Chair's comments

Firstly as the new Chair of the Pensions Committee ('PC') and on behalf of my fellow committee members, I would like to thank the previous chair, Cllr Rohit Dasgupta who stepped down in December 2022. I am pleased to introduce the 2022-23 annual report and accounts.

As today's stewards of the Local Government Pension Scheme ("LGPS") and the Newham Fund, ("the Fund") my colleagues on the PC, the members of our Local Pension Board and Fund Officers take very seriously their responsibilities to all stakeholders – including 30,715 scheme members, and 54 active employers – ensuring that the scheme is locally administered effectively and efficiently on their behalf.

The Fund was last valued by the actuary as at the 31 March 2022 which set the employer contribution rates for 2023-26. I am delighted to announce the actuary reported that the Funding level has improved to 100%, an improvement on the 96% funding level reported in the previous actuary valuation as at 31 March 2019.

Despite a volatile year on the markets, the value of the Fund's net assets was down by only £10m from last year, closing 2022/23 at £1.7bn. The Pensions & Investment Research Consultants (PIRC) Local Authority Fund Statistics annual league table on LGPS performance 2022-23 shows this Fund was the only one in the London grouping to show a positive investment return of 0.4% in 2022-23 and within the 69 LGPS Funds the Newham Fund was ranked as having the 10th highest investment performance. The LGPS universe average investment return in 2022/23 was minus 1.7%, the extra 2.4% return generated by this Fund equates to c. £40m in monetary terms. LGPS Fund investment performance should always be viewed over the long terms and the Newham Fund features in the top quartile over a three year term.

This Fund was shortlisted as a finalist at the LAPF Investment Awards 2023 for their Sustainable Investment Strategy (Climate) category in recognition of this Fund's ESG policy and firm action taken to reduce fossil fuel investments, manage climate risk and seize the opportunities that comes with energy transition within its investment portfolio.

The PC is taking active steps to include climate considerations as part of investment decision making in preparation for the Task Force on Climate-related Financial Disclosures (TCFD) which is expected to become part of LGPS regulation.

The Fund continues to have a close dialogue with the London CIV ("LCIV") to progress the transition of remaining assets into its asset pool in accordance with the Department of Levelling Up, Housing and Communities (DLUHC) guidance. The value of Fund assets held under management (AUM) with the LCIV were £1.053bn (64%) at 31 March 2023 which generated a net saving in fees to the Fund of £0.64m over 202/23.

I and my committee colleagues will remain resolute in our determination to maintain a decent pension scheme for the membership, recruit new members especially in those groups that are under-represented, invest responsibly, and provide excellent value for council tax payers, employers and other stakeholders of the Fund.

Cllr John Gray
Chair of the Pensions Committee

Highlights of 2022/23

Local Authority Pension Fund (LAPF) Investment Awards 2023

The Fund was chosen as a finalist for the LAPF (LGPS sector media magazine) Investment Awards 2023 in the LGPS category covering Sustainable Investment Strategy (Climate) in recognition of the Fund's innovative ESG policy and decisive action taken to reduce fossil fuel investments from £26m to £4m and climate risk in general within the Fund portfolio.

Triennial Valuation at 31 March 2022

Every three years the Council and other employers in the LGPS are required to have an actuarial valuation of its Pension Fund. The 2022 triennial valuation sets the revised employer rate that came into effect in 2023/24. This work was carried out collaboratively between the Fund's actuary, Barnett Waddingham, Local Pensions Partnership Administration and Newham Council. For the Council which is by far the largest employer in the Fund this valuation resulted in a reduction of 1.2% in the pension fund employer rate on payroll in 2023/24, or in monetary terms a cost reduction of £2.1m compared to 2022/23.

Revised Funding Strategy Statement (FSS)

The FSS has been revised with the assumptions that underpin the new triennial valuation. It establishes a clear and transparent fund-specific strategy which will identify how employers' pension liabilities are best met going forward and take a prudent longer-term view of funding those liabilities.

Revised Investment Strategy Statement (ISS)

The purpose of the ISS is to reduce the funding gap, whilst taking into account constrained Council spending and with it a focus on risk management, to ensure that contributions are maintained at the same level. The ISS will be reviewed during 2023/24 based on decisions made on the Strategic Asset Allocation.

Review of Environmental, Social and Corporate Governance (ESG) policy

In March 2023 the Fund reviewed its ESG policy and voting policy on managing climate change risks in line with impending DLUHC regulation on TCFDs to improve reporting of climate-related financial information.

Sustainable Investment Monitoring Reporting

The engagement and voting activity of the Fund's investment managers and the feedback is recorded within the Sustainable investment monitoring report which will be produced on an annual basis. It provides an insight to the developing nature of the monitoring and activity by managers in this area. This is a live document, whereby manager' processes and asset class norms are continually developing, and will evolve over time.

The Fund's outlook for 2023/24

DLUHC LGPS Pooling consultation

This consultation seeks views on proposals relating to the investments of the LGPS and covers the areas of asset pooling, levelling up, opportunities in private equity, investment consultancy services and the definition of investments. This consultation was released summer of 2023 and will conclude in October 2023 and subsequent regulation are expected in the first quarter of 2024.

The Task Force on Climate-Related Financial Disclosures (TCFD)

Whilst it is not yet a regulatory requirement for the LGPS to report against this framework this Fund has actively started making preparations for its implementation. The DLUHC guidance on TCFD has been delayed and is now expected in the autumn of 2023. The Minister of Local Government issued a letter on 15 June 2023 stating that the DLUHC will not impose any requirements on the governance or disclosure of climate-related financial risks in the LGPS for 2023/24.

Pooling of Assets & Collaborative Working

The Fund is actively engaged with the LCIV – the Chair participates at LCIV General Meetings and votes on motions. The PC continues to review new investment opportunities available within the LCIV, which will deliver the Fund's investment strategy and ensure that fees are kept at a minimum. The Fund will work with the LCIV to continue moving non-pooled assets onto the pool as and when suitable products become available.

Review of the Equities Management and Protection Strategies

The Fund will be reviewing its strategic asset allocation and holdings within the equities class and implement any changes that are agreed. The existing protection strategies that involve hedging the Funds' exposure to equity volatility also be reviewed.

Good Governance

The Scheme Advisory Board have agreed the proposals on Good Governance which has been submitted to DLUHC for adoption. It is expected that the proposals will come into effect early next year, although the Fund will have a year from that date to evidence compliance once DLUHC have issued their guidance.

Fund Governance

The Fund is part of the LGPS. The benefits paid out and the scheme regulations are set nationally, but the Fund is managed and administered locally. As administering authority, the London Borough of Newham (LBN) has legal responsibility for the effective management of the Fund. The Council delegates this responsibility to the Committee, which is the formal decision making body for the Fund.

Pensions Committee

The Committee consists of ten Councillor members, two substitutes and three co-opted trade union representatives.

The Councillor members as at 31 March 2023 were

Chair – Councillor
John Gray (2/4)

Vice-chair – Councillor
Joshua Garfield (2/4)

Councillor Rohit
Dasgupta (4/4)

Councillor Jemima
Mcalmont
(1/4)

Councillor
Ken Penton (2/4)

Councillor
Dina Hossain (1/4)

Councillor
Larisa Zilickaja (4/4)

Councillor
Caroline Adaja (2/4)

The Councillor substitute members were Councillor Winston Vaughan and Councillor Mohammed Gani.

Co-opted trade union representatives during 2022/23 were Tony Fernandes (Unite), Gloria Hanson (Unison) and Stella Ikanik (GMB).

The Committee meets quarterly to discuss investment strategy, legislation changes and developments that may affect the Fund, and to review the performance of the fund managers. The Committee may also arrange meetings on an ad hoc basis as required, and attend training sessions throughout the year. During 2022/23 the Committee met 4 times (training sessions) – the number of meetings attended by each member is shown above.

Management and Advisors

The work of the Committee is supported by a number of officers, advisors and external managers as set out below.

Responsible Officers

Pensions and Treasury team is based in the oneSource Finance service and ensures that members of the Committee receive advice on investment strategy and monitoring of the managers. The team also reviews management arrangements and other issues as appropriate, as well as accounting for the activities of the Fund.

Conrad Hall	Corporate Director of Resources	020 3373 4219
Stephen Wild	Head of Pensions and Treasury	020 3373 3881
Rakesh Rajan	Pension Fund Manager	020 3373 6595

The oneSource Exchequer and Transactional Service monitor and manage the pension administration contractors.

Sarah Bryant	Director of Exchequer & Transactional services	01708 432 233
James Cocks	Head of People Transactional Services	01708 432 266
Jacqueline Andress	Pensions Projects and Contracts Manager	020 3373 9658

Scheme Administrator

LBN contracts out its benefits administration to Local Pension Partnership (LPP) in accordance with the council's best value arrangements. LPPA maintain pension scheme membership records and provide advice, benefits calculations and estimates. LPP was formed in 2016 through a collaboration between Lancashire County Council and the London Pensions Fund Authority (LPFA) and the group was split into LPPI (Investments) and LPPA (Administration) in June 2020. The LPPA are the main contact point for all member and employer scheme queries, employees who wish to join the scheme and for advice on procedures or complaints

LPPA

2nd Floor, 169 Union Street, London SE1 0LL
020 7369 6105

Custodian Bank

The Fund uses Northern Trust as its custodian to hold and safeguard the Fund's assets. The custodian acts as the Fund's bank, settles transactions and is responsible for investment income collection.

Northern Trust

50 Bank Street, Canary Wharf, London, E14 5NT

In addition to acting as the Fund's custodian, Northern Trust provides performance analysis, comparing the performance of the Fund and individual managers to agreed benchmarks and market indices on a monthly, quarterly and annual basis. Pensions and Investment Research consultants Ltd (PIRC) is used to monitor the Fund against the LGPS universe.

Investment Managers used by the Fund

Day to day investment management of the Fund's assets is delegated to specialist managers in accordance with the LGPS (Management and Investment of Funds) Regulations 2009 (as amended). During the year the Fund used the following external managers:

Fund Manager	Mandate	Contact Details
Arcmont Asset Management	Private debt	77 Grosvenor Street, London, W1K 3JR
Baring English Growth	Private equity	3rd Floor, 11 Strand, London, WC2N 5HR
Brightwood	Private debt	15 Stanhope Gate, London, W1K 1LN
Brockton	Property unit trust	89 Wardour St, Soho, London W1F 0UA
CBRE	Property unit trust	3rd Floor, One New Change London, EC4M 9AF
Cheyne	Social Housing	Stornoway House, 13 Cleveland Row, London, SW1A 1DH
Fiera	Real assets	Queensberry House, 3 Old Burlington Street, London, W1S 3AE
HarbourVest	Private equity	3rd Floor, 33 Jermyn Street, London, SW1Y 6DN
KGAL	Real assets	27 Bush Lane, London, EC4R 0AA
Legal & General	Passive equities and passive bonds	One Coleman Street London, EC2R 5AA
Longview	Unconstrained global equity active	Thames Court, 1 Queenhithe, London, EC4V 3RL
Internally managed	Diversified alternatives - residual	Newham
Payden and Rygel	Fixed income	1 Bartholomew Lane, London, EC2N 2AX
Permira	Private debt	80 Pall Mall, London, SW1Y 5ES
Schroders	Structured equity	30 Coleman Street, London, EC2R 5AL
London CIV	Asset Pool Operator	4th Floor, 22 Lavington Street, London, SE1 0NX
	Global bond fund (from June 2021)	
	Global equity focus fund (from December 2022)

Legal Advisors

The Fund receives legal advice from LBN's in-house legal team who in turn have taken specialist advice from:

Sackers and Partners
20 Gresham St
London, EC2V 7JE

Bevan Brittan
Fleet Place House, 2 Fleet Place
London, EC4M 7RF

Subscription bodies

The Fund is a member of the Pensions and Lifetime Savings Association (PLSA), the Local Authority Pension Fund Forum (LAPFF), the Institutional Investors Group on Climate Change (IIGCC), Pensions & Investment Research Consultants (PIRC) and the London Pension Fund Forum (LPFF).

Risk Management

The Fund's main risk is that its assets fall short of its liabilities to the extent that there are insufficient assets to pay promised benefits to members. The investment objectives have been set with the aim of maximising investment returns over the long term within specified risk tolerances. This aims to increase the likelihood that the promises made regarding members' pensions and other benefits will be fulfilled.

Responsibility for the Fund's risk management strategy rests with the Committee.

In order to manage risks a Pension Fund Risk Register is maintained and reviewed regularly by the pensions board. Risks identified have been reduced through planned actions. The Risk Register is managed by the Director of Exchequer & Transactional Services and the Head of Pensions and Treasury with risks assigned to "Risk Owners".

The Fund's approach to risk management is covered in the following policies:

- [Investment Strategy Statement \(ISS\)](#)
- [Funding Strategy Statement \(FSS\)](#)
- [Environmental, Social & Governance \(ESG\) Investment Policy](#)
- [Governance Policy](#)

Key risks

Risk	Risk Rating	Responsible Officer	Mitigations
Administration Risks			
3rd parties undertaking outsourced administration work are unable to facilitate timely and accurate updating of service records. Inaccuracies in service records may impact on actuarial valuations, calculations of pension benefits and on notifications to starters and leavers.	Medium	Director of Exchequer & Transactional Services	Actuary undertakes data cleansing on service records as part of the triennial revaluation which should identify the extent of any inaccuracies.
Loss of funds through fraud or misappropriation by 3rd parties could lead to negative impact on reputation of the Fund as well as financial loss	Medium	Head of Pensions and Treasury & Director of Exchequer and Transactional Services	Third parties regulated by the FCA. Separation of duties and independent reconciliation procedures in place. Review of third party internal control reports undertaken by Pensions Finance Team. Periodic internal audits of Pensions Finance and Exchequer & Transactional teams.
Funding Risks			
Scheme members live longer leading to higher liabilities	Medium	Head of Pensions and Treasury & Director of Exchequer and Transactional Services	Review at each triennial valuation

Risk	Risk Rating	Responsible Officer	Mitigations
Assumed levels of inflation and interest rates may be inaccurate leading to higher than expected liabilities.	Medium	Head of Pensions and Treasury	Review at each triennial valuation
Scheme employer fails to pay contributions timely each month	Low	Head of Pensions and Treasury	Monthly monitoring and prompt communication
Failure of an admitted or scheduled body leads to unpaid liabilities being left in the Fund to be met by other employers.	Medium	Director of Exchequer and Transactional Services	Transferring admission bodies required to have a bond or guarantor in place. Regular monitoring of employers.
Investment Risks			
Fund managers fail to achieve agreed returns	Medium	Head of Pensions and Treasury	Independent monitoring of fund manager performance. Fund manager performance is reviewed quarterly.
Regulation Risks			
Introduction of European Directive MiFID II results in a restriction of Fund's investment options.	Low	Head of Pensions and Treasury	The Fund has successfully opted up with all managers and third parties as required by the deadline.

Newham Pensions Board Annual Report 2022/23

Purpose of Report

1. The report is compiled to provide feedback on the work undertaken during April 2022 to March 2023 (2022-23) by the Newham Pensions Board and to meet the legislative requirement for producing an Annual Report.

Background

2. The Pensions Board oversees the administration of the Newham Pension Fund on behalf of the Adminstrating Authority. Decisions made on the investment of the fund is carried out by the Newham Pension Committee
3. The London Borough of Newham Pension Fund Local Pensions Board (“Pensions Board”) was established in accordance with changes to the Public Service Pension Act 2013 (PSPA13) statutory pension scheme that is connected with it.
4. The Pensions Board is supported by officers of the London Borough of Newham Administering Authority (“Administrator”), by the appointment of an Independent Chair, and by assurance statements and information provided by external service providers to London Borough of Newham Pension Fund (“Fund”).
5. There are three employer representatives and three scheme member representatives.
6. The Pensions Board has met four times in the Municipal Year 2022-23.
7. The costs of the Pensions Board’s operations;
 - a. Meeting and Independent Chair Allowances are paid by the London Borough of Newham
 - b. Training costs are charged to the Pension Fund and are included in the Fund budget.

Implications and Risks

Financial implications and risks:

None

Legal implications and risks:

None

Human Resources implications and risks:

None

Equalities implications and risks:

None

Membership Attendance at Meetings

1. The Membership of the Pensions Board is:

Independent Chair	Tejonidhi Kashyap
Employee Representative	Catherine Hanlon (GMB)
Employee Representative	Donford Vardon (UNITE) up to Mar-23
Employee Representative	Veronica Holley (UNISON) up to Jan-23
Employee Representative	Christine Lander (UNISON) with effect Feb-23
Employer Representative	John Saunders
Employer Representative	John Hollands

Attendance at Meetings

*** A committee update, is an Administration update which was presented to committee at the last Pension Committee*

Chair's Comments

1. I would like to thank the members of the Pensions Board and the officers for their commitment to ensure effective and efficient service to our scheme members and employers, as we emerge from the Covid-19 pandemic.
2. The Pension Board regularly reviews the performance of the Pensions Administration service provider. During 2021-22, the Board reviewed data breaches, complaints and IDRPs cases. The Pensions Board also reviewed the performance of the service provider in relation to adherence to various SLAs.
3. During 2021-22, the Pensions Board reviewed progress of efforts made to increase engagement with employees to join the scheme. This is a key area of focus over 2022-23 due to a high number of existing employees opting out of the scheme in Q1 2022.
4. In addition, the Pensions Board raised questions to understand the preparedness of the Newham Pensions Fund on key events over 2021-22 such as transition away from LIBOR, and threats relating to cybersecurity.
5. Another key area of focus over 2022-23 will be the implementation related to the migration of the new Administration System ("Project PACE"). The Administrator has started to go live with the migration for various schemes with the migration for the Newham Pensions Fund scheduled for Q3-Q4 2022. The Pensions Board will monitor the implementation keeping in view the operational impact on the scheme and its members.

Tejonidhi Kashyap
Chair of the Pensions Board

Business Plan and Execution

1. The Pensions Board has created a Business Plan which can be viewed [here](#)
2. In the period from April 2022 to March 2023, the Pensions Board has considered a number of matters, some of which are listed below;
 - a. Adherence to regulations
 - i. Changes to regulations and guidance.
 - ii. LGPS exit cap, McCloud judgement to understand the impact on employees, the Fund and any Administrative implications.
 - iii. Training needs analysis and monitoring
 - b. Governance
 - i. Review of the Authority's Fund Risk Register
 - ii. Review Administration and Fund Complaints statistics
 - iii. Discussions on proposed updates to Terms of Reference.
 - iv. Review of Fund Annual Report
 - c. Administration
 - i. Administration Performance Reports
 1. Including data quality
 - ii. Administration Service Contract
 - iii. Reviewing Administrators plan for migrating to a new system, Project PACE
 1. Proposed changes to SLA, through changes to how cases are managed
 2. Enhancements from existing system, move to member self-service, monthly reporting.
 - iv. Post implementation review on performance
 1. Impact go live has had on call centres and SLAs
 - d. Membership and communication
 - i. Reviewed membership statistics, percentage of eligible members who are in full or 50:50 scheme for the main Newham fund by age and earnings
 - ii. The impact of the February 2022 Re-enrolment on final numbers who remained in the scheme
 - iii. Discussions on communications with employers and schools, to look at promoting LGPS and increasing membership numbers.
 - iv. Working on strategy for membership numbers
 - e. Record keeping
 - i. Data report covering performance of service provider in relation to processing times, time to answer phone calls and overall work against SLA's.
3. There have been no conflicts of interest involving any of the work undertaken by the Pensions Board or during any agenda items.

Review of Risks

1. The Pensions Board monitors the risk register on a regular basis. The Pensions Board seeks to ensure greater consideration on particular investment and non-investment risks identified to drive its work forward.

