Representation Reference	Representor	Comment Reference	Chapter	Policy	Site allocation	Introduction	Clause	Justification	Implementation	Comment	Comment Response
Reg18-E-094	Poplar HARCA	Reg18-E-094/010	Vision and objectives	Key diagram						It is noted that the Key Diagram on page 21 of the Draft Plan shows new transport and connectivity improvements along the River Lea with crossings at Lochnagar Street, Poplar Reach/Cody Dock, Mayer Parry/Bidder Street, and also at Limmo/Goodluck Hope and Thameswharf.	Comment noted.
Reg18-E-033	Port of London Authority	Reg18-E-033/004	Vision and objectives	Key diagram						It is recommended that the key diagram on page 21 is updated to specifically include the boroughs safeguarded wharves at Thames Refinery, Peruvian and Royal Primrose wharves. I	This mapping change has not been made. We did not consider this change to be appropriate as the key diagram is meant to illustrate the broad spatial strategy. The Protected Wharfs are mapped on the policies maps which indicate where different policy constraints apply.

Reg18-E-145	Environment Agency	Reg18-E-145/050	Vision and objectives	Objectives			3			We understand that the 15-minute neighbourhood objective also underpins the spatial strategy for Newham and agree that this supports sustainable development.	Support noted.

Representation Reference	Representor	Comment Reference	Chapter	Policy	Site allocation	Introduction	Clause	Justification	Implementation	Comment	Comment Response
Reg18-E-145	Environment Agency	Reg18-E-145/051	Vision and objectives	Objectives			3			Additionally, we are very supportive of the commitments to 'greener streets', zero carbon development, and tackling climate emergency also included in Objective 3	Support noted.

Representation Reference	Representor	Comment Reference	Chapter	Policy	Site allocation	Introduction	Clause	Justification	Implementation	Comment	Comment Response
Reg18-E-145	Environment Agency	Reg18-E-145/052	Vision and objectives	Objectives			3			There is a missed opportunity to have an objective specifically focused on the natural environment and the climate emergency. Building resilience and accounting for a changing climate should be a central objective, as it is essential the Local Plan is prepared using the latest evidence to identify climate risks, both now and in the future, and policies are aligned to tackle these risks early.	This wording change to the Objectives has not been made. We did not consider this change to be appropriate as the objectives are from the Building a Fairer Newham Strategy and retained for consistency. Instead we have added further wording under objective 3 focusing on Newham's commitment to tackling the climate emergency. Please see the wording under Objective 3.

Representation Reference	Representor	Comment Reference	Chapter	Policy	Site allocation	Introduction	Clause	Justification	Implementation	Comment	Comment Response
Reg18-E-027	Resident	Reg18-E-027/040	Vision and objectives	Objectives			3			<p>Fifteen-minute neighbourhoods I have everything I need within an easy 15 minute walk – the Olympic Park, Stratford Station, the bus station, Maryland station round the corner and a bus stop outside my house, both the shopping centres, two cinemas, a theatre, a sports centre, GP, pharmacist and dentist, supermarket 5 minutes walk away, plus lots of shops and restaurants a few minutes walk away, in addition to the shopping centres. (The only thing I can't get to easily is the recycling centre – see later.) It enables me to get everywhere I need within a 15 minute walk and thus enables me to not need to have a car. BUT..</p> <p>[BUT does this 15 minute walk make me healthier? No it doesn't. In all directions, this 15 minute neighbourhood is major roads, packed with cars most of the time. I don't just mean that I live on a major road. Even when I turn off of it, to reach anything in any direction, I have to go on another major road. The Local Plan doesn't seem to address this at all.]</p>	<p>Comment noted. The Local Plan, supported by the Sustainable Transport Strategy, does seek to reduce car dominance in the borough and improve facilities for walking and cycling. We recognise this is a vital part of delivering 15 minute neighbourhoods.</p>

