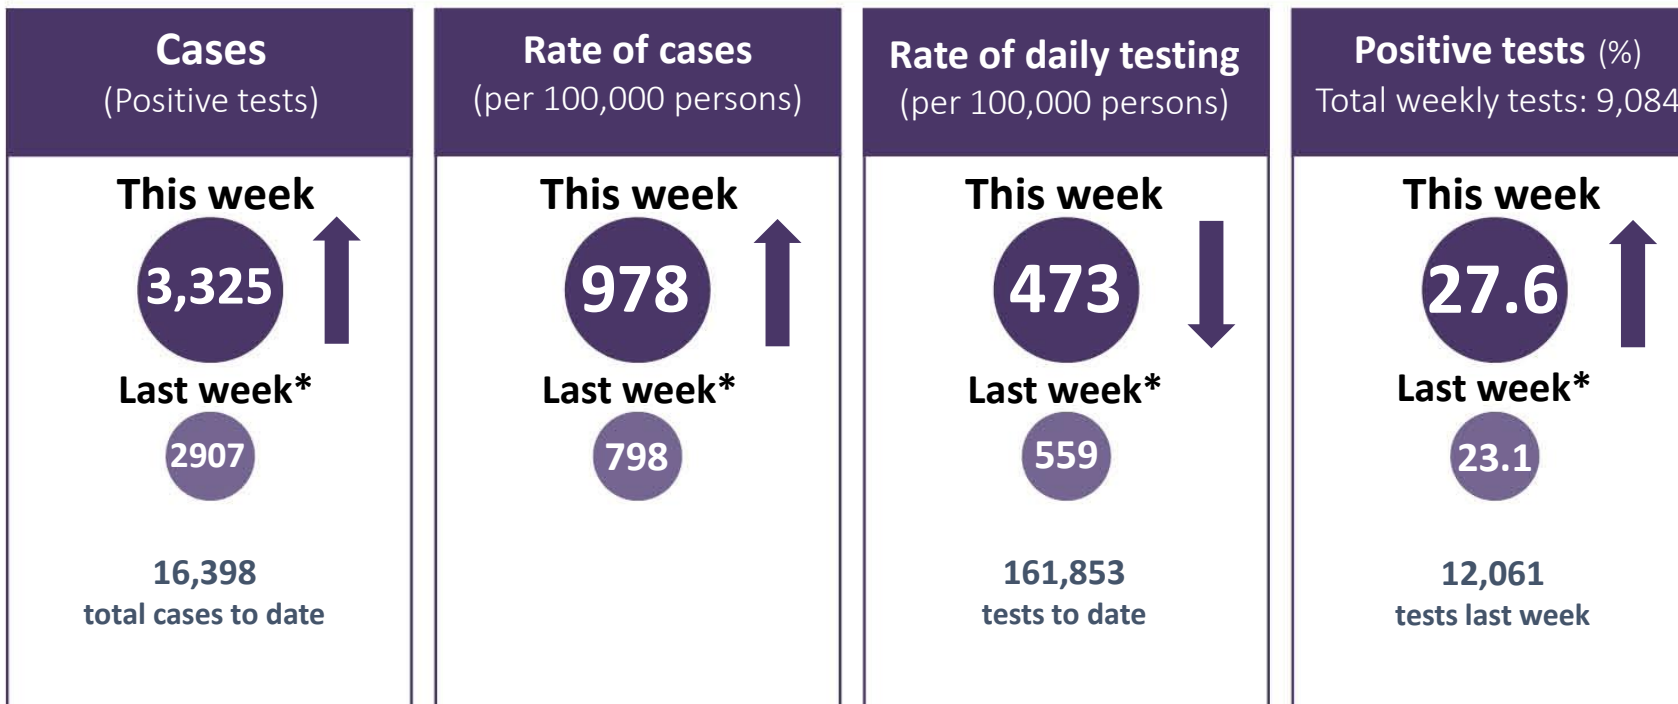

WHAT DOES THIS MEAN?

This week has seen further dramatic increases in the Covid-19 pandemic in Newham with 3,325 people tested positive for Covid-19 in the past 7 days, which means very substantial transmission is continuing in Newham. Around 1 in 100 Newham residents have tested positive in the past week. Testing fell over Christmas which lowered the weekly testing rate. The consequence of these infections is that our NHS is under very significant pressure.

Please protect yourself and your loved ones over the holiday season:

- Limit limit your contact with other households over the next few weeks
- Please do not visit other peoples homes other than when caring roles are necessary
- Please ensure your face is covered when going to shops or other indoor places
- If you and those you live with are required to isolate and it is difficult, please ask for help

Jason Strelitz
Director of Public Health
London Borough of Newham
30th December 2020

Data source: Covid-19 Situational Awareness Explorer, (PHE). Rendered on 30th Dec for data reported up to and including 26th. Due to reporting delays the most recent 4 days are excluded.

*Numbers for the previous week may be different from last week's dashboard as new daily data can change counts for previous weeks.