Forward Plan for 2022/23

1. The Pensions Board has made a business plan for the 2023-24 period taking into account key milestones and challenges the scheme is expected to face in this period. The plan is available [here](#).
2. Further information regarding the Newham Local Pension Board including minutes of the meetings are available [here](#).

Newham Pensions Board Business Plan 2022/23

Introduction and background

This is the Business Plan for the London Borough of Newham Pension Fund Local Pensions Board (“Pensions Board”).

The Pensions Board oversees the administration of the Newham Pension Fund on behalf of the Adminstrating Authority. Decisions made on the investment of the fund is carried out by the Newham Pension Committee.

The Pensions Board was established in accordance with changes to the Public Service Pension Act 2013 (PSPA13) statutory pension scheme that is connected with it.

The Pensions Board is supported by officers of the London Borough of Newham Administering Authority (“Administrator”), by the appointment of an Independent Chair, and by assurance statements and information provided by external service providers to London Borough of Newham Pension Fund (“Fund”). The costs of the Pensions Board’s operations are charged to the Pension Fund and is included in the Fund budget.

The Business Plan is an important document, which sets out the aims and objectives of the Pensions Board over the coming year, its core work and how these objectives will be achieved.

This Business Plan is reviewed frequently (at least annually), and progress against objectives is monitored in every meeting. New priorities that might arise can be introduced at each meeting and new actions identified where progress has not been as expected.

The achievement of the objectives and key tasks are reviewed at the end of each year and reported to the Newham Pensions Committee (“Pensions Committee”).

Statutory Responsibilities

The role of the Pensions Board as defined by sections 5 (1) and (2) of the Public Service Pensions Act 2013, is to –

- Seeking assurances that due process is followed with regard to Pensions Committee decisions.
- Considering the integrity and soundness of Pensions Committee decision making processes.
- Assist the London Borough of Newham Administering Authority as Scheme Manager.
- Seek assurance that administration performance is in compliance with the Administration Strategy.
- Secure compliance with the LGPS regulations and any other legislation relating to the governance and administration of the LGPS.
- Secure compliance with requirements imposed in relation to the LGPS by the Pensions Regulator (“Regulator”) in such other matters as the LGPS regulations may specify.
- Secure the effective and efficient governance and administration of the LGPS for the Fund.

- Provide the Scheme Manager with such information as it requires ensuring that any member of the Pensions Board or person to be appointed to the Pensions Board does not have a conflict of interest.

Accountability

The Pensions Board will ensure it effectively and efficiently complies with the code of practice on the governance and administration of public service pension schemes issued by the Regulator.

The Pensions Board will also help ensure that the Fund is managed and administered effectively and efficiently and complies with the code of practice on the governance and administration of public service pension schemes issued by the Pension Regulator. The Pensions Board holds the officers accountable by overseeing the work they carry out in administering the pension scheme.

The Pensions Board is accountable to the Scheme Manager, to the Regulator, and to the scheme employers and members it represents.

Objectives

The Pensions Board's main objectives are set out below:

Governance: Act solely in terms of public interest, with integrity, objectivity, accountability, openness, honesty and with leadership, and seek to ensure these are followed by all those involved in the Fund's administration.

Compliance: Seek to understand statutory framework of regulations and guidance, and ensure all aspects are complied with.

Administration: Seek to ensure that proper procedures and controls are in place and are followed, and that performance expectations are met.

Communication: Seek to ensure that standards of reporting and clear communications are maintained and improved.

Efficiency: Seek to ensure improvements are being made in all processes.

Effectiveness: Seek to ensure that the Pensions Board is making an effective contribution to the governance of the Fund through planning and performance assessment.

Risk management: Seek to ensure that investment and non-investment related Fund risks are being identified, monitored and mitigated through appropriate procedures and controls.

Knowledge and understanding: Seek to ensure that all Pensions Board members build and maintain a suitable level of knowledge and understanding. The Pensions Board will seek to ensure that proper advice is being taken and considered in all aspects of decision making

Responsiveness: Seek to ensure that the Pensions Board considers and responds to consultations, surveys and requests for information effectively.

The means by which the Pensions Board can deliver these objectives are set out in the sections below.

Budget

The Pensions Board agrees an annual budget approved by the Pensions Committee. Provisional sums are included to allow the Pensions Board to cover costs for training, independent advice and any related costs. All costs are chargeable to the Pension Fund.

The allocated budget is £5,000.

Key focus areas and tasks for the Pensions Board

1. Business Planning and Performance

- Agree programme of work, budget and resources for the coming year and monitor progress at each meeting.
- Undertake a self-assessment of performance for the year.
- Agree a report each year on the activities of the Pensions Board for inclusion in the Fund Annual Report.

2. Adherence to regulations

- Review the Pension Fund Annual Report and Accounts for content and compliance.
- Review statutory policy statements on a periodic basis. The list of statutory policies and last review dates are in Appendix A. The Communications Policy, Governance Compliance Statement and discretions policies are due for review in 2023/2024.
- Monitor and review changes to regulations and guidance at Pensions Board meetings.
- Receive and review reports on the LGPS exit cap and McCloud judgement to understand the impact on employees, the Fund and any Administrative implications.

3. Governance activities

- The Pensions Board should meet an appropriate number of times a year, at least quarterly.
- Review decisions of the Pensions Committee. Minutes of the last Committee meeting to be considered as standing item on Board agenda.
- Review management and monitoring of the Pension Fund risk register. The risk register should cover all potential Investment and non-investment Administration risk areas. The administrator should take a holistic view to risks and understand how they are connected. Discuss new risks at Board following discovery of risk
- Monitor audit reports and assurances on internal controls.
- Discuss implementation of non-mandatory but highly recommended policies; list given in Appendix B

4. Administration Procedures and Performance

- Review a report on scheme administration at each meeting.
- Monitor notifiable events, recording, and reporting of breaches.
- Monitor performance against Service Level Agreements (SLAs). Ensure that improvements are made at outsourced pension provider to ensure the SLAs

are met again following pension provider's implementation of a new computer system

- Receive reports of complaints made and progress on IDRP cases
- Monitor movement in membership numbers
- Receive and review periodic reports in respect of performance related to internal and external Operations. Action being taken to improve performance, if required, to be included.
- Implement data improvement plan to ensure data quality and integrity. Receive data quality assurance from service providers.
- Monitor timeliness of receipt of contribution payments and any recovery action required
- Review operation of key internal procedures and controls related to third party contracts
- Complete implementation of a Pension Administration Strategy (PAS), which sets out responsibilities, and consequences of not complying with duties to the Fund. The PAS should stand up to challenges from employers.
- Monitor and review the effects of the implementation of LPPA's new Pension Administration system and the roll out of members' self service. Examine whether the promised service improvements have occurred.

5. Investment and Funding

- Review funding and investment decisions made by committee to assess compliance with regulations and guidance
- Review the valuation process for compliance and good practice.
- Review the investment strategy statement and funding strategy statement to assess compliance with regulations and guidance
- Challenge officers and request additional data where required to improve Boards knowledge and ability to effective review decisions and reports in line with the latest regulation and guidance.

6. Communications

- Monitor disclosure of information in line with statutory requirements, including annual benefit statements.
- Review communication for content and clarity such that information sent is clear, precise and free from jargon.
- Review communications with employers
- Review common letters sent to members e.g. retirement letters, new joiner letters
- Update of the relevant Pension Web pages, with new links to websites that would help our members with knowledge of the pension scheme
- Review the impact of cost of living crisis on membership numbers and ensure communication is circulated to highlight the benefits and offering of the scheme.
- Have oversight of the update to the council website to maximise information available to current, deferred and potential members and stakeholders of the fund.

7. Record keeping:

- Review membership reporting and reconciliation processes.
- Monitor data quality is reviewed regularly. The quality of member data should be understood by the Administration team and the Pensions Board. It should be recorded and tracked to ensure common and scheme specific data is of good quality.
- Monitor the introduction of a robust data improvement plan.
- Challenge the Administrator about how the member data is held and handled.

8. Cyber security

- Monitor and review risks posed to data and assets held by the Fund so steps can be taken to mitigate the risks. This should be reflected in the risk register.
- Challenge the Administrator to consider physical security as well as protection against remote attacks.
- Where cyber security is maintained by Newham Council rather than the Administrator, challenge the Administrator that the Fund's requirements are met.
- Challenge the Administrator to increase awareness of cyber security processes used by third party providers, such as the custodian and external investment managers, that handle Fund assets or data.

9. Pensions Board members training and engagement

- Pensions Board members are required to have an appropriate level of knowledge and understanding in order to carry out their role.
- Appropriate training for Pensions Board members to be provided and clear expectations set around meeting attendance.
- Individual Pensions Board member training and training needs should be assessed and clearly recorded.
- Where possible training for the Pension Board can be included with the Pension Committee.
- Processes should be developed and implemented to deal with an ineffective Pensions Board member by either the chair of the Pensions Board or the scheme manager.
- Pensions Board members should be fully engaged and challenge parties where appropriate.

10. Glossary

Public Service Pension Act 2013 (PSPA13)	An Act to make provision for public service pension schemes; and for connected purposes
Administering Authority	The Administering Authority is responsible for maintaining and investing its own Fund for the LGPS. This means the Administering Authority is responsible for making all decisions relating to the operation of the Fund
IDRP	IDRP stands for Internal Dispute Resolution Procedure. It is the procedure which allows actual and potential plan beneficiaries to raise a complaint with the plan's trustees about matters relating to that plan.
Pension Administration Strategy	Strategy which outlines the processes and procedures allowing the administrator and employers to work together in a cost effective way to administer the LGPS
LGPS	Local Government Pension Scheme
Newham Pension Fund	This structure provides pensions for employees
Newham Pensions Committee	The main role is to oversee the investment of pension members contributions
Newham Pension Board	This oversees the administration of the Newham Pension Fund
Investment strategy statement	LGPS regulations require administering authorities to prepare and maintain an ISS. The ISS outlines the Fund's investments objectives and investment beliefs, identifies the risks the Fund faces and outlines how these risks are controlled/mitigated
MHCLG	Ministry of Housing, Communities & Local Government
CIPFA	The Chartered Institute of Public Finance and Accountancy
ESG	Environmental, social and Corporate Governance considerations as part of Investment Strategy
PACE	LPPA led project to implement new Pension Administration system.
SLAs	Service Level Agreements, agreed standards and timescales of work
UPM	Universal Pensions Management, the pension database and calculation system utilised by Newham Pension Fund's pensions administrators, LPPA

Taskforce for climate-related financial disclosures (TCFD) framework.

A framework for the disclosure of climate-related financial risks. The goal of the framework is for disclosures to inform stakeholders as to how companies are managing risks and to allow more informed investment, credit and insurance underwriting decisions. There are four elements to the TCFD framework (as illustrated below) and, although this was not explicitly developed for pension schemes, it has been adapted for their use. TCFD aligned reporting will become a regulatory requirement for defined benefit pension schemes.

The UK Government has published proposals that will require larger schemes to report against this framework on an annual basis.

The Department of Levelling Up, Housing and Communities will conduct a consultation this autumn on the implementation of mandatory TCFD-aligned reporting in LGPS.

Governance

- Establish and maintain oversight of climate-related risks and opportunities.
- Establish and maintain processes to ensure those managing the scheme on behalf of the Trustees are assessing and managing climate-related risks and opportunities.

Strategy

- Identify climate-related risks and opportunities that will impact the investment strategy of the scheme over different time horizons.
- Assess the impact of identified risks and opportunities on the scheme's investment strategy.
- Assess the resilience of the scheme's assets and investment strategy to climate-related risks in different scenarios. The scenarios should consider different policy pathways

Risk Management

- Develop and maintain processes for identifying, assessing and managing climate-related risks.
- Ensure the integration of climate-related risks into overall risk management.

Metrics and Targets

- Select greenhouse gases emissions and non-emissions metrics to assess scheme assets against climate-related risks and opportunities.
- Obtain the Scope 1/2/3 emissions and other data to calculate the selected metrics
- Set a target to manage climate-related risk with the chosen metrics and measure performance against this target.

Cost transparency

A voluntary LGPS Code of Transparency into investment management fees and cost was developed and approved by the Scheme Advisory Board (SAB). Code was introduced to assist LGPS clients gather cost information in a consistent format.

Fund managers across the LGPS universe are encouraged to sign up to this Code to demonstrate their commitment to transparent reporting of costs. A full list of current signatories to the code are available to view on the SAB website [SAB Manager List](#).

The Financial Conduct Authority (FCA) aim is to see a more consistent and standardised disclosure of costs and charges for institutional investors. The Cost Transparency Initiative (CTI) framework is used to report costs and charges and

help assess value for money of any investments. It is compatible with Markets in Financial Instrument Directive (MiFID II) and can be used by Defined Benefit and Defined Contribution schemes.

There are three different templates:

1. The User Summary, which can be used by schemes and advisors to provide a summary of key information across all investments.
2. The Account Template, which is the main cost disclosure template to be completed by the investment manager(s) and covers the majority of assets and product types.
3. The Private Equity Sub-template, which is to be completed by investment managers of closed-ended private equity funds.

The templates provide information on three main categories of investment cost: management fees, performance fees and transaction costs.

The Compliance System

As part of the Code, investment managers are required to complete and submit the template for the relevant mandate (without request) to their LGPS clients on either an annual or quarterly basis as agreed with their client. In order to streamline the process and make it more widely available, the SAB procured a system from Byhiras which will take the form of online facility intended to:

- Be capable of accepting and storing template data
- Check the timeliness of data submission and report late returns
- Ensure that template data is signed off by managers as 'fair, clear and not misleading'
- Provide a check against the MiFID II total cost amount submitted separately by managers to their LGPS clients

As well as ensuring compliance with the Code the system could be used by LGPS clients to:

- Replace the existing excel format templates provided to them by managers
- View a useful but limited set of onscreen reporting and comparison tools
- Give permission to other LGPS clients or trusted third parties (e.g. their investment advisor) to access and export their template data
- Provide advanced reporting facilities under a phase 2 development subject to the agreement of Code clients.

The template data held within the compliance system will be separate from any other database held by Byhiras and cannot be shared by Byhiras with any third parties for any purpose.

The Fund has been in contact with its fund manager to gather the cost transparency data. The Fund asset managers who are listed as signatories on the SAB website and whether their templates have been uploaded to Byhiras website can be seen in the following table for the reporting period ending 31 March 2023:

Fund Manager	Signatory on SAB website	Template uploaded to Byhiras portal	CTI Main Account Template	CTI Private Equity Template
Barings (liquidation)	✓	X	x	-
CBRE	✓	x	✓	-
Cheyne Capital	x	x	✓	-
KGAL *	x	x	x	-
LGIM	✓	✓	✓	-
London LGPS CIV Ltd	✓	x	x	-
Longview	✓	✓	✓	-
Payden and Rygel	✓	x	✓	-
Schroders	✓	✓	✓	-
Arcmont	x	x	-	✓
Brightwood	x	x	-	x
Fiera	x	x	-	x
HarbourVest *	✓	✓	-	x
Permira	✓	x	-	✓

* Fiera, HarbourVest and KGAL provide the information required in their own template, fees deducted from NAV are included within the accounts.

User reports from the Byhiras website are available which summarise the transaction costs, management fees and performance fees/returns. As can be seen from the table above not all fund managers have uploaded data to the website and the summary user reports do not include all of the managers, in particular the Private Equity templates, therefore extracting data from the user summary reports is not comprehensive to include in this report.

Where CTI reports have been received the Fund has included the costs in the Statement of Accounts.

Fund Value

Overall, the Fund's net asset value has decreased by £10m to £1.7 Bn during the year.

When dealing with members the Fund is cash flow negative.

The Pensions Committee have adapted the investment strategy by investing in income generating assets and continually review the approach.

Pension Fund Cash Flow Forecast

	2022/23 Actual £000	2023/24 Forecast £000	2024/25 Forecast £000	2025/26 Forecast £000
Opening cash / deposit balances	15,039	11,658	10,224	10,569
Contributions	38,361	39,658	40,658	41,539
Transfers in	7,045	3,989	3,147	3,147
Receipts from money market funds	24,278	22,300	29,700	33,400
Other Inflow	158	105	-	-
Total inflow	69,842	66,052	73,505	78,086
Pension Benefits	(48,915)	(50,680)	(56,660)	(60,000)
Management expenses and other payments	(2,429)	(929)	(2,400)	(3,600)
Lump sums and refunds	(17,600)	(14,177)	(14,400)	(14,400)
Money market fund deposit	(20,600)	(20,000)	(30,000)	(30,000)
Total outflow	(89,544)	(85,786)	(103,460)	(108,000)
Custodian cash withdrawal	20,000	20,000	30,000	30,000
Net money market movements	(3,678)	(1,700)	300	(3,400)
Closing cash balance	11,659	10,224	10,569	7,255

This table does not include the cash held with the custodian, which includes any divestments and income received.

The table largely concentrates on operating cash flows eg, contributions received, paying the benefits, retirement grants and management expenses of the Fund. The investment redemption assumptions are solely for the purpose of ensuring the operating cash flow remains positive and will be in the form of investment income redemption.

The Fund will likely require investment redemptions from the custodian to pay capital calls that are required throughout the period, this will be in the form of income receipts.

Investment Performance

Strategic Asset Allocation (SAA)

The long term funding objective of the Fund is to become fully funded within the agreed deficit recovery period of 16 years. The SAA has been designed to meet this objective, whilst ensuring sufficient resources are available to meet liabilities as they fall due and employer contributions are kept as stable as possible.

The table below shows the current strategic asset allocation which was agreed by Committee in July 2022 and the actual allocation of assets at year end.

	Current Allocation	Current SAA	Control Ranges
Public Equities – Active & Passive	56%	50%	43% - 57%
Private Equities	5%	10%	3% - 12%
Infrastructure/Agriculture	5%	5%	4% - 6%
Commercial Property	11%	10%	8% - 12%
Social Housing	4%	5%	4% - 6%
Private Credit	9%	7.5%	5% - 9%
Corporate Bonds	6%	7.5%	5% - 9%
Index-linked Bonds	0%	5%	4% - 6%
Protection (equity & currency)	3%	0%	0% - 5%
Cash	1%	0%	0% - 3%

The SAA is reflected in the Investment Strategy Statement (ISS) and Funding Strategy Statement (FSS). Compliance with the ISS is monitored regularly and reported quarterly to the Committee. Management's view is that the variances to the SAA will come back in line following implementation of the investment strategy. They are not significant and pose no additional risk to the Fund over and above what the ISS allows.

Investment Performance

The Fund's invested assets closed the year at £1.7Bn, the Fund's performance of 0.44% underperformed against the benchmark return of 4.09%. Details of how individual managers and asset classes have performed are included in the next section. Information on investment performance is provided by the Fund's custodian, Northern Trust.

PIRC LGPS Universe performance results 2022/23 were provided in July 2023. LGPS Funds returned an average of -1.6% for the year, there are timing differences between the PIRC universe and the investment advisor reporting.

The chart below shows the investment performance history

Barnett Waddingham advise the Pension Committee on the Fund's strategic asset allocation and assist in the monitoring of the investment managers. The purpose of this report is to review the economic environment over the 12 months to 31 March 2023, as well as to briefly analyse how the Fund's investment managers performed over the period. The data in this report has been sourced from the Fund's custodian, Northern Trust, and the Fund's investment managers.

Economic Environment

The 12-month period to 31 March 2023 began with inflation in the developed world at its highest rate in several decades. Inflation had risen over 2021 as the global economy reopened following the COVID pandemic. However, just as inflation appeared to be peaking, the Russian invasion of Ukraine in February 2022 provided a secondary inflationary impulse to the economy. The rest of the period to 31 March 2023 was therefore dominated by rising inflation, central banks raising interest rates in an attempt to bring inflation under control, and elevated volatility as markets struggled to adjust to higher interest rates. These factors resulted in most asset classes producing deeply negative returns over the year.