Reg18-E-082	Resident	Reg18-E-082/019	Vision and objectives	Objectives						<ul style="list-style-type: none"> Page 19. In the outlined Objectives it refers to the draft Local Plan being shaped around the Council's Corporate Plan (Building a Fairer Newham Strategy – 2022), however it is important to recognise that spatial priority setting at a local level is better done through localised community engagement with clear and transparent opportunities to influence. Council's Corporate Plan, the Plan is not a resident level document but rather informs how the Council will deliver its key priorities. 	<p>Comment noted. The resident engagement undertaken and its outcomes and responses are detailed in the Engagement Reports produced after each stage of engagement. The Building a Fairer Newham Strategy formed the basis of the vision and objectives, however specific engagement was undertaken on the vision, through a workshop with young people and each neighbourhood vision was discussed at a Local Plan Community Assembly.</p>

Reg18-E-082	Resident	Reg18-E-082/016	Vision and objectives	Vision			1			Limitations are also imposed via the Characterisation Study as well as the site allocation process. Although site allocation is important there is a need for a level of flexibility to accommodate the quantum of housing required to meet pressing needs not least social housing in the borough.	Comment noted. Site allocations are where we expect most development in the borough to occur or are sites which require additional policy guidance. Housing delivery can take place on and is encouraged on other site too as long as the land isn't safeguarded for other important uses, like open space, employment or community facilities. These sites are known as 'windfall sites'.

Representation Reference	Representor	Comment Reference	Chapter	Policy	Site allocation	Introduction	Clause	Justification	Implementation	Comment	Comment Response
Reg18-E-082	Resident	Reg18-E-082/017	Vision and objectives	Vision			1			One of the most cost-effective ways to deliver social housing is to use existing underutilised council assets to maximise housing development.	Comment noted. A number of site allocations in the Plan encourage the regeneration and infill of council sites. Council assets can also come forward as windfall sites for housing delivery, as long as the land isn't safeguarded for other important uses, like open space, employment or community facilities.

Comment noted.	Whatever is done on the three issues above mentioned [green space, pollution, climate change] will have the backing of residents for sure						Vision	General	Reg18-E-002/006	Resident	Reg18-E-002

Representation Reference	Representor	Comment Reference	Chapter	Policy	Site allocation	Introduction	Clause	Justification	Implementation	Comment	Comment Response
Reg18-E-002	Resident	Reg18-E-002/007	General	Vision						I have seen, year after year, a lot of focus on antisocial behaviours such as fly tipping. Yes they are important but to date still remain, and not anywhere near as urgent as the climate issue, fossil fuel use, lack of lung spaces.	Comment noted.

Representation Reference	Representor	Comment Reference	Chapter	Policy	Site allocation	Introduction	Clause	Justification	Implementation	Comment	Comment Response
Reg18-E-002	Resident	Reg18-E-002/010	General	Vision						I understand that councils make money from businesses that are not ethical (not only the type mentioned), making it a conflict of interests. Until recently this was all part of the system of make money at the expense of other things that we care about/ harm others etc, but surely we are no longer at that stage?	Comment noted.

Representation Reference	Representor	Comment Reference	Chapter	Policy	Site allocation	Introduction	Clause	Justification	Implementation	Comment	Comment Response
Reg18-E-002	Resident	Reg18-E-002/011	General	Vision						I am conscious that some of the above may feel like a bitter pill to swallow, or may be dismissed as not being practical in the face of realities. But is is real 'reality' that needs facing.	Comment noted.

Representation Reference	Representor	Comment Reference	Chapter	Policy	Site allocation	Introduction	Clause	Justification	Implementation	Comment	Comment Response
Reg18-E-002	Resident	Reg18-E-002/021	General	Vision						<p>Fly tipping is a subject that always gets a lot of attention. I have been in the borough for many decades and it is not a problem that has ever been resolved. My personal opinion is that the money and focus should go to more important issues.</p>	<p>Comment noted. Work is being undertaken to address fly tipping, but the Council is also addressing other significant challenges including the climate emergency, poverty and health inequalities. These priorities have all informed the Plan.</p>

