Online Composting Training

INTRODUCTION TO COMPOSTING

Delivered by

About

the training...

If you're new to composting, or want to discover more successful techniques, you might like our new free online course. Provided by Garden Organic, you can find out all about the benefits of composting at home and how to get started.

The course has five modules that you can select, from basics to in depth knowledge, including videos and quizzes. Each section lasts 10 to 20 minutes. You can just stick with the basics or go through everything if you wish - all at your own pace. You can come back to the course at any time, it doesn't have to be completed at once.

About

Garden Organic promotes organic growing and composting, citizen science and research, and seed conservation through our Heritage Seed Library. Our charity brings together thousands of people who share a common belief - that organic growing is essential for a healthy and sustainable world. Through campaigning, advice, community work and research, we want to help you garden 'the organic way', using natural methods to promote healthy, productive, sustainable gardens.