Following the Russian invasion of Ukraine in February 2022, western governments responded to the invasion by imposing sanctions on Russia and their ally, Belarus. This included sanctions on the Russian financial system, including restrictions on trading Russian government bonds. However, the bigger impact on global markets came through commodity prices, particularly natural gas, as both sides gradually introduced measures to reduce the supply of Russian gas to Europe. Natural gas prices rose to an all-time high and would remain highly elevated in Europe throughout the middle of the year as gas was stockpiled for winter. However, the end of the stockpiling period and a relatively warm winter helped natural gas prices to fall nearly 60% over the final quarter of 2022.

US CPI inflation peaked in June 2022 at 9.1%, before falling to 5.0% in March 2023 as supply chain disruption and pandemic stimulus measures passed through the system. However, European gas prices meant that UK and EU inflation reached a higher and later peak in October 2022, with UK CPI inflation reaching 11.1% and Eurozone inflation reaching 10.6%. This high level of inflation forced central banks to raise interest rates at the fastest pace for several decades and reduce or reverse asset purchase programs. From May 2022, central banks started to step up the pace of rate rises from 0.25% increments to 0.5% or 0.75% increments at each meeting. By the end of 2022, interest rates had reached 3.5% (Bank of England), 4.25-4.50% (Federal Reserve) and 2.5% (ECB), their highest levels since total Financial Crisis. The scale and pace of the rate rises enacted by central banks contributed to significant disruption across markets, including a UK gilt crisis in 2022 and a banking crisis in 2023, and this led to central banks looking to slow the pace of rate rises to limit further disruption.

Rising inflation and interest rates resulted in rising government bond yields across the world. The pace of the rise was steep with UK 15-year nominal gilt yields rising from 1.15% on 31 December 2021 to 3.16% on 31 August 2022, broadly in line with other developed market government bonds. However, on 23 September, the new UK government produced a fiscal statement that significantly increased borrowing. This contributed to a further sharp rise in gilt yields. 15-year gilt yields spiked as high as 4.9% on the morning of 28 September. The speed and scale of this rise in long-term gilt yields was far larger than at any time since the early 1970's and later that day the Bank of England stepped into calm markets. It announced that it would purchase up to £65bn of long dated gilts. Purchases were later extended to include index-linked gilts and increase the maximum daily purchase limit, although only around £19bn of total purchases were made. This intervention, alongside the replacement of Liz Truss as Prime Minister by Rishi Sunak, calmed markets and by 23 November 15-year yields had fallen back to 3.28%. The Bank of England was therefore also able to sell the gilts purchased during this intervention back into the market, selling the final gilts in the first week of 2023.

In March 2023 two US banks, Silicon Valley Bank and Signature Bank, failed with the US government having to step in to guarantee deposits. These were the first failures of a large

US bank since 2008. The failure of Silicon Valley Bank in particular was closely tied to its inability to adjust to the swift rise in central bank interest rates. The failures caused wider disruption in banking markets that spread to Credit Suisse, which had been suffering from falling deposits for some time. This required the Swiss government to step in and arrange for UBS to purchase Credit Suisse. By the end of the quarter the disruption had subsided, and the overall market impact was limited outside the banking sector.

Over the year, all major central banks tightened monetary policy as economies recovered to pre-pandemic levels and inflation rose far above target.

- The Bank of England (BoE) raised the base rate from 0.75% to 4.25% over the year. In November 2022 began to actively sell down its stock of bonds. After the BoE's intervention in September and October, it was able to sell all the gilts it had bought during that period by the first week of 2023.
- The Federal Reserve (The Fed) raised the Federal Funds Rate range from 0.75%-1.00% at the beginning of the year to 4.75%-5.00% in March 2023. The Fed began the process of reducing its balance sheet in June 2022 as it announced that the proceeds from its US Treasury holdings would no longer be reinvested below a monthly cap of \$30bn from June to August and \$60bn after that.
- The European Central Bank (ECB) raised its main lending rate from 0.0% to 3.5% over the year to 31 March 2023. The ECB decided to end its Asset Purchase Programme (APP) effective from 1 July 2022 and to cease reinvestment of the proceeds from the APP assets in March 2023 at a rate of €15 billion per month.

Equities

Against this backdrop, the 12 months to 31 March 2023 saw negative returns across almost all asset classes.

Overall, global equities produced negative total returns over the year to 31 March 2023, falling by 5.0% in local currency terms. The best performing region, in local currency terms, was Europe (+5.2%), and the worst performing region was North America (-8.2%).

Regional Equity returns in the 12 months to 31 March 2023

Legal & General passive ESG equity

The Fund currently invests its passive equity holdings in the LGIM Paris Aligned equity fund and their Future World Emerging Markets equity fund. Both of these funds are index-tracking (i.e. not actively managed).

The LGIM Future World Emerging Markets Equity Index Fund invests wholly or predominantly in shares that make up the Solactive L&G ESG Emerging Markets Index. The objective of the fund is to produce a return that is consistent with this index.

The Emerging Market Equity Fund has returned -3.7% over the period since March 2022, outperforming the LGIM Future World Emerging Market by 0.1%.

Similarly, the LGIM ESG Paris Aligned World Equity Index Fund operates by purchasing shares to produce a return that is consistent with the Solactive L&G Developed Markets Paris Aligned ESG SDG Index. Over the period since March 2022 the fund has returned -0.5% outperforming the benchmark by 0.3%.

LCIV Global Equity Focus Fund (Longview)

The Fund's investment in the Longview active equity fund moved to the LCIV platform in the fourth quarter of 2022.

This fund is actively managed and seeks to generate returns in excess of its benchmark (MSCI World). Longview delivered a return of 5.7% over the year to 31 March 2023 outperforming the benchmark by 6.7%. The fund is now 0.2% p.a. behind its benchmark since the fund's inception on the platform in 2017. Around 81% of the assets with Longview were invested in North American Equities, with outperformance over the long term predominantly driven by stock selection.

Bonds

Over the year to 31 March 2023, UK gilt yields rose significantly across all maturities. UK fixed interest gilts (all stocks) produced very deep negative returns (-16.3%) and UK index-linked gilts (all stocks) delivered even deeper negative returns (-26.7%) as implied inflation fell over the year. UK corporate bond spreads (all stocks) widened significantly (0.4%) over the year.

20 Year Gilt Yields over the 12 Months to 31 March 2023

LCIV Global Bond Fund (PIMCO)

The Fund's investment in the PIMCO Global Bond Fund moved to the LCIV platform in the second quarter of 2022.

The PIMCO fund is actively managed and aims to generate a return above its benchmark, the Bloomberg Global aggregate (GBP Hedged) Index. Over the period the fund has produced returns of -6.9% similar to the benchmark over the period.

Legal & General index linked gilts

Around 5% of the Fund's assets were invested in Legal & General's Under 15 Year Index-Linked Gilts Index Fund, which performed in line with its benchmark, returning -6.7% over the period.

Payden & Rygel Absolute Return Bonds

The Payden & Rygel Absolute Return Bond Fund produced positive returns of 0.4% over the 12-month period, underperforming its benchmark by 1.9%. Since the inception date in 2019, the fund has returned 0.3%, this is an underperformance of 0.5% where the benchmark is based on the one-month cash rate (SONIA).

Alternatives

CBRE property

The MSCI UK All Property Index fell by 13.0% over the 12 months to 31 March 2023. The Fund's assets are invested in UK and global property Funds. The UK Fund seeks to outperform the AREF/IPD UK QPFI All Balanced Property Fund Index by 0.75% p.a. (net of fees) over rolling three-year periods, whilst the Global Fund has an objective of between 9% p.a. and 11% p.a. over rolling three-year periods. The combined portfolio returned -4.0% over the 12 months to 31 March 2023.

Cheyne Capital Property

The Cheyne Capital Management Social Property Impact Fund invests across four investments including social housing. The fund targets a return of 6.0% p.a. and produced a return of 4.4% over the 12-month period to 31 March 2023. Since the inception date the fund has returned 0.5% p.a.

Harbourvest Private Equity

Harbourvest seek to generate returns on the Fund's assets by investing in private equity funds which, in turn, invest in unlisted companies.

Performance over the 12 months to 31 March 2023 was 4.9%, underperforming its benchmark return of 17.5% (Retail Price Index Inflation + 4%). The long-term return has been strong with the fund returning 12.3% p.a. since inception, around 4.2% p.a. ahead of the benchmark of inflation + 4% p.a.

Private debt (Permira, Arcmont & Brightwood)

The private debt portfolio is split between Permira, Arcmont and Brightwood. Each manager takes a different approach and access broadly different parts of the private debt market, diversifying the Fund's portfolio. These funds are closed ended in nature (i.e. cannot be sold until they mature) and are still in the relatively early stages of their development.

All three funds are assessed against a benchmark of 7% p.a. over the lifetime of the funds. The Brightwood holding outperformed this benchmark over the year to 31 March 2023 returning 13.6%. The Arcmont and Permira holdings both underperformed the benchmark returning 4.5% and 3.8% over the year to 31 March 2023, respectively.

Real alternatives (Fiera & KGAL)

The real alternatives portfolio was valued at £94.2m at 31 March 2023. It is split between the Fiera Agriculture fund, Fiera Infrastructure fund and KGAL. The funds have a target return of 6-8% p.a. net of fees. In the fourth quarter of 2022, the holdings with Fiera, along with the Fiera property holdings within the CBRE property mandate, were moved into a single holding, the Fiera Real Assets Fund. The performance below is still given as separate figures for each fund.

Performance for the portfolio over the year to 31 March 2023 was 10.5%. The Fiera agriculture fund outperformed its benchmark over the year returning 9.8% while the infrastructure fund returned 2.9%, underperforming its benchmark by -3.1%. The KGAL Capital fund significantly outperformed its 7% target by 21.1%, returning 28.1% over the year. Performance since the fund's inception in 2018 is also strong, with a return of 9.8%.

Asset allocation

The change in allocation over the period is shown the chart below.

Asset Allocation over the 12 Months to 31 March 2023

Actuarial Statement 2022/23

Introduction

The last full triennial valuation of the London Borough of Newham Pension Fund (the Fund) was carried out as at 31 March 2022 as required under Regulation 62 of the Local Government Pension Scheme Regulations 2013 (the Regulations) and in accordance with the Funding Strategy Statement of the Fund. The results were published in the triennial valuation report dated 31 March 2023.

Asset value and funding level

The results for the Fund at 31 March 2022 were as follows:

The smoothed value of the Fund's assets for funding purposes as at 31 March 2022 was £1,675m.

The Fund had a funding level of 100% i.e. the value of assets for funding purposes was 100% of the value that they would have needed to be to pay for the benefits accrued to that date, based on the assumptions used. This corresponded to a surplus of £4m.

Contribution rates

The employer contribution rates, in addition to those paid by the members of the Fund, are set to be sufficient to meet the annual accrual of benefits allowing for future pay increases and increases to pensions in payment when these fall due plus an amount to reflect each participating employer's notional share of the Fund's assets compared with 100% of their liabilities in the Fund, in respect of service to the valuation date.

The primary rate of contribution on a whole Fund level was 18.4% of payroll p.a. The primary rate as defined by Regulation 62(5) is the employer's share of the cost of benefits accruing in each of the three years beginning 1 April 2023.

In addition, each employer pays a secondary contribution as required under Regulation 62(7) that when combined with the primary rate results in the minimum total contributions. This secondary rate is based on their particular circumstances and so individual adjustments are made for each employer.

Details of each employer's contribution rate are contained in the Rates and Adjustments Certificate in the triennial valuation report.

Assumptions

The key assumptions used to value the liabilities at 31 March 2022 are summarised below:

Assumptions	Assumptions used for the 2022 valuation
Financial assumptions	
Market date	31 March 2022
CPI inflation	2.9% p.a.
Long-term salary increases	3.9% p.a.
Discount rate	4.7% p.a.
Demographic assumptions	
Post-retirement mortality	
<i>Base tables – members (M/F)</i>	100% / 100% of S3 heavy tables
<i>Base tables – dependants (M/F)</i>	120% / 95% of S3DA tables
<i>Projection model</i>	CMI 2021
<i>Long-term rate of improvement</i>	1.25% p.a.
<i>Smoothing parameter</i>	7.0
<i>Initial addition to improvements</i>	0% p.a.
<i>2020/21 weighting parameter</i>	5%

Full details of the demographic and other assumptions adopted as well as details of the derivation of the financial assumptions used can be found in the 2022 valuation report.

Updated position since the 2022 valuation

Assets

Returns over the year to 31 March 2023 have been lower than assumed at the 2022 valuation. As at 31 March 2023, in market value terms, the Fund assets were less than they were projected to be at the previous valuation.

Liabilities

The key assumption which has the greatest impact on the valuation of liabilities is the real discount rate (the discount rate relative to CPI inflation) – the higher the real discount rate the lower the value of liabilities. As at 31 March 2023, the real discount rate is estimated to be higher than at the 2022 valuation due to a reduction in the long term rate of inflation.

The 2023 pension increase order is 10.1%. The increase in liabilities associated with this has however been broadly offset by the reduction in the long-term inflation assumption. This short-term high inflation and longer term lower inflation is broadly consistent with what was assumed at the 2022 formal valuation.

0

Overall position

On balance, we estimate that the funding position has weakened when compared on a consistent basis to 31 March 2022.

The change in the real discount rate since 31 March 2022 will place a lower value on the cost of future accrual which results in a lower primary contribution rate. The impact on secondary contributions will vary by employer.

However, the next formal valuation will be carried out as at 31 March 2025 with new contribution rates set from 1 April 2026. As part of the 2025 valuation, the Fund and us as the Fund Actuary will work together in setting the assumptions for the valuation.

Partner, Barnett Waddingham LLP

Scheme Administration Report 2022/23

Overview

During 2022-23 LPPA completed a significant change programme to implement a new pension administration system. This also involved rationalising other historic systems and moving to a new operating platform.

The reason for this decision was to partner with a supplier who had a technology roadmap aligned to our own. This was the most transformational activity LPPA had undertaken and understandably resulted in challenges. The transition from the old system to the new platform was carried out over a phased basis.

Some of the challenges were pre-empted and resulted in relaxing SLAs with partners during the implementation.

Casework SLA Performance

Casework performance was impacted by the final Phase 2 Pace migration, and this migration contained the largest number of clients in a single go live (5 clients). The spikes in work created by the migrations adversely impacts performance. Relaxed SLAs applied through to the end of January to support Pace transition.

Casework performance measures to the end of Q3 from UPM were not directly comparable with how they were measured from the previous system and were in excess of contractual obligations. Significant activity has taken place to ensure that we can measure performance in line with contractual obligations. The Q4 performance report is now measuring performance in line with contractual obligations.

Satisfaction Scores

Helpdesk satisfaction scores has reduced slightly during the period. At the end of Q3, satisfaction was 80%, at the end of Q4 satisfaction was 78%.

Retirement satisfaction scores remained the same during the period. At the end of Q3, satisfaction was 64%, at the end of Q4 satisfaction was also 64%. Satisfaction scores have been impacted by the phase 2 migrations and spikes in work which we currently have plans in place to work through.

Pensions Helpdesk

Helpdesk performance for the period has seen average wait times remain slightly higher, average 9 minutes, than our non-contractual target of 4 minutes. In January the average wait peaked at 10 minutes as performance was adversely impacted by higher call volumes at the start of the month, driving up average wait times.

Summary of Activities undertaken by LPPA during the year

LPPA manage all aspects of the Fund administration including the following key functions:

- Processing new members of the scheme
- Dealing with requests from members who wish to transfer their pension into or out of Newham's Fund
- Administering death benefits for scheme members
- Bringing pensions into payment on retirement or early retirement
- Providing estimates for members/employers
- Assisting members who wish to increase their pension provision through AVCs or APCs
- Processing leavers with a refund of contributions or deferred benefits
- Maintaining accurate records with changes to members' details

- Reviewing and monitoring third tier ill-health retirements
- Utilising information technology to improve service standards and efficiency
- Ensuring continual data cleansing in preparation for the next scheme valuation
- Continually reviewing all processes to improve the customer experience

The LPPA engagement team manage communications and training for Scheme employers and pension scheme members.

Summary of Activities undertaken by Newham during the year

The Newham finance and administration team is responsible for:

- Monitoring, reviewing and updating Scheme governance in line with relevant regulations and guidance
- Monitoring, reviewing and updating pension fund policies
- Monitoring and recording contributions for bodies
- Admission, Monitoring and Cessation of scheme employers
- Reviewing risk profiles of scheme employers

Fund Membership

The Fund contracts out its benefits administration to LPPA, a wholly owned subsidiary of the LPFA and Lancashire Pension Fund in accordance with the council's best value arrangements. The contract is managed and monitored for gathering assurance over the effective and efficient delivery of these operations by oneSource Exchequer and Transactional Services.

LPPA continue to maintain pension scheme membership records and provide advice, benefits calculations and estimates.

Membership statistics 2018 – 2023

LPGS 2013 (as amended)

The LGPS regulations 2013 came into effect on 1 April 2014. The key changes under the new scheme are set out in the table below:

	LGPS 2008	LGPS 2013
Basis of Pension	Final Salary	Career Average Revalued Earnings (CARE)
Accrual Rate	1/60 th	1/49 th
Revaluation Rate	Based on Final Salary	Consumer Prices Index (CPI)
Pensionable Pay	Pay <u>excluding</u> non-contractual overtime and non-pensionable additional hours	Pay <u>including</u> non-contractual overtime and additional hours for part time staff
Contribution Flexibility	No	Yes – 50:50 option where members pay 50% contributions for 50% of the pension benefit
Normal Pension Age	65	Linked to the State Pension Age
Lump Sum Trade Off	Trade £1 of pension for £12 lump sum	No change - trade £1 of pension for £12 lump sum
Death in Service Lump Sum	3 x Pensionable Pay	No change - 3 x Pensionable Pay
Indexation of Pension in Payment	CPI (RPI for pre-2011 increases)	CPI

Employee Contribution Table 2022/23

Employee contribution rates are tiered as shown in the table below and contribution rates for part time members are based on actual pensionable pay, rather than full time equivalent pay. The 50:50 Scheme provides contribution flexibility for members. For more information about member benefits, changes to the scheme and the impact of the changes on your pension, please see www.yourpension.org.uk/newham or contact LPPA.

Salary Band £	Employee Contribution rate	
	Main Section	50/50 Section
0 – 15,000	5.5%	2.75%
15,001 – 23,600	5.8%	2.90%

170,101 or more	12.5%	6.25%

Financial Statements

Statement of Responsibilities

The Authority's Responsibilities

The Authority is required:

- To make arrangements for the proper administration of its financial affairs and to secure that one of its officers has the responsibility for the administration of those affairs. In this authority, that officer is the Corporate Director of Resources.
- To manage its affairs to secure economic, efficient and effective use of resources and to safeguard its assets; and
- To approve the Newham Pension Fund Accounts.

The Responsibilities of the Corporate Director of Resources

The Corporate Director of Resources is responsible for the preparation of the Authority's Pension Fund Accounts which, in terms of the CIPFA Code of Practice on Local Authority Accounting in the United Kingdom is required to present fairly the financial position of the Pension Fund at the accounting date and its income and expenditure for the year ended 31 March 2023.

In preparing the Pension Fund Accounts, the Corporate Director of Resources has:

- Selected suitable accounting policies and then applied them consistently;
- Made judgements and estimates that were reasonable and prudent; and
- Complied with the Code of Practice.

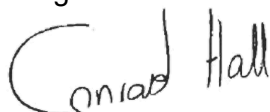

The Corporate Director of Resources has also:

- Kept proper accounting records which were up to date; and
- Taken reasonable steps for the prevention and detection of fraud and other irregularities.

In accordance with the Accounts and Audit Regulations 2016, I certify that the Accounts set out on pages 60 to 92 of the Annual Pension Report present a true and fair view of the financial position of the Fund at 31st March 2023 and its income and expenditure for the year ended 31st March 2023.