Representation Reference	Representor	Comment Reference	Chapter	Policy	Site allocation	Introduction	Clause	Justification	Implementation	Comment	Comment Response
Reg18-E-002	Resident	Reg18-E-002/032	General	Vision						<p>Please try to stop giving such emphasis to money and more to health and wellbeing. There is no trade off. Long term thinking is needed and wisdom to see the second and third and fourth order consequences of decisions made to sort one problem that weak unintended havoc elsewhere</p>	<p>Comment noted. This is addressed in the Local Plan by the Social Value and Health Impact Assessment policy. This policy will be used to make sure that developments minimise any negative health impacts and maximise health benefits.</p>

Representation Reference	Representor	Comment Reference	Chapter	Policy	Site allocation	Introduction	Clause	Justification	Implementation	Comment	Comment Response
Reg18-E-002	Resident	Reg18-E-002/033	General	Vision						So, that's just the gist of what I would propose. Little projects may be nice, are very nice, but the big things must be tackled alongside and it's just not happening fast enough nor to the scale of the problems we are facing	comment noted.

Representation Reference	Representor	Comment Reference	Chapter	Policy	Site allocation	Introduction	Clause	Justification	Implementation	Comment	Comment Response
Reg18-K-047	Resident	Reg18-K-047/001	Building a Fairer Newham	Vision			3			[Vision] Areas such as Beckton Riverside/Gallions Reach and other areas that are post-industrial or currently industrial or with infrastructure uses (eg sewage works) should also be designated a suitable for renewable energy generation alongside existing/other uses - and this be included as part of the vision. There are already some wind turbines along the Thames Gateway in industrial areas - these could be developed to increase the numbers of units and generation capacity - currently on-shore renewable energy generation is difficult to get approval for if it is not in the local plan.	A wording change to show support for renewable energy generation has been made. Please see the new wording in Policy CE2 Zero Carbon Development. The Council considers that the solar photovoltaic panels are the most likely renewable energy source in the borough, however it would consider other renewable energy generation proposals on a case by case basis.

Representation Reference	Representor	Comment Reference	Chapter	Policy	Site allocation	Introduction	Clause	Justification	Implementation	Comment	Comment Response
Reg18-E-027	Resident	Reg18-E-027/044	Vision and objectives	Vision						<p>Threats to democracy and ageism in the vision and objectives</p> <p>I agree with a lot of the vision and objectives but I am concerned about the following two sentences:</p> <p>‘Instrumental in delivering this vision will be collaboration to bring together residents, local organisations, the council and developers to build trust and understanding about what is needed and achievable in each of Newham’s 16 neighbourhoods. Young people in particular will be welcomed and planned for, ensuring they retain an enduring stake in their future and the borough’s.’</p> <p>First of all, the first sentence. Collaboration has its place – but it must not replace scrutiny, the right to ask awkward questions, robust debate, protest, dissent, opposition and holding the Council and developers to account. These are the key elements of democracy. These are the methods I’ve used to bring about positive outcomes for communities, not blind trust in politicians.</p> <p>‘Stop asking so many questions – can’t you just trust me?’ is a reasonable question for your romantic partner to ask, but very sinister when coming from local government to the electorate. As for the edict that residents should trust developers – well, do I even need to spell out how ludicrous that is? Developers have one goal only – to make money for themselves.</p> <p>Then there is second sentence about ‘young people in particular’. Whilst I agree that</p>	<p>Comments noted. Collaboration is not intended to replace scrutiny, the right to ask awkward questions, robust debate, protest, dissent, opposition and holding the Council and developers to account. It seeks to put mechanisms in place to allow for better decisions to be made. All planning proposals will still be subject to formal consultation and large schemes and schemes with significant objections will be transparently scrutinised and determined by the Council's planning committees.</p> <p>Engaging with young people is specifically highlighted as they are underrepresented in planning engagement.</p>

