

# NEWHAM WEEKLY COVID-19 STATISTICS

Updated: 17<sup>th</sup> February for period 7<sup>th</sup> to 13<sup>th</sup> February

[www.newham.gov.uk/coviddashboard](http://www.newham.gov.uk/coviddashboard)

## Vaccination: first doses given up to 17<sup>th</sup> February

- 36,758 1<sup>st</sup> dose given in total (9.8% of Newham population). Increase of 6,837 (22.9%) from total tests last week. Of these:
- Cohort 1: 236 to older residents in care (91%)
- Cohort 2: 5,033 to 80+ (91.5%)
- Cohort 3: 8,552 to 75+ years (64.3%)
- Cohort 4: 12,312 to 70+ (80%), excluding CEV coverage
- 17,609 to under 70 years, including frontline health and social care workforce

## WHAT DOES THIS MEAN?

The number of new cases of Covid-19 in Newham has again fallen substantially (by 46%). Also, positivity has fallen, both of which are really good news. 36,758 first dose vaccines have been given and 91% of the top priority (care home residents) are vaccinated with one dose.

Community transmission continues and the new strain of Covid-19 is highly transmissible. More rapid testing is becoming available across Newham for anyone who needs to leave home for work or caring.

Although rates have fallen substantially they remain much higher than we need them to be.

- Please ensure your face is covered when going to shops or other indoor places
- If you have been invited for a vaccination please take it up and if you know someone who needs support to get a vaccine please help them to do so.