Corporate Director of Resources

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF LONDON BOROUGH OF NEWHAM ON THE PENSION FUND'S FINANCIAL STATEMENTS

Opinion

We have audited the Pension Fund ("the Fund") financial statements for the year ended 31 March 2023 under the Local Audit and Accountability Act 2014 (as amended). The pension fund financial statements comprise the 2022/23 Fund Accounts, the Net Assets Statement and the related notes 1 to 23.

The financial reporting framework that has been applied in their preparation is applicable law and the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2022/23.

In our opinion the pension fund financial statements:

- give a true and fair view of the financial transactions of the Fund during the year ended 31 March 2023 and the amount and disposition at that date of its assets and liabilities, other than liabilities to pay pensions and other benefits after the end of the scheme year; and
- have been properly prepared in accordance with the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2022/23.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report below. We are independent of the Council as administering authority for the Pension Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard and the Comptroller and Auditor General's AGN01, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Corporate Director of Resources' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the authority's ability to continue as a going concern for a period of twelve months from when the Fund's financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Corporate Director of Resources with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the authority's ability to continue as a going concern.

Other information

The other information comprises the information included in the Statement of Accounts 2022/23, other than the financial statements and our auditor's report thereon. The Corporate Director of Resources is responsible for the other information contained within the Statement of Accounts 2022/23.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Matters on which we report by exception

We report to you if:

- we issue a report in the public interest under section 24 of the Local Audit and Accountability Act 2014 (as amended);
- we make written recommendations to the audited body under Section 24 of the Local Audit and Accountability Act 2014 (as amended);
- we make an application to the court for a declaration that an item of account is contrary to law under Section 28 of the Local Audit and Accountability Act 2014 (as amended);
- we issue an advisory notice under Section 29 of the Local Audit and Accountability Act 2014 (as amended); or
- we make an application for judicial review under Section 31 of the Local Audit and Accountability Act 2014 (as amended).

We have nothing to report in these respects.

Responsibility of the Corporate Director of Resources

As explained more fully in the Statement of the Corporate Director of Resources' Responsibilities set out on page 7, the Corporate Director of Resources is responsible for the preparation of the Council's Statement of Accounts, which includes the pension fund financial statements, in accordance with proper practices as set out in the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2022/23, and for being satisfied that they give a true and fair view. The Corporate Director of Resources is also responsible for such internal control as the Corporate Director of Resources determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Corporate Director of Resources is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Administering Authority either intends to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with Corporate Director of Resources.

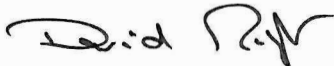

Our approach was as follows:

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Fund and determined that the most significant are the Local Government Pension Scheme Regulations 2013 (as amended), and The Public Service Pensions Act 2013.
- We understood how the Fund is complying with those frameworks by making enquiries of the management. We corroborated this through our reading of the Pension Board minutes, through enquiry of employees to confirm Pension policies, and through the inspection of employee handbooks and other information.
- Based on this understanding, we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved making enquiries of the management for their awareness of any non-compliance of laws or regulations, inspecting correspondence with the Pensions Regulator and review of minutes.
- We assessed the susceptibility of the Fund's financial statements to material misstatement, including how fraud might occur by considering the key risks impacting the financial statements and documenting the controls that the Fund has established to address risks identified, or that otherwise seek to prevent, deter or detect fraud.
- In common with all audits under ISAs (UK), we are also required to perform specific procedures to respond to the risk of management override. In addressing the risk of fraud through management override of controls, we tested the appropriateness of journal entries and other adjustments; assessed whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluated the business rationale of any identified significant transactions that were unusual or outside the normal course of business. These procedures were designed to provide reasonable assurance that the financial statements were free from fraud or error.
- The Fund is required to comply with The Local Government Pensions Scheme regulations, other legislation relevant to the governance and administration of the Local Government Pension Scheme and requirements imposed by the Pension Regulator in relation to the Local Government Pension Scheme. As such, we have considered the experience and expertise of the engagement team including the use of specialists where appropriate, to ensure that the team had an appropriate understanding of the relevant pensions regulations to assess the control environment and consider compliance of the Fund with these regulations as part of our audit procedures.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Use of our report

This report is made solely to the members of London Borough of Newham, as a body, in accordance with Part 5 of the Local Audit and Accountability Act 2014 (as amended) and for no other purpose, as set out in paragraph 43 of the Statement of Responsibilities of Auditors and Audited Bodies published by Public Sector Audit Appointments Limited. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the London Borough of Newham and its members as a body, for our audit work, for this report, or for the opinions we have formed.

Notes to the Pension Fund Accounts

Note 1: Description of Fund

The London Borough of Newham Pension Fund ('the Fund') is part of the Local Government Pension Scheme (LGPS) and is administered by the London Borough of Newham (LBN). The Local Authority is the reporting entity for this Fund.

The following description of the Fund is a summary only, for more detail reference should be made to the Fund's Annual Report 2022/23.

a) General

The Fund is governed by the Public Service Pensions Act 2013. The Fund is administered in accordance with the following secondary legislation:

- [The Local Government Pension Scheme Regulations 2013 \(as amended\)](#)
- [The Local Government Pension Scheme \(Transitional Provisions, Savings and Amendment\) Regulations 2014 \(as amended\)](#)
- [The Local Government Pension Scheme \(Management and Investment of Funds\) Regulations 2016.](#)

It is a contributory defined benefit pension scheme administered by the LBN to provide pensions and other benefits for pensionable employees of LBN and a range of other scheduled and admitted bodies within the borough. Teachers are not members as they are included within other national pension schemes.

The Fund is overseen by the Committee, of LBN supported by the Local Pension Board ('the Board') and day to day operations have been delegated to the Statutory Section 151 officer.

b) Membership

Membership of the LGPS is voluntary and employees are free to choose whether to join or remain in the scheme, or to make personal arrangements outside the scheme.

Organisations participating in the Fund include:

- Scheduled bodies, which automatically entitled to be members of the Fund.
- Admitted bodies, which are other organisations that participate in the Fund under an admission agreement between the Fund and the relevant organisation. Admitted bodies include voluntary, charitable and similar bodies or private contractors undertaking a local authority function following outsourcing to the private sector.

31 March 2022	Membership	31 March 2023
52	Number of employers with active members	54
NUMBER OF EMPLOYEES IN SCHEME		
5,979	London Borough of Newham	5,811
3,703	Other employers	3,949
9,682	Total	9,760
NUMBER OF PENSIONERS		
7,543	London Borough of Newham	7,635
572	Other employers	679
8,115	Total	8,314
NUMBER OF DEFERRED MEMBERS		
10,121	London Borough of Newham	10,223
2,225	Other employers	2,418
12,346	Total	12,641
30,143		30,715

c) Funding

Benefits are funded by contributions and investment earnings. Contributions are made by active members of the Fund in accordance with [The LGPS Regulations 2013](#) and range from 5.5% to 12.5% of pensionable pay for the financial year ending 31 March 2023. Employee contributions are matched by employers contributions which are set based on triennial actuarial funding valuations. The last full valuation of the Fund was at 31 March 2022, employer contribution rates range from 10% to 26.2% of pensionable pay, the average employer primary rate is 18.4%. <https://www.newham.gov.uk/downloads/file/5992/newh-2022-valuation-report-v1>

A secondary contribution rate (previously known as deficit amount or past service adjustment) may also be charged. This rate is either paid as a monetary value or as an additional percentage of pensionable pay.

d) Benefits

Prior to 1 April 2014, pension benefits under the LGPS were based on final pensionable pay and length of pensionable service.

	Service pre 1 April 2008	Service post 31 March 2008
Pension	Each year worked is worth 1/80 x final pensionable salary	Each year worked is worth 1/60 x final pensionable salary
Lump sum	Automatic lump sum of 3 x pension. In addition, part of the annual pension can be exchanged for a one-off tax-free cash payment. A lump sum of £12 is paid for each £1 of pension given up.	No automatic lump sum. Part of the annual pension can be exchanged for a one-off tax-free cash payment. A lump sum of £12 is paid for each £1 of pension given up

From 1 April 2014, the scheme became a career average scheme, whereby members accrue benefits based on their pensionable pay in that year at an accrual rate of 1/49th. Accrued pension is uprated annually in line with the Consumer Prices Index.

There are a range of other benefits provided including early retirement, disability pensions and

death benefits. For more details, please refer to the Fund's scheme handbook available from <http://www.yourpension.org.uk/handr/Newham-Publications.aspx>.

Note 2: Basis of Preparation

The Statement of Accounts summarises the Fund's transactions for the 2022/23 financial year and its year-end position as at 31 March 2023. The accounts have been prepared in accordance with the [Code of Practice on Local Authority Accounting in the United Kingdom 2022/23](#) ("the code") which is based upon International Financial Reporting Standards (IFRS), as amended for the UK public sector, and Guidance on Investment Valuations issued by the Pensions Research Accountants Group (PRAG).

Paragraph 3.3.1.2 of the Code requires disclosure of any accounting standards issued but not yet adopted. No such accounting standards have been identified for 2022/23 by the Fund.

The accounts report on the net assets available to pay pension benefits. The accounts do not take account of obligations to pay pensions and benefits which fall due after the end of the financial year, nor do they take account of the actuarial present value of promised retirement benefits. The Code gives administering authorities the option to disclose this information in the net assets statement, in the notes to the accounts or by appending an actuarial report prepared for this purpose (see [Note 18](#)).

GOING CONCERN STATEMENT

Management's assessment of the entity's ability to continue as a going concern.

The LGPS is a statutory defined benefit scheme and is effectively guaranteed by Government. It operates on a funded basis, which means that contributions from employees and employers are paid into a fund which is then invested, from which pension benefits are paid as they fall due.

The Fund reduces investment risk by diversifying its investments across a number of different types of global assets; these include shares; equities; property; government bonds and company bonds; infrastructure; and private debt. This diversification means that not all assets are affected by economic events.

The Committee reviewed its Environmental, Social and Governance Policy (ESG) in March 2023, strengthening the Funds commitment to invest responsibly and manage climate risk. The Committee has taken the view that well run companies perform better over the long term.

From time to time the Fund experiences economic downturns and a long-term view must be taken of investment returns. For this reason the actuary carries out a smoothing exercise when assessing the valuation of the Fund's assets.

The concept of a going concern assumes that the Fund functions and services will continue in operational existence for the foreseeable future. LGPS Regulations remain in force with no expectation of any plans to wind up the Fund or the LGPS. The Fund continues to operate as usual.

In carrying out its assessment that this basis is appropriate, made for the going concern period to 31 March 2026.

What is the process management followed to make its assessment?

The one year investment returns for 2022/23 was 0.44% underperformed against the benchmark return of 4.09%. Asset values have decreased by £10m over the year to 31 March 2023, however from time to time the Fund experiences economic downturns and a long-term view must be taken of

investment returns. There is sufficient flexibility in the investment strategy to be able to respond to short term market fluctuations. The Fund is comparatively low risk with smaller proportion of its assets held in volatile equities.

The Fund held cash of £61m at the Balance Sheet date, equivalent to 3.5% of the Fund Assets. In addition, the Fund held £1.2b in Level 1 and Level 2 investment assets which could be realised within 3 months if required. Based upon review of its operational cash flow projections the Fund is satisfied it has sufficient cash to meet its obligations to pay pensions, for at least 12 months from the date of authorisation of these accounts, without the need to sell any of these investments.

In line with statutory requirements the Fund undertakes a valuation every three years to determine the ratio of the Funds' assets to its liabilities. This funding position is a summary statistic often quoted to give an indication of the health of the Fund. The Fund's triennial valuation at 31 March 2022 reported that the Fund had sufficient assets to cover 100% of the accrued liabilities as it is fully funded.

The purpose of the valuation is to review the current funding strategy and ensure the Fund has a contribution plan and investment strategy in place that will enable it to pay members' benefits as they fall due.

Actuarial revaluations are used to set future contribution rates and underpin the Fund's most significant investment management policies, for example in terms of the balance struck between longer term investment growth and short term yield/return. Any deficits are financed through increased contributions agreed with the actuary and are financed by Council, admitted and scheduled bodies contributions.

The Fund's Investment Strategy Statement (ISS) sets out its strategic asset allocation in order to deliver the investment returns which the Fund requires to achieve full funding over the longer term. The ISS is continually developed and updated at each quarterly Committee. The Committee last reviewed the investment strategy in July 2022.

The employer covenant is reviewed periodically with the Fund's actuary. The aim is to provide early warning of any employer at risk of defaulting on their liabilities and to ensure adequate bonds or guarantees are in place to mitigate that risk and at March 2022 the employer risk review revealed no material risk to the Fund.

The Fund also monitors the timeliness and value of contributions, this will help us to intervene early if we suspect that an employer is struggling to meet their pension obligations.

The Fund's Investment Advisor reports quarterly to the Committee at which fund manager performance is reviewed and discussed to ensure that the investment strategy remains on track.

[What are the assumptions on which the assessment is based including whether the key assumptions underlying the budgets and/or forecasts appear appropriate in the circumstances?](#)

Details on the assumptions used in the valuation are contained within the actuary's 2022 valuation report and the updated Funding Strategy Statement, December 2022.

The Fund monitors budgets and cash flow on a monthly basis and the Committee review these on a quarterly basis. Cash flow will include predictable payments, such as the monthly pension payroll, or more unpredictable payments such as transfer out payments, retirement lump sums

or death benefits. The Fund is maturing which means that the cash flow position of the Fund is negative, contributions from employers and employees are not sufficient to meet the payments of benefits due without needing to utilise investment income, or liquidate investment assets.

However, this has been forecast for a number of years and the Committee took steps to invest in income yielding assets, currently some assets classes are non-distributing as there is sufficient cash balances to maintain this approach, the Committee will review this approach as the need arises.

In establishing an acceptable working cash balance, we wish to determine a sum that is sufficient to cover predictable benefit payments, taking account of expected cash flow, whilst also providing a buffer to meet unpredictable payments together with any deterioration in cash inflow.

The Fund's cash flow remains robust. The Fund forecast for cash holdings for 31st March 2026 is £7.3m.

Note 3: Summary of Significant Accounting Policies

Fund account – revenue recognition

a) Contribution income

Normal contributions are accounted for on an accruals basis as follows;

- Employee contribution rates are set in accordance with LGPS regulations, using common percentage rates for all schemes which rise according to pensionable pay.
- Employer contributions are set at the percentage rate recommended by the Fund actuary for the period to which they relate.

Employer deficit funding contributions are accounted for on the basis advised by the Fund actuary in the rates and adjustment certificate issued to the relevant employing body. Additional employers' contribution in respect of ill-health and early retirements are accounted for in the year the event arose. Any amount due in the year but unpaid will be classed as a current financial assets.

b) Transfers to and from other schemes

Transfers in and out relate to members who have either joined or left the Fund.

Individual transfers in/out are accounted for when received or paid. Transfers in from members wishing to use the proceeds of their additional voluntary contributions ([Note 20](#)) to purchase scheme benefits are accounted for on a receipts basis and are included in Transfers in.

c) Investment income

- Interest income is recognised in the Fund as it accrues, using the effective interest rate of the financial instrument as at the date of acquisition or origination.
- Dividend income is recognised on the date the shares are quoted ex-dividend. Any amount not received by the end of the reporting period is disclosed in the net assets statement as a current financial asset.
- Distributions from pooled funds are recognised at the date of issue. Any amount not received by the end of the reporting period is disclosed in the Net Asset Statement (NAS) as a current financial asset.

- Changes in the value of investments (including investment properties) are recognised as income and comprise all realised and unrealised profits/losses during the year.

Fund account – expense items

d) Benefits payable

Pensions and lump-sum benefits payable include all amounts known to be due as at the end of the financial year. Any amounts due but unpaid are disclosed in the NAS as current liabilities, providing that payment has been approved.

e) Taxation

The Fund is a registered public service scheme under section 1(1) of Schedule 36 of the Finance Act 2004 and as such is exempt from UK income tax on interest received and from capital gains tax on the proceeds of investments sold. Income from overseas investments suffers withholding tax in the country of origin, unless exemption is permitted. Irrecoverable tax is accounted for as a Fund expense as it arises.

f) Management expenses

The Fund discloses its management expenses in accordance with the CIPFA guidance [Accounting for Local Government Pension Scheme Management Expenses \(2016\)](#), all items of expenditure are charged to the Fund on an accruals basis as follows:

Administrative expenses

All staff costs of the pension administration team are recharged to the Fund. Associated management, accommodation and other overheads are apportioned to this activity and charged as expenses to the Fund.

Oversight and governance costs

All staff costs associated with oversight and governance are recharged to the Fund. Associated management, accommodation and other overheads are apportioned to this activity and charged as expenses to the Fund.

Investment management expenses

Investment management expenses are charged directly to the Fund as part of management expenses and are not included in, or netted off from, the reported return on investments. Where fees are netted off quarterly valuations by investment managers, these expenses are shown separately in Note 10a and grossed up to increase the change in value of investments.

Fees of the external investment managers and custodian are agreed in the respective mandates governing their appointments. Broadly, these are based on the Market value of the investments under their management and therefore increase or decrease as the value of these investments change.

Net assets statement

g) Financial assets

Investment assets are included in the financial statements on a fair value basis as at the reporting date. A financial asset is recognised in the NAS on the date the Fund becomes party to the contractual acquisition of the asset. From this date any gains or losses arising from changes in the fair value of asset are recognised in the Fund account.

The values of investments as shown in the NAS have been determined at fair value in

accordance with the requirements of the Code and IFRS13 (see Note 14). For the purposes of disclosing levels of fair value hierarchy, the Fund has adopted the classification guidelines recommended in *Practical Guidance on Investment Disclosures* (PRAG/Investment Association, 2016).

h) Foreign currency transactions

Dividends, interest and purchases and sales of investments in foreign currencies have been accounted for at the spot market rates at the date of transaction. End-of-year spot market exchange rates are used to value cash balances held in foreign currency bank accounts, Market values of overseas investments and purchases and sales outstanding at the end of the reporting period.

i) Derivatives

The Fund uses derivative financial instruments to manage its exposure to specific risks arising from its investment activities. The Fund does not hold derivatives for speculative purposes.

Derivative contract assets are fair value at bid prices and liabilities are fair value at offer prices. Changes in the fair value of derivative contracts are included in the change of market value.

The future value of forward currency contracts is based on market forward exchange rates at the year end date and determined as the gain or loss that would arise if the outstanding contract was matched at the year end with an equal and opposite contract.

j) Cash and cash equivalents

Cash comprises cash in hand in terms of temporary deposits, amounts held by the Fund's external managers and invested in money market funds. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and that are subject to minimal risk of changes in value.

k) Financial liabilities

A financial liability is recognised in the NAS on the date the Fund becomes party to the liability. The Fund recognises financial liabilities relating to investment trading at fair value as at the reporting date, and any gains or losses arising from changes in the fair value of the liability between contract date, the year-end date and the eventual settlement date are recognised in the Fund account as part of the Change in Value of Investments.

Other financial liabilities classed as amortised costs are carried at amortised cost i.e. the amount carried in the NAS is the outstanding principal repayable plus accrued interest. Any interest charged is accounted for on an accruals basis and included in administration costs.

l) Actuarial present value of promised retirement benefits

The actuarial present value of promised retirement benefits is assessed on a triennial basis by the scheme actuary in accordance with the requirements of International Accounting Standard (IAS) 19 and relevant actuarial standards. As permitted under the Code, the Fund has opted to disclose the actuarial present value of promised retirement benefits by way of a note to the NAS ([Note 18](#)).

m) Additional voluntary contributions

The Fund provides an additional voluntary contributions (AVC) scheme for its members, the assets of which are invested separately from those of the Fund. AVCs are not included in the accounts in accordance with section 4(1) (b) of The LGPS (Management and Investment of Funds) Regulations 2016 but are disclosed as a note only (Note 20). The AVC provider is Clerical Medical and contributions are also collected for life assurance policies provided by Utmost Life and Pensions.

n) Contingent assets and contingent liabilities

A contingent asset arises where an event has taken place giving rise to a possible asset whose existence will only be confirmed or otherwise by the occurrence of future events.