Comment Response	Comment	Implementation	Justification	Clause	Introduction	Site allocation	Policy	Chapter	Comment Reference	Representor	Representation Reference
	<p>there are some significant problems which generally affect young people much worse than their parents and grandparents, and there is injustice in the way that young people are being affected, I don't think that young people's views should be welcomed above older people's views and needs just as a general policy. What does this sentence even mean? Does it mean that older people's needs and views will be deemed less important than younger people's?</p> <p>I have every empathy for younger people, and the injustices they face are outrageous. I am from a poor working class background, born and bred in East London, and so is my husband. But we are in our 50s and 60s. When I was young, I was easily able to rent a flat on my own in East London, on a low wage. My husband bought a flat in Stratford, where we now live, even though he was born in a council estate in Hackney and had a low income. My parents bought a house in East London, even though they were also born on council estates in Hackney and were extremely poor when they bought the house (they didn't buy a council house, they are opposed to that.) Today, none of this is possible for the young people of Newham, not even the rich ones, let alone the poor ones. It is a big injustice and problem that must be addressed. We've all gained just because we happened to be born earlier. Climate change will also clearly affect younger people much more than it will affect older people, even though most of them will</p>										

<p>Comment Response</p>	
<p>Comment</p>	<p>have done less to cause it than us. BUT this is not the same thing as saying that in general younger people will be listened to and catered for more than older people. That's terrible. That's ageism. It's personally hurtful – I feel Newham has written me off as past it at 52. When you say 'ensuring they retain an enduring stake in their future and the borough's', does this mean that you only care about people who are going to be some kind of future investment for the borough? So a 90 year old's needs and views don't need to be planned for because, well, they're going to be dead soon anyway? They're not an investment? This is terrible, and actually it isn't only younger people who face injustice. Older people often face age discrimination in the field of employment. Newham must not be ageist, it's terrible, it's hurtful, and I thought it was unlawful under the Equality Act.</p>

Reg18-E-082	Resident	Reg18-E-082/015	Vision and objectives	Vision						<p>3. Vision and Objectives</p> <ul style="list-style-type: none"> • Page.18. In the outline vision there is a focus on brownfield sites. In existing localities such as Green Street, Plaistow, and East Ham there are significant potential for intensification including provision of housing in existing sites including those owned by the Council Housing Department of which there are many. These sites are very low density, are aging, have significant unused space surrounding them including lock-up garages. This option does not seem to be explored in comparison to other boroughs such as Hackney or Tower Hamlets. 	<p>A change to this wording has been made. This wording clarifies that the intensification of smaller sites, including council owned sites have a significant role to play in the Plan's Spatial Strategy. Cabinet recently approved the Small Sites Options Appraisals and Modular construction report which identifies such opportunities. Please see here: https://mgov.newham.gov.uk/documents/s165355/Small%20Sites%20Options%20Appraisal%20and%20Modular-%20Next%20Steps%20July%20Cabinet%202023%20no%20LMI.pdf The planning team work closely with colleagues in other parts of the Council to quantify and support the delivery of these sites. Policies in the Housing and Design chapters specifically support small site intensification and the Characterisation Study includes a Small Site Intensification Design Guide.</p>

Reg18-E-082	Resident	Reg18-E-082/018	Vision and objectives	Vision						<ul style="list-style-type: none"> Page 18. Refers to delivering the vision in collaboration with residents and local organisations, however the evidence in terms of early proactive ground-level engagement including design workshops is limited from the options to the draft consultation stage as well as the development of the Characterisation Study. As a consequence, there are questions around the level of detailed influence residents or community have had on the strategy including ownership of the spatial vision. 	Comment noted. The resident engagement undertaken and its outcomes and responses are detailed in the Engagement Reports produced after each stage of engagement.