A contingent liability arises where an event has taken place prior to the year-end giving rise to a possible financial obligation whose existence will only be confirmed or otherwise by the occurrence of future events. Contingent liabilities can also arise in circumstances where a provision would be made, except that it is not possible at the balance sheet date to measure the value of the financial obligation reliably.

Contingent assets and liabilities are not recognised in the NAS but are disclosed by way of narrative in the notes.

Note 4: Critical judgements in applying accounting policies

Pension fund liability

The liability is re-calculated every three years by the appointed actuary, with annual updates in the intervening years. The methodology used is in line with accepted guidelines.

This estimate is subject to significant variances based on changes to the underlying assumptions which are agreed with the actuary and have been summarised (see Note 18).

Actuarial revaluations are used to set future contribution rates and underpin the Fund's most significant investment management policies, for example in terms of the balance struck between longer term investment growth and short-term yield/return.

Note 5: Assumptions made about the future and other major sources of estimation uncertainty

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the reported. Estimates and assumptions are made taking into account historical experience, current trends and future expectations. The items in the NAS for which there is a significant risk of material adjustment in the following year are as follows.

Item	Uncertainties	Effect if actual results differ from assumptions
Actuarial present value of promised retirement benefits (Note 18)	Estimation of the net liability to pay pensions depends on a number of complex judgements relating to the discount rate used, salary increases, changes in retirement ages, mortality rates and returns on fund assets. A firm of consulting actuaries is engaged to provide the Fund with expert advice about the assumptions to be applied.	The effects on the present value of total pension obligation in individual assumptions can be measured. For instance: <ul style="list-style-type: none">• a 0.1% increase in the discount rate assumption would result in a decrease in the pension liability of £29m• a 0.1% increase in assumed earnings inflation would increase the value of liabilities by approximately £2m, and• a one year increase in assumed life expectancy would increase the liability by approximately £78m.

Item	Uncertainties	Effect if actual results differ from assumptions
Private equity, private debt and real assets investments (Note 14)	Private equity investments are valued at fair value in accordance with <i>International Private Equity and Venture Capital Valuation Guidelines 2012</i> . These investments are not publicly listed and as such there is a degree of estimation involved in the valuation.	Level 3 investments total £402m, which represents 24% of the total Fund value of £1,699m.

Note 6: Events after the Reporting Date

The Present Value of Promised Retirement Benefits (note 20) includes an allowance for the "McCloud ruling", i.e an estimate of the potential increase in past service benefits arising from this case affecting public service pension schemes. This estimate was allowed for in the 31 March 2023 IAS26 reporting and is continued to be allowed for within the liabilities this year. There will be changes made to scheme regulations that will remove age discrimination from the LGPS in due course.

The Fund has valued its assets based on the 31 March 2023 position as reported by its investment managers. However, there is uncertainty over asset valuations, in particular for real and private market assets. The Fund believes that these valuations are the most reliable, as there are not alternative reliable estimates given the absence of trading in these asset classes.

Markets were disrupted by Geopolitics, banking instability, global inflationary pressures and accompanying central bank rate rises have increased market volatility. As a result, asset returns have lagged expectation while members received a higher than anticipated benefit increase of 10.1% in April 2023. However, these impacts were more than offset by a material increase in expected future returns due to rising interest rates which decreased the value placed on the Fund's liabilities.

Note 12c: Stock Lending

The Fund does not carry out stock lending directly, and is an investor of a pooled fund with the passive equity manager, LGIM, who carry out stock lending as part of the Fund's activities. Stock Lending occurs in limited number of overseas equities index funds.

The Stock Lending programme is managed and administered by the custodian of the Funds (Citibank) within the risk control parameters set by LGIM. The programme has been operating for over 10 years and enjoys an indemnity from Citibank. Stock lending is only undertaken with counterparties who have satisfied the requirements in terms of market capability and minimum credit standing.

All income arising from stock lending less the custodian/administrator's costs are credited to the Funds lending the stocks. LGIM does not receive any revenue from the stock lending. As at 31 March 2023, the value of quoted equities on loan was £37m (2021/22: £80m). These equities continue to be recognised in the Fund's financial statements.

Note 13: Analysis of Derivatives

Objectives and policies for holding derivatives

Most of the holding in derivatives is to hedge liabilities or hedge exposures to reduce risk in the Fund. Derivatives may be used to gain exposure to an asset more efficiently than holding the underlying asset. The use of derivatives is managed in line with the investment management agreement agreed between the Fund and the various investment managers.

The Fund currently has exposure to forward currency contracts and the purpose of this is to reduce the Fund's exposure to fluctuations in exchange rates. The Fund managers who use forward currency contracts is River and Mercantile. A breakdown of forward contracts held by the Fund as at 31 March 2023 is given below:

Open forward currency contracts

Settlements	Currency bought	Local value	Currency sold	Local value	Asset value	Liability value
		000		000	£'000	£'000
One to six months	GBP	107	USD	(130)	2,127	-
One to six months	GBP	51	EUR	(58)	-	(34)
Open forward currency contracts at 31 March 2023					2,127	(34)
Net forward currency contracts at 31 March 2023						<u>(2,092)</u>
Prior year comparative						
Open forward currency contracts at 31 March 2022					-	(1,215)
Net forward currency contracts at 31 March 2022						<u>(1,215)</u>

Purchased/written options

As part of its risk management strategy, the Fund purchases equity option contracts that protect it from falls in value in its main investment markets.

Investment underlying option contract	Expires	Put/Call	Notional Holdings	Market Value as at 31/03/2022	Notional Holdings	Market Value as at 31/03/2023

Pooled investments-property funds	Level 3	Closing bid price where bid and offer are published	NAV-based pricing set on a forward pricing basis	Valuations could be affected by material events occurring between the date of the financial statements provided and the Fund's own reporting date, by changes to expected cashflows, and by any differences between audited and unaudited accounts.
Pooled investments-hedge funds	Level 3	Closing bid price where bid and offer are published	NAV-based pricing set on a forward pricing basis	Valuations could be affected by material events occurring between the date of the financial statements provided and the Fund's own reporting date, by changes to expected cashflows, and by any differences between audited and unaudited accounts.
Private (Unquoted) equity / debt and real assets	Level 3	Comparable valuation of similar companies in accordance with <i>International Private Equity and Venture Capital Valuation Guidelines (2012)</i>	<ul style="list-style-type: none"> Earnings before interest, tax, depreciation and amortisation multiple Revenue multiple Discount for lack of marketability Control premium 	Valuations could be affected by material events occurring between the date of the financial statements provided and the Fund's own reporting date, by changes to expected cashflows, and by any differences between audited and unaudited accounts.

Sensitivity of assets valued at Level 3

Having analysed historical data and current market trends, and consulted with independent investment advisors, the Fund has determined that the valuation methods described above are likely to be accurate to within the following ranges, and has set out below the consequent potential impact on the closing value of investments held at 31 March 2023.

The figures set out below are independent investment advisors assessment of the 1 year volatility for the asset classes held.

Description of asset	Assessed valuation range (+/-)	Value as 31 March 2023	Value on increase	Value on decrease
	%	£'000	£'000	£'000

Note 14a: Fair Value Hierarchy

Assets and liabilities have been classified three levels, according to the quality and reliability of information used to determine fair values.

Level 1 –where the fair values are derived from adjusted quoted prices in active markets for identical assets or liabilities. Comprise quoted equities, quoted fixed securities, quoted index linked securities and unit trusts.

Level 2 – Assets and liabilities at level 2 are those where quoted market prices are not available; for example, where an instrument is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value.

Level 3 – Assets and liabilities at level 3 are those where at least one input that could have a significant effect on the instrument's valuation is not based on observable market data.

The following table provides an analysis of the financial assets and liabilities of the Fund grouped into levels 1 to 3, based on the level at which the fair value is observable.

	Quoted market price	Using observable inputs	With significant unobserva- ble inputs	Total
Values at 31 March 2023	Level 1 £'000	Level 2 £'000	Level 3 £'000	£'000

Unrealised and realised gains and losses are recognised in the profit and losses on disposal and changes in the market value of investments line of the Fund of account.

Note 15: Classification of Financial Instruments

Accounting policies describe how different asset classes of financial instruments are measured, and how income and expenses, including fair value gains and losses are recognised. The following table analyses the carrying amounts of financial assets and liabilities by category and NAS heading.

Market value as at 31 March 2022			Market value as at 31 March 2023		
Fair value through profit and loss £'000	Assets at amortised cost £'000	Liabilities at amortised cost £'000	Fair value through profit and loss £'000	Assets at amortised cost £'000	Liabilities at amortised cost £'000
Financial assets					
147,474	-	-	-	-	-
923,961	-	-	1,063,984	-	-
197,597	-	-	186,343	-	-
326,746	-	-	363,747	-	-
2,330	-	-	-	-	-
150	-	-	150	-	-
89,029	15,037	-	61,317	11,657	-
6,215	-	-	2,451	-	-

-	-	(983)	(516)	-	-
-	-	(15,482)	(970)	-	(175)
1,701,728	21,569	(15,482)	1,677,336	20,466	(175)

Note 15a: Net Gains and Losses on Financial Instruments

31 March 2022 £'000		31 March 2023 £'000
	Financial Assets	
152,113	Fair value through profit and loss	(8,667)
1,878	Other investment balances	2,953
	Financial Liabilities	
(25,048)	Fair value through profit and loss	195
128,943	Total	(5,519)

All realised gains and losses arise from the sale or disposal of financial assets which have been derecognised in the financial statements.

The Fund has not entered into any financial guarantees that are required to be accounted for as financial instruments.

Note 16: Nature and Extent of Risks arising from Financial Instruments

Risk and risk management

The Fund's primary long-term risk is that the Fund's assets will fall short of its liabilities (i.e. promised benefits payable to members). Therefore the aim of investment risk management is to minimise the risk of an overall reduction in the value of the Fund and to maximise the opportunity for gains across the whole Fund portfolio. The Fund achieves this through asset diversification to reduce exposure to market risk (price risk, currency risk and interest rate risk) and credit risk to an acceptable level. In addition, the Fund manages its liquidity risk to ensure there is sufficient liquidity to meet the Fund's forecast cash flows. The Fund manages these investment risks as part of its overall Fund risk management programme.

Responsibility for the Fund's risk management strategy rests with the Committee. Risk management policies are established to identify and analyse the risks faced by the Fund's operations. Policies are reviewed regularly to reflect changes in activity and in market conditions.

Market risk

Market risk is the risk of loss emanating from fluctuations in equity and commodity prices, interest and foreign exchange rates and credit spreads. The Fund is exposed to market risk from its investment activities, particularly through its equity holdings. The level of risk exposure depends on market conditions, expectations of future price and yield movements and the asset mix. The objective of the Fund's risk management strategy is to identify, manage and control market risk exposure within acceptable parameters, while optimising investment return.

In general, excessive volatility in market risk is managed through the diversification of the portfolio in terms of geographical and industry sectors and individual securities. To mitigate market risk, the Fund and its investment advisors undertake appropriate monitoring of market conditions and benchmark analysis, and manage any identified risk in two ways:

- the exposure of the Fund to market risk is monitored through a factor risk analysis, to ensure that risk remains within tolerable levels
- specific risk exposure is limited by applying risk-weighted maximum exposures to individual investments.

Equity futures contracts and exchange traded option contracts on individual securities may also be used to manage market risk on equity investments. The Fund's structured equity is a hedge that provides some level of mitigation to market volatility.

Other price risk

Other price risk represents the risk that the value of a financial instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or foreign exchange risk), whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all such instruments in the market.

The Fund is exposed to share and derivative price risk. This arises from investments held by the Fund for which the future price is uncertain. All securities investments present a risk of loss of capital. The Fund is exposed to share and derivative price risk. This arises from investments held by the Fund for which the future price is uncertain. All securities investments present a risk of loss of capital. Except for shares sold short, the maximum risk resulting from financial instruments is determined by the fair value of the financial instruments. Possible losses from shares sold short are unlimited.

The Fund's investment managers mitigate this price risk through diversification and the selection of securities and other financial instruments is monitored to ensure it is within limits specified in the Fund investment strategy.

Other price risk – sensitivity analysis

In consultation with its investment advisors, the Fund has determined that the following movements in market price risk are reasonably possible for 2022/23, assuming that all other variables, in particular foreign exchange rates and interest rates, remain the same:

Asset type	Movement %	Market value as at 31 March 2023 £'000	Movement on increased value £'000	Movement on decreased value £'000
Equities	20	-	-	-

* unhedged position

Interest rate risk

The Fund invests in financial assets for the primary purpose of obtaining a return on investments. These investments are subject to interest rate risks, which represent the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Fund's direct exposure to interest rate movements as at 31 March 2023 and 31 March 2022 is set out below. These disclosures present interest rate risk based on the underlying financial assets at fair value.

Interest rate – risk sensitivity analysis

The Fund recognises that interest rates can vary and affect both income to the Fund and the carrying value of Fund assets, both of which affect the value of the net assets available to pay benefits. A 100 basis point (BPS) movement in interest rates is consistent with the level of sensitivity applied as part of the Fund's risk management strategy.

The Fund's investment advisor has advised that there is a low probability that long-term average rates are expected to move less than 100 basis points (1%) from one year to the next and experience suggests that such movements are unlikely.

Asset type	Market value as at 31 March 2023 £'000	Value on 1% price increase £'000	Value on 1% price decrease £'000
Cash and Cash equivalents	61,317	61,930	60,703
Cash balances	11,657	11,774	11,540
Total	72,974	73,703	72,244

Asset type	Market value as at 31 March 2023 £'000	Value on 1% price increase £'000	Value on 1% price decrease £'000
Cash and Cash equivalents	1,710	1,727	1,693
Total	1,710	1,727	1,693

Interest Receivable

Asset type	Market value as at 31 March 2022 £'000	Value on 1% price increase £'000	Value on 1% price decrease £'000
Cash and Cash equivalents	228	230	226
Total	228	230	226

This analysis demonstrates that a 1% increase in interest rates will not affect the interest received on fixed interest assets but will reduce their fair value, and vice versa. Changes in interest rates do not impact on the value of cash and cash equivalent balances but they will affect the interest income received on those balances.

Currency risk

Currency risk represents the risk that future cash flows will fluctuate because of changes in foreign exchange rates. The Fund is exposed to currency risk on any cash balances and investment assets not denominated in UK sterling. Following analysis of historical data in consultation with the Fund investment advisors, the Fund considers the likely volatility associated with foreign exchange rate movements to be not more than 10%. A 10% strengthening/weakening of the pound against the various currencies in which the Fund holds investments would decrease/increase the net assets available to pay benefits as follows.

Asset type	Market value as at 31 March 2023 £'000	Value on 10% price increase £'000	Value on 10% price decrease £'000
Overseas fixed interest unit trusts	10,361	11,397	9,325
Overseas pooled property investments	118,273	130,101	106,446
Overseas venture capital	171,163	188,280	154,047

Overseas Hedge Fund	282	310	254
Total	457,559	503,315	411,803

Asset type	Market value as at 31 March 2022 £'000	Value on 10% price increase £'000	Value on 10% price decrease £'000
Overseas quoted equities	138,588	152,447	124,729
Overseas fixed interest unit trusts	10,302	11,332	9,272
Overseas pooled property investments	112,024	123,226	100,822
Overseas private debt	112,895	124,185	101,606
Overseas real assets	84,889	93,378	76,400
Total	458,698	504,568	412,829

a) Credit risk

Credit risk represents the risk that the counterparty to a transaction or a financial instrument will fail to discharge an obligation and cause the Fund to incur a financial loss. The Market values of investments generally reflect an assessment of credit in their pricing and consequently the risk of loss is implicitly provided for in the carrying value of the Fund's financial assets and liabilities.

The selection of high quality fund managers, counterparties, brokers and financial institutions minimises credit risk that may occur through the failure to settle a transaction in a timely manner. The Fund has also set limits as to the maximum sum placed on deposit with individual financial institutions. In addition, the Fund invests an agreed percentage of its Funds in the money markets to provide diversification. Money market funds chosen all have AAA rating from a leading ratings agency, as shown below.

Summary	Rating	Asset value as at 31 March 2022 £'000	Asset value as at 31 March 2023 £'000
Held with Custodian			
Northern Trust custody cash accounts	AAA	89,029	61,317
Money market funds			
BNP Paribas	AAA	14,990	10,860
Federated Prime Rate	AAA	-	452
Bank current accounts			
Lloyds	A+	47	344
Total		104,066	72,973

The Fund has experienced no defaults from fund managers, brokers or bank accounts over many years.

Credit risk may also occur if an employing body not supported by central government does not pay contributions promptly, or defaults on its obligations. The Fund has not experienced any actual defaults in recent years and the current practice is to obtain a guarantee before admitting new employers so that all pension obligations are covered in the event of that employer facing financial difficulties. All contributions due at 31 March 2023 and 31 March 2022 (£2.3m and £2.1m respectively) were received in the first two months of the respective financial year.

Liquidity risk

Liquidity risk represents the risk that the Fund will not be able to meet its financial obligations as they fall due. The Fund's cash holding under its treasury management arrangements at 31 March 2023 was £23m (31 March 2022: £43m).

Cash not needed to settle immediate financial obligations is invested by the Fund in accordance with LBN's Treasury Investment Strategy (TIS). The TIS sets out the criteria for investing and selecting investment counterparties and details the approach to managing risk.

The Fund also has access to an overdraft facility for short-term cash needs (up to seven days). This facility is only used to meet timing differences on pension payments. As at 31 March 2023 the balance on this facility stood at £0 (31 March 2022: £0).

The Fund defines liquid assets as assets that can be converted to cash within three months. Illiquid assets are those assets which will take longer than three months to convert into cash. As at 31 March 2023 the value of liquid assets represented 76% of the total Fund value (31 March 2022: 69% of the total Fund assets).

b) Refinancing risk

The key risk is that the Authority will be bound to replenish a significant proportion of its financial instruments at a time of unfavourable interest rates. The Fund does not have any financial instruments that have a refinancing risk as part of its treasury management and investment strategy.

Note 17: Funding Arrangements

In line with the [Local Government Pension Scheme Regulations 2013](#), the Fund's actuary undertakes a funding valuation every three years for the purpose of setting employer contribution rates for the forthcoming triennial period. The last such valuation took place as at 31 March 2022 and the next valuation is due to take place as at 31 March 2025..

The key elements of the funding policy are:

- to ensure the long-term solvency of the Fund, i.e. that sufficient funds are available to meet all pension liabilities as they fall due for payment
- to ensure that employer contribution rates are as stable as possible
- to minimise the long-term cost of the scheme by recognising the link between assets and liabilities and adopting an investment strategy that balances risk and return
- to reflect the different characteristics of employing bodies in determining contribution rates where it reasonable to do so
- to use reasonable measures to reduce the risk to other employers and ultimately to the authority tax payer from an employer defaulting on its pension obligations.

At the 2022 actuarial valuation, the Fund was assessed as 100% funded (96% at the March 2019 valuation). This corresponded to a surplus of £4m (2019 valuation: £58m deficit) at that time.

When an employer's funding level is less than 10% of the 100% funding target, then a deficit recovery plan will be put in place requiring addition employer contributions.

Individual employers' rates will vary depending on the demographic and actuarial factors particular to each employer.

In addition to the primary contribution rate, most employers also pay a secondary contribution rate depending on the demographic and actuarial factors particular to each employer. Full details of the contribution rates payable can be found in the 2022 Actuarial Valuation Report and the Funding Strategy Statement on the Fund's website: www.newham.gov.uk/council/pension-fund

The valuation of the Fund has been undertaken using the projected unit method under which the salary increase for each member is assumed to increase until they leave active service by death, retirement or withdrawal from service. The principal assumptions were as follows.

Financial assumptions as noted in the triennial valuation

Assumed returns at	31 March 2022	31 March 2019
	%	%
Discount rate	4.7	5.0
CPI Inflation	2.9	2.6
Pension increases	2.9	2.6
Salary increases	3.9	3.6

Mortality assumptions as noted in the triennial valuation

Future life expectancy based on the actuary's fund-specific mortality review was as follows.

Life expectancy from age 65		31 March 2022	31 March 2019
		Years	Years
Retiring today	Males	19.5	21.2
	Females	22.9	23.8
Retiring in 20 years	Males	20.9	22.7
	Females	24.4	25.4

Commutation assumptions

An allowance is included for future retirements to elect to take 50% of the maximum additional tax free cash up to HMRC limits for pre- April 2008 service and 75% of the maximum tax-free cash for post April 2008 service

50:50 option

Less than 1% of active members (evenly distributed across age, service length and salary range) have taken up the 50:50 option.

Note 18: Actuarial Present Value of Promised Retirement Benefits

In addition to the triennial funding valuation, the Fund's actuary also undertakes a valuation of the Fund liabilities, on an IAS 19 basis, every year using the same base data as the funding valuation rolled forward to the current financial year, taking account of changes in membership numbers and updating assumptions to the current year. This valuation is not carried out on the same basis as that used for setting Fund contribution rates and the Fund accounts do not take account of liabilities to pay pensions and other benefits in the future. In order to assess the value of the benefits on this basis, the actuary has updated the actuarial assumptions (set out below) from those used for funding purposes (see Note 17). The actuary has also used valued ill-health and death benefits in line with IAS 19.

2021/22		2022/23
£m		£m
(2,635.4)	Present value of promised retirement benefits	(1,847.1)
1,687.2	Fair value of scheme assets (bid value)	1,677.3
948.2	Net Liability	169.8

An allowance for the potential impact of the McCloud & Sargeant judgement is included in the present value of promised retirement benefits.

As noted above, the liabilities above are calculated on an IAS 19 basis and therefore will differ from the results of the 2022 triennial funding valuation (see Note 17) because IAS 19 stipulates a discount rate rather than a rate which reflects market rates.

Other key assumptions used are:

	2021/22	2022/23
	%	%
Inflation/pension increase rate assumption	3.2	2.9
Salary increase rate	4.2	3.9
Discount rate	2.6	4.8

Note 19: Current Assets

2021/22		2022/23
£000		£000
1,234	Contribution due - employees	1,357
896	Contribution due - employers	934
1,335	Prepayments	-
77	Receivables	69
5,119	Debtors	8,740
15,037	Cash balances	11,657
23,698	Total	22,757

Note 20: Additional Voluntary Contributions

2021/22		2022/23
£'000		£'000
1,123	Clerical Medical	952
156	Utmost Life and Pensions	139
1,279	Total	1,091

AVC contributions of £0.079m were paid directly to Clerical Medical during the year (£0.059m 2021/22). There have been no further contributions to Utmost in either financial year.

These amounts are not included in the Fund accounts in accordance with Regulation 4 (1) (b) of the LGPS (Management and Investment of funds) Regulations 2016.

Note 21: Agency Services

The Fund pays discretionary awards to the former teachers of LBN, the amounts are fully reclaimed.

2021/22		2022/23
£'000		£'000
316	Payments on behalf of London Borough of Newham	312
316	Total	312

Note 22: Related Parties

The Fund is administered by LBN. During the reporting period, the Council incurred costs of £1.3m (2021/22: £1.16m) in relation to the administration the Fund and was subsequently reimbursed by the Fund for these expenses (see Note 10). As at 31 March 2023 the Council owed the Fund £9.3m (2021/22 £5.1m).

Responsibility for management of the Fund has been delegated to the Pensions Committee and the day to day operations of the Fund have been delegated to the Statutory Section 151 and the Chief Executive of oneSource.

Of the Committee members there are no active members of the LGPS and three deferred members; Councillor John Gray, Councillor Harvinder Singh-Virdee and Councillor James Asser. The members of the Committee do not receive fees in relation to their specific responsibilities as members of the Committee.

The Council is also the largest employer in the Fund and in 2022/23 contributed £34.9m (2021/22 £30.1m) to the Pension Fund in respect of employer's contributions. All monies owing to and due from the fund were paid in year.

The Fund is a minority shareholder in London LGPS CIV Ltd. Shares valued at £0.15m at 31 March 2023 (£0.15m at 31 March 2022) are included as long-term investments in the NAS. A mixed portfolio of investments is managed by the regional asset pool as shown in [Note 12b](#). During 2022/23 a total of £0.14m was charged to the pension fund by London CIV in respect of investment management services (£0.13m in 2021/22).

Note 22a: Key Management Personnel

Key management personnel are members of the Committee, the Corporate Director of Resources, the Director of Exchequer and Transactional Services and the Head of Pensions & Treasury for oneSource. Total remuneration payable to key management personnel which is recharged to the Fund is set out below:

2021/22		2022/23
£'000		£'000
35	Short-term benefits	37
1,387	Post-employment benefits	1,030
1,422	Total	1,067

Note 23: Contingent Liabilities and Contractual Commitments

Outstanding capital commitments for private debt, property, private equity, real assets and social housing at 31 March 2023 totalled £79m (31 March 2022: £114m). There are no contingent liabilities to report.

Four admitted body employers in the Fund hold insurance bonds and seven admitted bodies have a guarantee in place with the Local Authority to guard against the possibility of being unable to meet the pension obligations. These bonds/guarantees are drawn in favour of the Fund and payment will only be triggered in the event of employer default. No such defaults have occurred.

The Fund, in conjunction with other Borough shareholders in the London CIV, has entered into an exit agreement with the London CIV, acting as a guarantor. The Fund will meet any exit payments due should the London CIV cease its admission arrangements with City of London. Should an amount become due the Fund will meet 1/32 share of costs.

Investment Strategy Statement 2022/23

1. Introduction

- 1.1 This is the second Investment Strategy Statement (ISS) adopted by the London Borough of Newham (LBN) Pension Fund (“the Fund”) and reflects the changes to the Strategic Asset Allocation (SAA) agreed by the Pensions Committee (PC) at their meeting on 8/12/2021.

Under The Local Government Pension Scheme (LGPS)(Management and Investment of Funds) Regulations 2016 LBN is required to publish this ISS.

The Regulations require administering authorities to outline how it meets each of 6 objectives aimed at improving the investment and governance of the Fund.

- 1.2 This Statement addresses each of the objectives included in the 2016 Regulations, the relevant sections of which are identified below:
- Objective 7.2 (a) :A requirement to invest fund money in a wide range of instruments
 - Objective 7.2 (b): The authority’s assessment of the suitability of particular investments and types of investment
 - Objective 7.2 (c) : The authority’s approach to risk, including the ways in which risks are to be measured and managed
 - Objective 7.2 (d) The authority’s approach to pooling investments, including the use of collective investment vehicles
 - Objective 7.2 (e): The authority’s policy on how social, environmental or corporate governance considerations are taken into account in the selection, non-selection, retention and realisation of investments
 - Objective 7.2 (f): The exercise of rights (including voting rights) attaching to investments We deal with each of these in turn in paragraph 2 below.
- 1.3 The PC of LBN oversees the management of the Fund’s assets. Although not trustees, the Members of the PC owe a fiduciary duty similar to that of trustees to the council-tax payers, who would ultimately have to meet any shortfall in the assets of the Fund, as well as to the contributors and beneficiaries of the Fund.
- 1.4 The relevant terms of reference for the PC within the Council’s Constitution (3.1.1.8) are:
- To make all decisions under Regulations made pursuant to Sections 7, 12 or 24 of the Superannuation Act not otherwise falling to the Corporate Director of Resources to determine as set out in the officers’ scheme of delegation.

The PC has responsibility for:

- Determining an overall investment strategy and strategic asset allocation, with regard to diversification and the suitability of asset classes
- Appointing the investment managers, an independent custodian, the actuary, the investment advisor(s) and any other external consultants considered necessary
- Reviewing on a regular basis the investment managers' performance against benchmarks, portfolio risk and satisfying themselves as to the managers' expertise and the quality of their internal systems and controls
- Monitoring compliance with the ISS & Funding Strategy Statement (FSS) and reviewing its contents
- Reviewing policy on social, environmental and ethical considerations, and on the exercise of voting rights

The Corporate Director of Resources and the appointed consultants and actuaries support the PC. The day-to-day management of the Fund's assets is delegated to investment managers.

- 1.5 This ISS will be reviewed at least once a year, or more frequently as required - in particular following valuations, future asset/liability studies and performance reviews, which may indicate a need to change investment policy, or significant changes to the FSS.
- 1.6 Under the previous Regulations the Statement of Investment Principles required to state how it complies with the revised six investment principles as outlined within the CIPFA Pensions Panel Principles. Although not formally required under the 2016 Regulations this information is given in Appendix A. In addition, Appendix B includes a disclosure of the Fund's policy on how the PC discharge their stewardship responsibilities.

2. Objective 7.2 (a): A requirement to invest fund money in a wide range of instruments

- 2.1 Funding and investment risk is discussed in more detail later in this ISS. However, at this stage it is important to state that the PC is aware of the risks it runs within the Fund and the consequences of these risks.
- 2.2 In order to control risk the PC recognise that the Fund should have an investment strategy that has:
- Exposure to a diverse range of sources of return, such as market, manager skill and through the use of less liquid holdings.
 - Diversity in the asset classes used
 - Diversity in the approaches to the management of the underlying assets.
- A consequence of this approach is that the Fund's assets are invested in a wide range of instruments.
- 2.3 This approach to diversification has seen the Fund dividing its assets across 3 broad categories; growth (equity and diversifying real assets, such as infrastructure and agriculture) , income (which includes bonds and property) and protection assets (which include strategies to protect the value of the equity holding and to provide protection against currency fluctuation). The size of assets invested in each category will vary depending on investment conditions. However, it is important to note that each category is itself diversified.

- 2.4 The main risk the PC are concerned with is to ensure the long-term ability of the Fund to meet pension, and other benefit obligations, as they fall due is met. As a result the PC place a high degree of importance on ensuring the expected return on the assets is sufficient to do so, and does not have to rely on a level of risk which the PC considers excessive.

To ensure the Fund has sufficient access to cash to pay benefits, the PC keeps the liquidity within the Fund monitored.

At all times the PC takes the view that their investment decisions, including those involving diversification, in the best long term interest of Fund beneficiaries.

- 2.5 To mitigate these risks the PC regularly reviews both the performance and expected returns from the Fund's investments to measure whether it has met and is likely to meet in future its return objective. In addition to keeping their investment strategy and policy under regular review the PC will keep this ISS under review to ensure that it reflects the approaches being taken.
- 2.6 The table in Section 5.3 provides detail on the asset allocation.

3. Objective 7.2(b): The authority's assessment of the suitability of particular investments and types of investment

- 3.1 When assessing the suitability of investments LBN takes into account a number of factors:
- Prospective return
 - Risk, including macro-economic risk
 - Concentration
 - Risk management qualities the asset has, when the portfolio as a whole is considered
 - Geographic and currency exposures
 - Whether the management of the asset meets the Fund's Environmental, Social and Governance (ESG) criteria.
- 3.2 Suitability is a critical test for whether or not a particular investment should be made.
- 3.3 Each of the Fund's investments has an individual performance benchmark which their reported performance is measured against. In addition the Funding Strategy Statement implies the Fund as a whole should generate a return which is sufficient to support the valuation discount rate, whilst minimising risk as much as is possible and practicable.
- 3.3 The PC monitors the suitability of the Fund's assets on a quarterly basis. To that end they monitor the investment returns and the volatility of the individual investments together with the Fund level returns and risk. This latter point being to ensure the risks caused by interactions between investments within the portfolio is properly understood. Where comparative statistics are available the PC will also compare the Fund asset performance with those of similar funds.
- 3.4 The PC relies on external advice in relation to the collation of the statistics for review.

4. Objective 7.2(c): The authority's approach to risk, including ways in which risks are to be measured and managed

4.1 The PC recognises that there are a number of risks involved in the investment of the assets of the Pension Fund amongst which are the following:

4.2 Geopolitical and currency risks:

- are measured by the value of assets (the concentration risk), in any one market leading to the risk of an adverse influence on investment values arising from political intervention; and
- are managed by regular reviews of the actual investments relative to policy and through regular assessment of the levels of diversification within the existing policy.
- From time to time when it is felt necessary, explicit strategies to protect against these risks can be used.

4.3 Manager risk:

- is measured by the expected deviation of the prospective risk and return as set out in the manager(s) investment objectives, relative to the investment policy; and
- is managed by monitoring the actual deviation of returns relative to the objective and factors inherent in the manager(s) investment process.

4.4 Solvency and mismatching risk:

- are measured through a qualitative and quantitative assessment of the expected development of the liabilities relative to the current and alternative investment policies; and
- are managed by assessing the progress of the actual growth of the liabilities relative to the selected investment policy.

4.5 Liquidity risk:

- is measured by the level of cash flow required over a specified period; and
- managed by assessing the level of cash held in order to limit the impact of the cash flow requirements on the investment cash policy

4.6 Custodial risk:

- is measured by assessing the creditworthiness of the global custodian and the ability of the organisation to settle trades on time and provide secure safekeeping of the assets under custody.

4.7 'ESG risk:

- It is recognised that ESG and ethical issues have the potential to impact on the long term financial viability of an organisation. The PC monitors both developments within the investment environment and the voting of its appointed managers, supported through regular reporting from the Fund's custodian on the voting and engagement activity of its investment managers.

4.8 Funding of the Fund is based upon financial and demographic assumptions determined by the actuary. The main risks to the Fund are highlighted within section 7 of the Funding Strategy Statement. The risks to the Fund are controlled in the following ways:

- The adoption and monitoring of asset allocation benchmarks, ranges and performance targets constrain the Investment Managers from deviating significantly from the intended approach while permitting the flexibility for Managers to enhance returns
- The appointment of more than one Manager with different mandates and approaches provides for the diversification of manager risk

- 4.9 The investment management agreements constrain the Manager's actions in areas of particular risk and set out the respective responsibilities of both the Manager and LBN.

LBN and the PC are aware investment risk is only one aspect of the risks facing the Fund. The other key risk they are aware of is the ability of LBN to meet the future contributions, support the investment risk (i.e. the level of volatility of investment returns) and underwrite actuarial risk, namely the volatility in the actuarial deficit and the impact this has on contributions.

- 4.10 LBN and the PC are of the view that the diversification of the Fund assets is sufficiently broad to ensure the investment risk is low and will continue to be low. When putting in place the investment strategy the PC carefully considered both the individual asset risk characteristics and those of the combined portfolio to ensure the risks were appropriate.

Estimating the likely volatility of future investment returns is difficult as it relies on both estimates of individual asset class returns and also the correlation between them. These can be based on historic asset class information for some of the listed asset classes the Fund uses. However, for other private market and less liquid assets it is much more difficult.

The PC is also mindful that correlations change over time and at times of stress can be significantly different from they are in more benign market conditions.

To help manage risk the PC uses an external investment adviser to monitor the risk. In addition when carrying out their investment strategy review the PC also had different investment advisers assess the level of risk involved.

- 4.11 The Fund targets a long-term return that will support the discount rate set by the actuary at the triennial valuation and the Fund's Independent Adviser has confirmed that the current long-term investment strategy is expected to produce an investment return in excess of this amount. The investment strategy is considered to have a low degree of volatility and currently targets as low a volatility possible given the level of return required by the discount rate.

- 4.12 When reviewing the investment strategy on a quarterly basis the PC considers advice from their Investment and Economic Advisers and the need to take additional steps to protect the value of the assets that may arise or capitalise on opportunities if they are deemed suitable.

- 4.13 At each review of the ISS the assumptions on risk and return and their impact on asset allocation will be reviewed.

- 4.14 The Fund may invest in a wide range of investments including quoted and unquoted assets in Equities, Fixed Income, Property and Alternatives either directly or through pooled investments. The Fund may also make use of directly held derivatives for the purposes of efficient portfolio management or to hedge specific risks, in order to protect the value of the Fund's assets.

5 Objective 7.2(d): The authority's approach to pooling investments, including the use of collective investment vehicles.

- 5.1 LBN recognises the government's requirement for LGPS funds to pool their investments and is committed to pursuing a pooling solution that ensures maximum cost effectiveness for the Fund, both in terms of return and management cost.

- 5.2 In this regard the Fund has indicated to the Government in its submissions that when opportunities to have assets within the investment strategy managed by an appropriate

pooling partner it will give these consideration.

LBN and the PC are aware that certain of the assets held within the Fund have limited liquidity and moving them would come at a cost. Whilst it is the expectation to make use of the pooling partner for the management of the majority of the Fund assets in the longer term, the PC recognises that transitioning from the current structure to the pooling partner will be a protracted exercise spread over a number of years to ensure unnecessary costs are not incurred.

5.3 The table below shows the assets the Fund anticipates will be invested with the pooling partner, when the appropriate management becomes available, and those which it expects to sit outside of those managed by their pooling partner.

Asset Class	PC Approved SAA	Control Ranges
	%	%
Growth	65	
Equities	50	43 - 57
Private Equity	10	3 - 12
Infrastructure/Agriculture	5	4 - 6
Income	35	
Property	10	8 - 12
Social Housing	5	4 - 6
Private Credit	7.5	5 - 9
Corporate Bonds	7.5	6 - 9
Index-linked Bonds	5	4 - 6
Protection and Cash	0	
Equity Protection and Currency Hedging	0	0 - 5
Cash	0	0 - 5
Absolute Return Bonds	0	
Total	100	

- 5.4 The PC is in the process of transitioning the assets to the long term strategic asset allocation approved by the PC shown in the table above. This transition process takes into account market conditions and investment opportunities. Until the transition is complete asset allocations will lie in the range between the two columns in the table above with a margin of +/- 1% on each to allow for the impact of market movements.
- 5.5 At each review of the investment strategy, which will happen at least every three years, the investment of the above assets will be actively considered by the PC, and in particular whether a collective investment option is appropriate.
- 5.6 More information on the preferred pooling partner and its operation is included in Appendix C of this statement.

6 Objective 7.2(e): How social, environmental or corporate governance considerations are taken into account in the selection, non-selection, retention and realisation of investments

- 6.1 A full of review of the Fund's approach ESG policy was completed in 2019 and reviewed in 2021/22. The Fund adopted an ESG Policy which outlines its approach to the management of Environmental, Social and Governance issues within its investment portfolio. The ESG Policy is publically available and will be reviewed as deemed appropriate.
- 6.2 The Fund's ESG policy is set out in the Appendix.

7 Objective 7.2(f): The exercise of rights (including voting rights) attaching to investments

- 7.1 The Fund is committed to making full use of its shareholder rights, and this is also covered in its ESG Policy. The Fund's policy on voting rights is based on the Cadbury, Greenbury and Hampel codes, as well as the stock exchange combined code, and the principles of protecting shareholder rights, minimising risk and enhancing value.
- 7.2 The Fund expects its Fund Managers to vote in an appropriate and informed manner and report their voting actions in their quarterly investment reports. The exercise of shareholder's rights is delegated to the Fund Managers as part of their mandate. Fund Managers will vote in accordance with their Corporate Governance Policy Statements. These policy statements have been developed with the recommendations of Institutional Shareholder Service (ISS), Pensions and Lifetime Savings Association of Pension Funds (PLSA) and the Association of British Insurers (ABI).