Reg18-K-008	Resident	Reg18-K-008/003	Vision and objectives	Vision			4. Safer Newham where no-one feels at risk of harm			I am very vexed that the public right of way through Stratford Centre isn't being respected. Cutting off access at night makes it dangerous for residents who have to walk round the block to access West ham Lane etc. It appears that the interests of residents are second to those of businesses in this respect. What other justification is there for taking away this right of public access??	Comment noted. Cabinet took the decision to close this right of way in July 2023. The decision was to support delivery of the Council's plan to address Rough Sleeping with through a public health approach with care and compassion. Further details are available here: https://mgov.newham.gov.uk/documents/s165777/Cabinet%20Report%20-%20Stratford%20Mall%202023%20V10.pdf

Reg18-E-092	Royal Docks	Reg18-E-092/002	Vision and objectives	Vision						<p>Vision and Objectives</p> <p>Given the scale of development anticipated in the Royal Docks, it would be preferable for the "Vision and Objectives" section on page 18 to make a more specific and clear statement about the opportunity. Currently various references to the Royal Docks are made but added weight should be added by bringing them together and articulating the extent of the growth in housing and jobs there. Also, the businesses coming to the Royal Docks will include, but importantly, not be limited to "businesses engaged in the new green, digital and creative industries".</p>	<p>Comment noted. The Vision is drafted around the Plan's neighbourhoods which are integral to the spatial strategy. As such the individual character of different parts of the Docks have been highlighted. The wording change regarding businesses has been made to reflect the range of businesses which may operate in the docks, subject to policy compliance. Please see the new wording in the Vision.</p>

Reg18-E-049	Albert Island Regeneration Limited	Reg18-E-049/003	Vision and objectives				2			<p>Vision and Objectives of the Draft Local Plan In general, our client approves of the Draft Local Plan's vision and objectives and specifically Objective 2 which relates to supporting an inclusive economy. This objective aims to provide access to residents to local job opportunities, education, training and skill development and supports the local economy by improving the quantity, range and affordability of employment space. The hybrid planning permission seeks to provide a total of 1,252 jobs and will directly contribute to the local economy by offering significant local employment opportunities through the provision of S106 obligations relating to local labour (including apprenticeships) and local supply chains. In general, it is therefore considered that the Draft Local Plan appropriately aligns with the strategic objectives and aims of the hybrid planning permission.</p>	Support noted. However, it is important to note that it is the application that appropriately responds to local needs and requirements, as outlined in the Local Plan, and not vice versa.

Reg18-E-131	Friends of Queens Market	Reg18-E-131/003	Vision and objectives							<p>The Plan sets out comprehensive redevelopment across the borough including sites for very tall commercial and private residential buildings. The policies contradict themselves: it's impossible for these 50m and 100m buildings to be carbon-neutral, Air quality neutral, or that they will support Community Wealth Building principles. This is clear from years of seeing development outcomes in the borough. The Plan therefore feels to us somewhat backwards-looking and not genuinely focussed on people.</p>	<p>Comment noted. The policies in the Plan need to balance a range of requirements to deliver sustainable development. This includes meeting the borough's significant housing and workspace need, while protecting existing community facilities and workspaces and open space. To do so, the Plan does seek to deliver higher density and taller developments in some parts of the borough - where they are well connected to public transport, shops and local facilities. The alternative would be to deliver fewer homes or workplaces - which would worsen access to jobs and homes which would not support or to build on greenspaces or lose community facilities or build further away from transport or facilities making people more reliant on cars. The development pattern proposed is considered to be the best way to achieve better air quality, carbon neutrality and community wealth building.</p>

Reg18-D-001	Local Plan Drop-In	Reg18-D-001/155	General							How can planning help prevent displacement from gentrification especially in Forest Gate	Comment noted. Gentrification is a process where an increase in high income residents to an area changes its character, displacing existing residents and businesses due to increasing rents and house prices. Even where the previous population may not be displaced, the changes in population and character, businesses and spaces can make long term residents feel unwelcome or priced out of participating in community spaces and activities. To address this phenomenon the Local Plan includes policies to deliver affordable housing across the borough; to increase the number of affordable retail units in new town centres (so independent and local business can afford to open in them); creating greater flexibility on where smaller community facilities can be located, so they are in areas where it may be cheaper to rent or purchase space and located more evenly across the borough; to require developments delivering space for businesses to sign up to the Community Wealth Building pledges and provide priority access to jobs and fund training for local residents; to ensure new community facilities are accessible to all residents and are designed to meet the needs of the local community. The Plan also requires that all significant developments are masterplanned alongside the existing community - so that the community are central to shaping the borough as it changes.

Reg18-E-098	Resident	Reg18-E-098/001	Vision and objectives							Overall the DP is a cautious and conservative document that buys into mainstream assumptions of land use and economic orthodoxy at the expense of the more radical employment based solutions set out, eg, in the Majority Party Manifesto 2022, that are required to change current paradigms of urban change and growth in Newham. It relies on large scale notions of inward housing investment to kickstart development, rather than looking at how existing communities can be supported to upskill themselves, through the constraints of a market driven land use plan. Because of this approach the DP, in effect, supports the gentrification of the older parts of the Newham urban structure which will lead to the continued marginalisation and dispossession of Newham's current less well off communities. The DP should be rewritten with existing communities and their needs at its heart.	Comment noted. In order for the Local Plan to be adopted and used by the Council, it has to be considered lawful and sound by the nationally appointed Planning Inspector. This requires the Plan to be in conformity with national policies and places limits on the Council's flexibility to develop policy. One such constraint is the requirement for the Local Plan to demonstrate how we will deliver the housing target set in the London Plan. A failure to deliver this target results in the Council losing the ability to reject planning applications. Including those which deliver insufficient local benefits, including affordable housing. Having said that the Plan sets a range of policies which seek to address existing inequalities within Newham and ensure development and growth benefits residents across the borough. This includes a requirement for developments to require developments delivering space for businesses to sign up to the Community Wealth Building pledges and provide priority access to jobs and fund training for local residents. Through collecting Community Infrastructure Levy funds, we have been able to fund the participatory budgeting People Power Places programme, a significant resident-led upskilling programme.

Reg18-E-098	Resident	Reg18-E-098/052	Vision and objectives							In essence the DP is silent on the key issue [gentrification]. How do and how can Plan policies prevent existing Newham Communities becoming marginalised in and dispossessed from their housing, their local neighbourhoods and local urban centres.	Comment noted. Gentrification is a process where an increase in high income residents to an area changes its character, displacing existing residents and businesses due to increasing rents and house prices. Even where the previous population may not be displaced, the changes in population and character, businesses and spaces can make long term residents feel unwelcome or priced out of participating in community spaces and activities. To address this phenomenon the Local Plan includes policies to deliver affordable housing across the borough; to increase the number of affordable retail units in new town centres (so independent and local business can afford to open in them); creating greater flexibility on where smaller community facilities can be located, so they are in areas where it may be cheaper to rent or purchase space and located more evenly across the borough; to require developments delivering space for businesses to sign up to the Community Wealth Building pledges and provide priority access to jobs and fund training for local residents; to ensure new community facilities are accessible to all residents and are designed to meet the needs of the local community. The Plan also requires that all significant developments are masterplanned alongside the existing community - so that the community are central to shaping the borough as it changes.

Reg18-E-098	Resident	Reg18-E-098/054	Vision and objectives				4			What links are there between land use, community safety crime and policing policies which might increase confidence in the Police, reduce crime and improve community cohesion and safety. How can this be achieved without creating a 24/7 surveillance society?	Comment noted. The Local Plan addresses the topic of safety and security through a range of policies, such as requiring developments to have proactively design in safety and security measures (see Policies D1, D2, D6, GWS1), and have Secure by Design accreditation (Policy D1). Planning obligations will also be sought to support physical policing infrastructure where reasonable (Policy D2), to deliver social benefits for Newham's residents (Policies BFN3, BFN4 and J4), and to build capacity in local partnerships addressing high streets safety coordination (Policy HS5). The Local Plan seeks to optimise soft, design-led preventive measures before any security features are implemented, seeking to strike a balance between managing crime risk, creating environments that feel safe, and protecting residential privacy. The Metropolitan Police Service (run by the GLA), is also a consultee for the Local Plan and as part of decisions on major planning applications, and have dedicated designing-out-crime officers who are trained to conduct environmental visual audits to identify methods of making a place less attractive for criminal behaviour. Please also see responses we have provided to their comments on the draft Local Plan. The Council's Community Safety Enforcement department regularly collect and review data around ASB in the borough, responding to hotspot locations through targeted and focused operations in