Investment Strategy Statement: Appendix A

Compliance with CIPFA Pensions Panel Principles for investment decision making in the local government pension scheme in United Kingdom

Decision Making

Regulation 12(3) of The Local Government Pension Scheme (Management and Investment of funds) Regulations 2009 requires an administering authority to report on its compliance with the six Myners' Principles, in accordance with guidance given by the Secretary of State. The guidance for the Local Government Pension Scheme is set out in the CIPFA publication "Investment Decision Making and Disclosure in the Local Government Pension Scheme in the United Kingdom 2012",

Although no longer part of statutory guidance, the Fund aims to comply with all of the Myners' Principles, recognising it is in all parties' interests if the Fund operates to standards of investment decision-making and governance identified as best practice. It is also recognised as important to demonstrate how the Fund meets such principles and best practice.

The Secretary of State has previously highlighted the principle contained in *Roberts v. Hapwood* whose administering bodies exercise their duties and powers under regulations governing the investment and management of Funds:

"A body charged with the administration for definite purposes of funds contributed in whole or in part by persons other than members of that body owes, in my view, a duty to those latter persons to conduct that administration in a fairly business-like manner with reasonable care, skill and caution, and with a due and alert regard to the interest of those contributors who are not members of the body. Towards these latter persons the body stands somewhat in the position of trustees or managers of others".

The Myners' Principles are seen as supporting this approach. The principles, together with the Fund's position on compliance, are set out below:

Principle 1 - Effective decision-making

Administrating authorities should ensure that:

- **Decisions are taken by persons or organisations with the skills, knowledge, advice and resources necessary to make them effectively and monitor their implementation; and**
- **Those persons or organizations have sufficient expertise to be able to evaluate and challenge the advice they receive, and manage conflicts of interest.**

Full Compliance

The council has delegated the management and administration of the Fund to the PC, which meets at least quarterly. The responsibilities of the PC are described in paragraph 1.4 of the Investment Strategy Statement.

The PC is made up of elected members of the Council who each have voting rights and has representatives from the admitted and scheduled bodies within the Fund and from trade unions, as observers.

The PC obtains and considers advice from and is supported by the Corporate Director of Resources y, One Source and as necessary from the Fund's appointed actuary, investment managers and advisors. A review of the investment advice received by the Fund was completed in 2022, to ensure it continues to be fit for purpose in the changing investment and legislative environment.

The PC has delegated the management of the Fund's investments to professional investment managers, appointed in accordance with the scheme's regulations, whose activities are specified in detailed investment management agreements and regularly monitored.

Business plans are presented to the PC annually and progress is monitored on a quarterly basis.

Several of the PC members have extensive experience of dealing with Investment matters and training is made available to new PC members. PC Members have been asked to undertake 22 hours of investment training a year – there is an on-going programme of training available to members. The PC has adopted the CIPFA Knowledge and Skills Framework.

Principle 2 - Clear objectives

An overall investment objective(s) should be set for the fund that takes account of the scheme's liabilities, the potential impact on local tax payers, the strength of the covenant for non-local authority employers, and the attitude to risk of both the administering authority and scheme employers, and these should be clearly communicated to advisors and investment managers.

Full Compliance

The aims and objectives of the Fund are set out within the Funding Strategy Statement and within the Investment Strategy Statement. The main fund objective is to meet the cost of pension liabilities and to enable employer contribution rates to be kept as nearly constant as possible at reasonable cost to the taxpayers and admitted bodies.

The investment strategy has been set with the objective of controlling the risk that the assets will not be sufficient to meet the liabilities of the Fund while achieving a good return on investment (see paragraphs 4 and 5 above). The approach taken reflects the Fund's liabilities and was decided upon without reference to any other funds. The Fund's performance is measured against the investment objective on a quarterly basis.

The Fund's strategy is regularly reviewed.

Principle 3 – Risk and liabilities

In setting and reviewing their investment strategy, administering authorities should take account of the form and structure of liabilities. These include the implications for local tax payers, the strength of the covenant for participating employers, the risk of their default and longevity risk.

Full Compliance

The PC has, in conjunction with its advisers, agreed an Investment Strategy that is related to the Fund's liabilities. An actuarial valuation of the fund takes place every three years, the 2019 valuation is completed and the 2022 valuation is being produced at the date this report was considered by the PC. The investment strategy is designed to give diversification and specialisation and achieve optimum return against acceptable risk.

The Investment Allocation of the Fund is set to maximise the potential to close the funding deficit over future years. The Strategic Asset Allocation is outlined in paragraph 5.3 of the Investment Strategy Statement.

During 2021/22, the Fund refreshed its Admitted/Scheduled Body policy, which outlines its approach to assessing the strength of the covenant for participating employers and the risk assessment undertaken when new employers wish to join the Fund.

Principle 4 – Performance Assessment

Arrangements should be in place for the formal measurement of performance of the investments, investment managers and advisors. Administering authorities should also periodically make a formal assessment of their own effectiveness as a decision-making body and report on this to scheme members

Full Compliance

The PC has appointed investment managers with clear index strategic benchmarks within an overall Investment objective which place maximum accountability for performance against that benchmark on the manager.

The managers are monitored at quarterly intervals against their agreed benchmarks, and independent detailed monitoring of the Fund's performance is carried out by Barnett Waddingham, the Fund's advisor and by Northern Trust, the Fund's custodian who provide the performance figures. Moreover portfolio risk is measured on quarterly basis and the risk/return implications of different strategic options are fully evaluated.

The advisor is assessed on the appropriateness of asset allocation recommendations and the quality of advice given.

The actuary is assessed on the quality and consistency of the actuarial advice received. Both the advisor and the actuary have fixed term contracts which when expired are tendered for under the OJEU procedures and its eventual replacement.

The PC monitors the investment decisions it has taken, including the effectiveness of these decisions. In addition the PC receive quarterly reports as to how the Fund has performed against their investment objective. The performance figures are included in the extract from the accounts which is included in the Fund's annual report.

Principle 5 – Responsible Ownership

Administering authorities should:

- **Adopt, or ensure their investment managers adopt, the Institutional Shareholders Committee Statement of Principles on the responsibilities of shareholders and agents.**
- **Include a statement of their policy on responsible ownership in the Investment Strategy Statement.**
- **Report periodically to scheme members on the discharge of such responsibilities.**

Full Compliance

The Fund is committed to making full use of its shareholder rights. The approach used is outlined in paragraph 7.1 of the Investment Strategy Statement and in the Fund's ESG Policy. Authority has been delegated to the investment managers to exercise voting rights on behalf of the Fund. The investment managers are required to report how they have voted in their quarterly reports.

The Fund believes in using its influence as a shareholder to promote corporate social responsibility and high standards of corporate governance in the companies in which it invests – the Fund's approach to this is outlined in paragraph 7.2 of the Investment Strategy Statement and in the Fund's ESG Policy.

A full of review of the ESG policies of current Fund Managers and their compliance with the Financial Reporting Council's Stewardship Code was completed 2019, and the results were reported to the PC.

This Investment Strategy Statement and the ESG Policy are both publically available to all scheme members.

Principle 6 – Transparency and reporting

Administering authorities should:

- **Act in a transparent manner, communicating with stakeholders on issues relating to their management of investments, its governance and risks, including performance against stated objectives.**
- **Provide regular communications to scheme members in the form they consider most appropriate.**

Full Compliance

Links to the Governance Compliance Statement, the Investment Strategy Statement, the Funding Strategy Statement, the ESG Policy and the Communications Statement are all included in the Pensions Fund Annual Report which is published and is accessible to stakeholders of the Fund on the Council's web site, internal intranet and a website developed specifically for the Fund.

<http://teamsite.lbn.newham.gov.uk/NewhamPensionFund/>

All Committee meetings are open to members of the public and agendas and minutes are published on the Council's website and internal intranet. The Fund's Annual Report includes an assessment of the Fund's performance and an extract from the accounts is sent to stakeholders annually.

Investment Strategy Statement: Appendix B

Compliance with the Stewardship Code

The UK Stewardship Code 2020 (the Code) sets high stewardship standards for asset owners and asset managers, and for service providers that support them.

The Code comprises a set of 'apply and explain' Principles for asset managers an asset owners, and a separate set of Principles for service providers. The Code does not prescribe a single approach to effective stewardship. Instead, it allows organisations to meet the expectations in a manner that is aligned with their own business model and strategy.

The 12 principles are set out below:

1. Signatories' purpose, investment beliefs, strategy, and culture enable stewardship that creates longterm value for clients and beneficiaries leading to sustainable benefits for the economy, the environment and society.
2. Signatories' governance, resources and incentives support stewardship.
3. Signatories manage conflicts of interest to put the best interests of clients and beneficiaries first.
4. Signatories identify and respond to market-wide and systemic risks to promote a well-functioning financial system.
5. Signatories review their policies, assure their processes and assess the effectiveness of their activities.
6. Signatories take account of client and beneficiary needs and communicate the activities and outcomes of their stewardship and investment to them.
7. Signatories systematically integrate stewardship and investment, including material environmental, social and governance issues, and climate change, to fulfil their responsibilities.
8. Signatories monitor and hold to account managers and/or service providers.
9. Signatories engage with issuers to maintain or enhance the value of assets.
10. Signatories, where necessary, participate in collaborative engagement to influence issuers.
11. Signatories, where necessary, escalate stewardship activities to influence issuers.
12. Signatories actively exercise their rights and responsibilities.

Investment Strategy Statement: Appendix C - Information on Pooling Partner

The Fund has selected the London CIV as its pooling partner.

The London Collective Investment Vehicle (LCIV) investors (Client Funds) are 32 of the London Local Authorities (including the City of London). Each Local Authority is responsible for a separate Local Government Pension Fund which covers employees and ex-employees in the Authority along with a range of other employers in the Pension Fund.

The Client Funds are also London CIV's shareholders and London CIV works in collaboration with client funds to deliver their pooling requirements.

The London CIV has £11.2bn invested (at 31/3/21) and has 22 funds available.

The Fund accesses its global bond fund holding through the LCIV Global Bond Fund.

In addition the index-tracking funds with Legal & General Investment Management ('LGIM') are deemed to be pooled under the DLUHC guidance.

Funding Strategy Statement 2022/23

1. Introduction

This is the Funding Strategy Statement for the London Borough of Newham Pension Fund (the Fund). It has been prepared in accordance with Regulation 58 of the Local Government Pension Scheme Regulations 2013 as amended (the Regulations) and describes the London Borough of Newham's strategy, in its capacity as administering authority, for the funding of the London Borough of Newham Pension Fund.

The Fund's employers and the Fund Actuary, Barnett Waddingham LLP, have been consulted on the contents of this statement.

This statement should be read in conjunction with the Fund's Investment Strategy Statement (ISS) and has been prepared with regard to the guidance (*Preparing and Maintaining a funding strategy statement in the LGPS 2016 edition*) issued by the Chartered Institute of Public Finance and Accountancy (CIPFA).

2. Purpose of the Funding Strategy Statement

The purpose of this Funding Strategy Statement (FSS) is to:

- Establish a clear and transparent fund-specific strategy that will identify how employers' pension liabilities are best met going forward;
- Support the desirability of maintaining as nearly constant a primary contribution rate as possible, as required by Regulation 62(6) of the Regulations;
- Ensure that the regulatory requirements to set contributions to meet the future liability to provide Scheme member benefits in a way that ensures the solvency and long-term cost efficiency of the Fund are met; and
- Take a prudent longer-term view of funding those liabilities.

3. Aims and purpose of the Fund

The aims of the Fund are to:

- Manage employers' liabilities effectively and ensure that sufficient resources are available to meet all liabilities as they fall due;
- Enable primary contribution rates to be kept as nearly constant as possible and (subject to the administering authority not taking undue risks) at reasonable cost to all relevant parties (such as the taxpayers, scheduled, resolution and admitted bodies), while achieving and maintaining Fund solvency and long-term cost efficiency, which should be assessed in light of the risk profile of the Fund and employers, and the risk appetite of the administering authority and employers alike; and
- Seek returns on investment within reasonable risk parameters.

The purpose of the Fund is to:

- Pay pensions, lump sums and other benefits to Scheme members as provided for under the Regulations;
- Meet the costs associated in administering the Fund; and
- Receive and invest contributions, transfer values and investment income.

4. Funding objectives

Contributions are paid to the Fund by Scheme members and the employing bodies to provide for the benefits which will become payable to Scheme members when they fall due.

The funding objectives are to:

- Ensure that pension benefits can be met as and when they fall due over the lifetime of the Fund;
- Ensure the solvency of the Fund;
- Set levels of employer contribution rates to target a 100% funding level over an appropriate time period and using appropriate actuarial assumptions, while taking into account the different characteristics of participating employers;
- Build up the required assets in such a way that employer contribution rates are kept as stable as possible, with consideration of the long-term cost efficiency objective; and
- Adopt appropriate measures and approaches to reduce the risk, as far as possible, to the Fund, other employers and ultimately the taxpayer from an employer defaulting on its pension obligations.

In developing the funding strategy, the administering authority should also have regard to the likely outcomes of the review carried out under Section 13(4)(c) of the Public Service Pensions Act 2013. Section 13(4)(c) requires an independent review of the actuarial valuations of the LGPS funds; this involves reporting on whether the rate of employer contributions set as part of the actuarial valuations are set at an appropriate level to ensure the solvency of the Fund and the long-term cost efficiency of the Scheme so far as relating to the pension Fund. The review also looks at compliance and consistency of the actuarial valuations.

5. Key parties

The key parties involved in the funding process and their responsibilities are set out below.

5.1 The administering authority

The administering authority for the Fund is the London Borough of Newham. The main responsibilities of the administering authority are to:

- Operate the Fund in accordance with the LGPS Regulations;
- Collect employee and employer contributions, investment income and other amounts due to the Fund as stipulated in the Regulations;
- Invest the Fund's assets in accordance with the Fund's Investment Strategy Statement;
- Pay the benefits due to Scheme members as stipulated in the Regulations;
- Ensure that cash is available to meet liabilities as and when they fall due;
- Take measures as set out in the Regulations to safeguard the Fund against the consequences of employer default;
- Manage the actuarial valuation process in conjunction with the Fund Actuary;
- Prepare and maintain this FSS and also the ISS after consultation with other interested parties;
- Monitor all aspects of the Fund's performance;
- Effectively manage any potential conflicts of interest arising from its dual role as both Fund administrator and Scheme employer; and
- Enable the Local Pension Board to review the valuation process as they see fit.

5.2 Scheme employers

In addition to the administering authority, a number of other Scheme employers participate in the Fund.

The responsibilities of each employer that participates in the Fund, including the administering authority, are to:

- Collect employee contributions and pay these together with their own employer contributions, as certified by the Fund Actuary, to the administering authority within the statutory timescales;
- Notify the administering authority of any new Scheme members and any other membership changes promptly;

- Develop a policy on certain discretions and exercise those discretions as permitted under the Regulations;
- Meet the costs of any augmentations or other additional costs in accordance with agreed policies and procedures; and
- Pay any exit payments due on ceasing participation in the Fund.

5.3 Scheme members

Active Scheme members are required to make contributions into the Fund as set by the Department for Levelling Up, Housing and Communities (DLUHC).

5.4 Fund Actuary

The Fund Actuary for the Fund is Barnett Waddingham LLP. The main responsibilities of the Fund Actuary are to:

- Prepare valuations including the setting of employers' contribution rates at a level to ensure Fund solvency and long-term cost efficiency after agreeing assumptions with the administering authority and having regard to the FSS and the Regulations;
- Prepare advice and calculations in connection with bulk transfers and the funding aspects of individual benefit-related matters such as pension strain costs, ill-health retirement costs, compensatory added years costs, etc;
- Provide advice and valuations on the exiting of employers from the Fund;
- Provide advice and valuations relating to new employers, including recommending the level of bonds or other forms of security required to protect the Fund against the financial effect of employer default;
- Assist the administering authority in assessing whether employer contributions need to be revised between valuations as permitted or required by the Regulations;
- Ensure that the administering authority is aware of any professional guidance or other professional requirements which may be of relevance to their role in advising the Fund; and
- Advise on other actuarial matters affecting the financial position of the Fund.

6. Funding strategy

The factors affecting the Fund's finances are constantly changing, so it is necessary for its financial position and the contributions payable to be reviewed from time to time by means of an actuarial valuation to check that the funding objectives are being met.

The most recent actuarial valuation of the Fund was carried out as at 31 March 2022.

The individual employer contribution rates are set out in the Rates and Adjustments Certificate which forms part of the Fund's 2022 valuation report.

The actuarial valuation involves a projection of future cashflows to and from the Fund. The main purpose of the valuation is to determine the level of employers' contributions that should be paid to ensure that the existing assets and future contributions will be sufficient to meet all future benefit payments from the Fund. A summary of the methods and assumptions adopted is set out in the sections below.

6.1 Funding method

The key objective in determining employers' contribution rates is to establish a funding target and then set levels of employer contribution rates to meet that target over an agreed period.

The funding target is to have sufficient assets in the Fund to meet the accrued liabilities for each employer in the Fund.

For all employers, the method adopted is to consider separately the benefits accrued before the valuation date (past service) and benefits expected to be accrued after the valuation date (future service). These are evaluated as follows:

- The past service funding level of the Fund. This is the ratio of accumulated assets to liabilities in respect of past service. It makes allowance for future increases to members' pay and pensions. A funding level in excess of 100% indicates a surplus of assets over liabilities; while a funding level of less than 100% indicates a deficit; and
- The future service funding rate (also referred to as the primary rate as defined in Regulation 62(5) of the Regulations) is the level of contributions required from the individual employers which, in combination with employee contributions is expected to cover the cost of benefits accruing in future.

The adjustment required to the primary rate to calculate an employer's total contribution rate is referred to as the secondary rate, as defined in Regulation 62(7). Further details of how the secondary rate is calculated for employers is given below in the Deficit recovery/surplus amortisation periods section.

The approach to the primary rate will depend on specific employer circumstances and in particular may depend on whether an employer is an "open" employer – one which allows new recruits access to the Fund, or a "closed" employer – one which no longer permits new staff access to the Fund. The expected period of participation by an employer in the Fund may also affect the total contribution rate.

For open employers, the actuarial funding method that is adopted is known as the Projected Unit Method. The key feature of this method is that, in assessing the future service cost, the primary rate represents the cost of one year's benefit accrual only.

For closed employers, the actuarial funding method adopted is known as the Attained Age Method. The key difference between this method and the Projected Unit Method is that the Attained Age Method assesses the average cost of the benefits that will accrue over a specific period, such as the length of a contract or the remaining expected working lifetime of active members.

The approach by employer may vary to reflect an employer's specific circumstance, however, in general the closed employers in the Fund are admission bodies who have joined the Fund as part of an outsourcing contract and therefore the Attained Age Method is used in setting their contributions. All other employers (for example councils, higher education bodies and academies) are generally open employers and therefore the Projected Unit Method is used. The administering authority holds details of the open or closed status of each employer.

6.2 Valuation assumptions and funding model

In completing the actuarial valuation it is necessary to formulate assumptions about the factors affecting the Fund's future finances such as price inflation, pay increases, investment returns, rates of mortality, early retirement and staff turnover etc.

The assumptions adopted at the valuation can therefore be considered as:

- The demographic (or statistical) assumptions which are essentially estimates of the likelihood or timing of benefits and contributions being paid, and
- The financial assumptions which will determine the estimates of the amount of benefits and contributions payable and their current (or present) value.

6.3 Future retail price inflation

The base assumption in any valuation is the future level of price inflation over a period commensurate with the duration of the liabilities, as measured by the Retail Price Index (RPI). This is derived using the 20-year point on the Bank of England implied Retail Price Index (RPI) inflation curve, with consideration of the market conditions over the six months straddling the valuation date. The 20-year point on the curve

is taken as 20 years is consistent with the average duration of an LGPS Fund. A deduction of 0.3% p.a. is applied to the yield at the 20 year point to reflect the shape of the yield curve. A further deduction of 0.4% p.a. is applied to reflect the view that investors are willing to pay a premium for inflation-linked products in return for protection against unexpected inflation.