Reg18-K-006	Resident	Reg18-K-006/001	Vision and objectives				Objective 3. People-friendly neighbourhoods with green and clean streets			<p>This concept of the 15 minute city seemed to be very controversial at the East Ham local plan consultation. I think it's a gimmick which does not translate into reality for many people living in Newham. I live in Wall End and I can't access anything within 15 minutes- shops, doctor's surgery, the tube is about 20 minutes away as is the nearest bus stop, I'm no where near a park & generally when I leave the house it's to go somewhere well away from Wall End. What about if you are disabled or elderly. This concept is quite absurd actually & my concern is that the people who have tried to write this into the plan have no idea about what it is like to live here.</p>	<p>Comment noted. We agree that many areas of Newham do not operate as 15 minute neighbourhoods. This is what the Plan is seeking to change. The idea of 15 minute neighbourhoods is to ensure that all residents can live within a 15 minute walk of key facilities such as shops, schools, parks and workspaces. This is so that residents do not have to travel so far to reach these essential services. Residents are of course welcome to travel further afield to reach a wider range of facilities. At the moment some parts of our borough are very isolated and do not have easy access to shops and facilities. The Plan aims to change this, through introducing new locations for shops, community facilities and parks and by creating new routes to increase access to existing facilities. You can read more about this concept in the Local Plan (spatial strategy and neighbourhoods section) and the characterisation study (page 135). To better reflect the intentions behind this objective, this principle is now referred to as a network of well-connected neighbourhoods, in the Local Plan. It is important to clarify that there is no intention to limit which facilities residents can use. In addition, the 15 minute neighbourhood concept is not the same as the delivery of traffic reduction proposals, such as low traffic neighbourhoods. Low traffic neighbourhoods are about making it easier to walk and cycle between locations and reducing the use of cars for short</p>

<p>Comment Response</p>	<p>journeys. All locations can still be reached by car, but you may need to go a slightly longer way round.</p> <p>As with other London boroughs, we're working to encourage fewer journeys by car – and increased walking, cycling and use of public transport.</p> <p>Through delivering both these concepts, the intention is to make it easier and safer to reach more facilities in a safer, low carbon and healthier way – increasing freedom of movement, not reducing it.</p>

Reg18-T-048	Resident	Reg18-T-048/004	Vision and objectives				3			[Please provide any comments and feedback on *Section 2: Vision and Objectives*.] You Talk about a network of Green Spaces, West Ham Park is a vital part of that network. It is proven that walking in Green Space improves mental health and wellbeing. Visiting the Park is one of the few, low cost, activities that all members of the family can do together. These are more reasons why West Ham park should not be built on.	Comment noted. The protection of parks and open spaces is included in policy GSW1.

Reg18-E-116	SEGRO Plc	Reg18-E-116/004	Vision and objectives				2			1. Vision and Objectives and Neighbourhood Profiles a. Vision and Objectives The Vision and Objectives section of the plan is largely silent on industrial uses. Industrial uses are essential to the country's functioning economy and particularly that within LBN where industrial uses provide a significant number of jobs. SEGRO has published a report titled 'Keep London Working' that sets out research into the London employment market and highlights the vital role industrial land has in the capital's future economic and population growth. Therefore, <u>SEGRO recommend that the Vision more clearly outlines LBN's approach to protecting and promoting new industrial uses in the wider context of economic growth for the borough and supporting functions for new residential development. The economic objectives (no. 2, p19) should specifically refer to the protection and growth of industrial uses.</u>	This wording change has not been made. We did not consider this change to be necessary as the vision and objective 2 already address the importance of a range of employment land and provision. This includes industrial land.