6.4 Future pension increases

Pension increases are linked to changes in the level of the Consumer Price Index (CPI). Inflation as measured by the CPI has historically been less than RPI due mainly to different calculation methods. However, RPI is due to be aligned with CPIH (CPI but with allowance for housing costs) from 2030.

Therefore, reflecting the anticipated amendment to RPI from 2030 and therefore the relative difference between RPI and CPI until that time, a deduction of 0.35% p.a. is made to the RPI assumption to derive the CPI assumption.

6.5 Future pay increases

As some of the benefits are linked to pay levels at retirement, it is necessary to make an assumption as to future levels of pay increases. Historically, there has been a close link between price inflation and pay increases with pay increases exceeding price inflation in the longer term. The long-term pay increase assumption adopted as at 31 March 2022 was CPI plus 1.0% p.a. which includes allowance for promotional increases.

6.6 Future investment returns/discount rate

To determine the value of accrued liabilities and derive future contribution requirements it is necessary to discount future payments to and from the Fund to present day values.

The discount rate that is applied to all projected liabilities reflects a prudent estimate of the rate of investment return that is expected to be earned from the Fund's long-term investment strategy by considering average market yields in the six months straddling the valuation date. The discount rate so determined may be referred to as the "ongoing" discount rate.

A summary of the financial assumptions adopted for the 2022 valuation is set out in the table below:

Financial assumptions as at 31 March 2022	
RPI inflation	3.2% p.a.
CPI inflation	2.9% p.a.
Pension/deferred pension increases and CARE	In line with CPI inflation
Pay increases	CPI inflation + 1.0% p.a.
Discount rate	4.7% p.a.

6.7 Asset valuation

For the purpose of the valuation, the asset value used is the market value of the accumulated fund at the valuation date, adjusted to reflect average market conditions during the six months straddling the valuation date. This is referred to as the smoothed asset value and is calculated as a consistent approach to the valuation of the liabilities.

The Fund's assets are allocated to employers at an individual level by allowing for actual Fund returns achieved on the assets and cashflows paid into and out of the Fund in respect of each employer (e.g. contributions received and benefits paid).

6.8 Demographic assumptions

The demographic assumptions incorporated into the valuation are based on Fund-specific experience and national statistics, adjusted as appropriate to reflect the individual circumstances of the Fund and/or individual employers.

Further details of the assumptions adopted are included in the Fund's 2022 valuation report.

6.9 McCloud/Sargeant judgements

When the Government reformed public service pension schemes in 2014 and 2015 they introduced protections for older members. In December 2018, the Court of Appeal ruled that younger members of the Judges' and Firefighters' Pension schemes have been discriminated against because the protections do not apply to them. The Government has confirmed that there will be changes to all main public sector schemes, including the LGPS, to remove this age discrimination. A consultation has been run in relation to the changes proposed for the LGPS and legislation is now being drafted to bring forward these changes. We understand the updated Regulations are to be consulted on over the course of 2022 with revised Regulations effective from October 2023.

For the 2022 valuation, as required by the Department for Levelling Up, Housing & Communities, in calculating the value of members' liabilities it was assumed that:

- The current underpin (which only applies to those members within 10 years of their NPA at 31 March 2012) will be revised and will apply to all members who were active in the Scheme on or before 31 March 2012 and who join the post 1 April 2014 scheme without a disqualifying service gap;
- The period of protection will apply from 1 April 2014 to 31 March 2022 but will cease when a member leaves active service or reaches their final salary scheme normal retirement age (whichever is sooner);
- Where a member remains in active service beyond 31 March 2022 the comparison of their benefits will be based on their final salary when they leave the LGPS or when they reach their final salary scheme normal retirement age (again whichever is sooner);
- Underpin protection will apply to qualifying members who leave active membership of the LGPS with an immediate or deferred entitlement to a pension; and
- The underpin will consider when members take their benefit.

Further details of the McCloud/Sargeant judgement can be found below in the Regulatory risks section.

6.10 Guaranteed Minimum Pension (GMP) indexation and equalisation

On 23 March 2021, the Government published the outcome to its Guaranteed Minimum Pension Indexation consultation, concluding that all public service pension schemes, including the LGPS, will be directed to provide full indexation to members with a GMP reaching State Pension Age (SPA) beyond 5 April 2021. This is a permanent extension of the existing 'interim solution' that has applied to members with a GMP reaching SPA on or after 6 April 2016. Details of the consultation outcome can be found [here](#).

The 2022 valuation approach for GMP is that the Fund will pay limited increases for members that have reached SPA by 6 April 2016, with the government providing the remainder of the inflationary increase. For members that reach SPA after this date, the Fund will be required to pay the entire inflationary increase.

6.11 Deficit recovery/surplus amortisation periods

Whilst one of the funding objectives is to build up sufficient assets to meet the cost of benefits as they accrue, it is recognised that at any particular point in time, the value of the accumulated assets will be different to the value of accrued liabilities, depending on how the actual experience of the Fund differs to the actuarial assumptions. This theory applies down to an individual employer level; each employer in the Fund has their own share of deficit or surplus attributable to their section of the Fund.

Where the valuation for an employer discloses a deficit then the level of required employer contributions includes an adjustment to fund the deficit over a maximum period of 16 years. The adjustment will usually be set as a fixed monetary amount.

Where the valuation for an employer discloses a surplus then the level of required employer contribution may include an adjustment to amortise a proportion of the surplus.

The deficit recovery period or amortisation period that is adopted for any particular employer will depend on:

- The significance of the surplus or deficit relative to that employer's liabilities;
- The covenant of the individual employer (including any security in place) and any limited period of participation in the Fund;
- The remaining contract length of an employer in the Fund (if applicable); and
- The implications in terms of stability of future levels of employers' contribution.

6.12 Pooling of individual employers

The policy of the Fund is that each individual employer should be responsible for the costs of providing pensions for its own employees who participate in the Fund. Accordingly, contribution rates are set for individual employers to reflect their own particular circumstances.

Pooling of individual employers may be considered in exceptional circumstances if deemed appropriate by the administering authority and Fund Actuary.

6.13 Risk-sharing

There are employers that participate in the Fund with a risk-sharing arrangement in place with another employer in the Fund.

For example, there are employers participating in the Fund with pass-through provisions: under this arrangement the pass-through employer does not take on the risk of underfunding as this risk remains with the letting authority or relevant guaranteeing employer. When the pass-through employer ceases participation in the Fund, it is not responsible for making any exit payment, nor receiving any exit credit, as any deficit or surplus ultimately falls to the letting authority or relevant guaranteeing employer.

6.14 Contribution payments

Employers pay contributions on a monthly basis. Primary contributions are certified as a percentage of payroll and therefore amounts paid by employers each month will fluctuate in line with payroll each month. Secondary contributions can be certified as a percentage of payroll or as a monetary amount. Monetary amounts are payable in 12 equal monthly instalments throughout the relevant year.

7. New employers joining the Fund

When a new employer joins the Fund, the Fund Actuary is required to set the contribution rates payable by the new employer and allocate a share of Fund assets to the new employer as appropriate. The most common types of new employers joining the Fund are admission bodies and new academies. These are considered in more detail below. Further details can also be found within the Fund's Admitted Body Policy.

7.1 Admission bodies

New admission bodies in the Fund are commonly a result of a transfer of staff from an existing employer in the Fund to another body (for example as part of a transfer of services from a council or academy to an external provider under Schedule 2 Part 3 of the Regulations). Typically these transfers will be for a limited period (the contract length), over which the new admission body employer is required to pay contributions into the Fund in respect of the transferred members.

7.2 Funding at start of contract

Generally, when a new admission body joins the Fund, they will become responsible for all the pensions risk associated with the benefits accrued by transferring members and the benefits to be accrued over the contract length. This is known as a full risk transfer. In these cases, it may be appropriate that the new admission body is allocated a share of Fund assets equal to the value of the benefits transferred, i.e. the new admission body starts off on a fully funded basis. This is calculated on the relevant funding basis and the opening position may be different when calculated on an alternative basis (e.g. on an accounting basis).

However, there may be special arrangements made as part of the contract such that a full risk transfer approach is not adopted. In these cases, the initial assets allocated to the new admission body will reflect the level of risk transferred and may therefore not be on a fully funded basis or may not reflect the full value of the benefits attributable to the transferring members.

7.3 Contribution rate

The contribution rate may be set on an open or a closed basis. Where the funding at the start of the contract is on a fully funded basis then the contribution rate will represent the primary rate only; where there is a deficit allocated to the new admission body then the contribution rate will also incorporate a secondary rate with the aim of recovering the deficit over an appropriate recovery period.

Depending on the details of the arrangement, for example if any risk sharing arrangements are in place, then additional adjustments may be made to determine the contribution rate payable by the new admission body. The approach in these cases will be bespoke to the individual arrangement.

7.4 Security

To mitigate the risk to the Fund that a new admission body will not be able to meet its obligations to the Fund in the future, the new admission body may be required to put in place a bond in accordance with Schedule 2 Part 3 of the Regulations, if required by the letting authority and administering authority.

If, for any reason, it is not desirable for a new admission body to enter into a bond, the new admission body may provide an alternative form of security which is satisfactory to the administering authority.

7.5 Risk-sharing

Although a full risk transfer (as set out above) is most common, subject to agreement with the administering authority where required, new admission bodies and the relevant letting authority may make a commercial agreement to deal with the pensions risk differently. For example, it may be agreed that all or part of the pensions risk remains with the letting authority.

Although pensions risk may be shared, it is common for the new admission body to remain responsible for pensions costs that arise from:

- above average pay increases, including the effect on service accrued prior to contract commencement; and
- redundancy and early retirement decisions.

The administering authority may consider risk-sharing arrangements as long as the approach is clearly documented in the admission agreement, the transfer agreement or any other side agreement. The arrangement also should not lead to any undue risk to the other employers in the Fund.

Legal and actuarial advice in relation to risk-sharing arrangements should be sought where required.

Further details are set out in the Fund's Admitted Body Policy.

7.6 New academies

When a school converts to academy status, the new academy (or the sponsoring multi-academy trust) becomes a Scheme employer in its own right.

7.7 Funding at start

On conversion to academy status, the new academy will be allocated assets based on the active cover of the relevant local authority at the conversion date. The active cover approach is based on the funding level of the local authority's active liabilities, after fully funding the local authority's deferred and pensioner liabilities.

7.8 Contribution rate

The contribution rate for a new academy will be chosen to meet both the costs of benefits accruing to the existing active members in the future, and deficit recovery contributions to try to restore the funding level to 100% over a deficit recovery period of 16 years.

Where an academy joins an existing multi-academy trust in the Fund, an assessment will be made by the Fund Actuary as to whether the existing contribution rate payable by the Trust is sufficient. If so, the academy shall pay the existing rate payable by the Trust. Otherwise, the rate payable by all academies in the Trust, which participate in the Fund, may be revised.

7.9 Contribution reviews between actuarial valuations

It is anticipated for most Scheme employers that the contribution rates certified at the formal actuarial valuation will remain payable for the period of the rates and adjustments certificate. However, there may be circumstances where a review of the contribution rates payable by an employer (or a group of employers) under Regulation 64A is deemed appropriate by the administering authority.

A contribution review may be requested by an employer or be required by the administering authority. The review may only take place if one of the following conditions are met:

- (i) it appears likely to the administering authority that the amount of the liabilities arising or likely to arise has changed significantly since the last valuation;
- (ii) it appears likely to the administering authority that there has been a significant change in the ability of the Scheme employer or employers to meet the obligations of employers in the Scheme; or
- (iii) a Scheme employer or employers have requested a review of Scheme employer contributions and have undertaken to meet the costs of that review. A request under this condition can only be made if there has been a significant change in the liabilities arising or likely to arise and/or there has been a significant change in the ability of the Scheme employer to meet its obligations to the Fund.

Guidance on the administering authority's approach considering the appropriateness of a review and the process in which a review will be conducted is set out in the Fund's separate Contribution review policy. This includes details of the process that should be followed where an employer would like to request a review.

Once a review of contribution rates has been agreed, unless the impact of amending the contribution rates is deemed immaterial by the Fund Actuary, then the results of the review will be applied with effect from the agreed review date, regardless of the direction of change in the contribution rates.

Note that where a Scheme employer seems likely to exit the Fund before the next actuarial valuation then the administering authority can exercise its powers under Regulation 64(4) to carry out a review of contributions with a view to providing that assets attributable to the Scheme employer are equivalent to the exit payment that will be due from the Scheme employer. These cases do not fall under the separate contribution review policy.

With the exception of any cases falling under Regulation 64(4), the administering authority will not accept a request for a review of contributions where the effective date is within 12 months of the next rates and adjustments certificate.

8. Cessation valuations

When a Scheme employer exits the Fund and becomes an exiting employer, as required under the Regulations the Fund Actuary will be asked to carry out an actuarial valuation in order to determine the liabilities in respect of the benefits held by the exiting employer's current and former employees. The Fund Actuary is also required to determine the exit payment due from the exiting employer to the Fund or the exit credit payable from the Fund to the exiting employer.

Any deficit in the Fund in respect of the exiting employer will be due to the Fund as a single lump sum payment, unless it is agreed by the administering authority and the other parties involved that an alternative approach is permissible. For example:

- It may be agreed with the administering authority that the exit payment can be spread over some agreed period;
- the assets and liabilities relating to the employer may transfer within the Fund to another participating employer; or
- the employer's exit may be deferred subject to agreement with the administering authority, for example if it intends to offer Scheme membership to a new employee within the following three years

Similarly, any surplus in the Fund in respect of the exiting employer may not necessarily lead to the payment of an exit credit, subject to the agreement between the relevant parties, any legal documentation and the Fund's Exit Credit Policy.

In assessing the value of the liabilities attributable to the exiting employer, the Fund Actuary may adopt differing approaches depending on the employer and the specific details surrounding the employer's cessation scenario.

For example, if there is no guarantor in the Fund willing to accept responsibility for the residual liabilities of the exiting employer, then those liabilities are likely to be assessed on a "minimum risk" basis leading to a higher exit payment being required from (or lower exit credit being paid to) the employer, in order to extinguish their liabilities to the Fund and to reduce the risk of these liabilities needing to be met by other participating employers in future.

If it is agreed that another employer in the Fund will accept responsibility for the residual liabilities, then the assumptions adopted will be consistent with the current ongoing funding position, but additional prudence will be included in order to take potential uncertainties and risk into account e.g. due to market changes, additional liabilities arising from regulatory or legislative change and political/economic uncertainties.

8.1 Managing exit payments

Where a cessation valuation reveals a deficit and an exit payment is due, the expectation is that the employer settles this debt immediately through a single cash payment. However, should it not be possible for the employer to settle this amount, providing the employer puts forward sufficient supporting evidence to the administering authority, the administering authority may agree a deferred debt agreement (DDA) with the employer under Regulation 64(7A) or a debt spreading agreement (DSA) under Regulation 64B.

Under a DDA, the exiting employer becomes a deferred employer in the Fund (i.e. they remain as a Scheme employer but with no active members) and remains responsible for paying the secondary rate of contributions to fund their deficit. The secondary rate of contributions will be reviewed at each actuarial valuation until the termination of the agreement.

Under a DSA, the cessation debt is crystallised and spread over a period deemed reasonable by the administering authority having regard to the views of the Fund Actuary.

Whilst a DSA involves crystallising the cessation debt and the employer's only obligation is to settle this set amount, in a DDA the employer remains in the Fund as a Scheme employer and is exposed to the same risks (unless agreed otherwise with the administering authority) as active employers in the Fund (e.g. investment, interest rate, inflation, longevity and regulatory risks) meaning that the deficit will change over time.

Guidance on the administering authority's policy for entering into, monitoring and terminating a DDA or DSA is set out in the Fund's separate DSA and DDA policies document. This includes details of when a DDA or a DSA may be permitted and the information required from the employer when putting forward a request for a DDA or DSA.

8.2 Exit credits

The Local Government Pension Scheme (LGPS) (Amendment) Regulations 2018 were introduced in May 2018 which allow administering authorities to make an exit credit payment to exiting employers.

The Fund's approach to the payment of exit credits is set out in its separate Employer Exit Credit Policy. However, any employer who cannot demonstrate that they have been exposed to underfunding risk during their participation in the Fund will not be entitled to an exit credit payment. This is on the basis that these employers would not have been asked to pay an exit payment had a deficit existed at the time of exit.

8.3 Bulk transfers

Bulk transfers of staff into or out of the Fund can take place from other LGPS Funds or non-LGPS Funds. In either case, the Fund Actuary for both Funds will be required to negotiate the terms for the bulk transfer – specifically the terms by which the value of assets to be paid from one Fund to the other is calculated.

The agreement will be specific to the situation surrounding each bulk transfer but in general the Fund will look to receive the bulk transfer on no less than a fully funded transfer (i.e. the assets paid from the ceding Fund are sufficient to cover the value of the liabilities on the agreed basis).

A bulk transfer may be required by an issued Direction Order. This is generally in relation to an employer merger, where all the assets and liabilities attributable to the transferring employer in its original Fund are transferred to the receiving Fund.

9. Links with the Investment Strategy Statement (ISS)

The main link between the Funding Strategy Statement (FSS) and the ISS relates to the discount rate that underlies the funding strategy as set out in the FSS, and the expected rate of investment return which is expected to be achieved by the long-term investment strategy as set out in the ISS.

As explained above, the ongoing discount rate that is adopted in the actuarial valuation is derived by considering the expected return from the long-term investment strategy. This ensures consistency between the funding strategy and investment strategy.

10. Risks and counter measures

Whilst the funding strategy attempts to satisfy the funding objectives of ensuring sufficient assets to meet pension liabilities and stable levels of employer contributions, it is recognised that there are risks that may impact on the funding strategy and hence the ability of the strategy to meet the funding objectives.

The major risks to the funding strategy are financial, although there are other external factors including demographic risks, regulatory risks and governance risks.

10.1 Financial risks

The main financial risk is that the actual investment strategy fails to produce the expected rate of investment return (in real terms) that underlies the funding strategy. This could be due to a number of factors, including market returns being less than expected and/or the fund managers who are employed to implement the chosen investment strategy failing to achieve their performance targets.

The valuation results are most sensitive to the real discount rate (i.e. the difference between the discount rate assumption and the price inflation assumption). Broadly speaking an increase/decrease of 0.1% p.a. in the real discount rate will decrease/increase the valuation of the liabilities by around 2%, and decrease/increase the required employer contribution by around 0.7% of payroll p.a.

However, the Pension Committee regularly monitors the investment returns achieved by the fund managers and receives advice from the independent advisers and officers on investment strategy.

The Committee may also seek advice from the Fund Actuary on valuation related matters.

In addition, the Fund Actuary provides funding updates between valuations to check whether the funding strategy continues to meet the funding objectives.

10.2 Demographic risks

Allowance is made in the funding strategy via the actuarial assumptions for a continuing improvement in life expectancy. However, the main demographic risk to the funding strategy is that it might underestimate the continuing improvement in longevity. For example, an increase of one year to life expectancy of all members in the Fund will increase the liabilities by around 4%.

The actual mortality of pensioners in the Fund is monitored by the Fund Actuary at each actuarial valuation and assumptions are kept under review. For recent funding valuations, the Fund has commissioned a bespoke longevity analysis by Barnett Waddingham's specialist longevity team in order to assess the mortality experience of the Fund and help set an appropriate mortality assumption for funding purposes.

The liabilities of the Fund can also increase by more than has been planned as a result of the additional financial costs of early retirements and ill-health retirements. However, the administering authority monitors the incidence of early retirements; and procedures are in place that require individual employers to pay additional amounts into the Fund to meet any additional costs arising from early retirements.

The administering authority implements an ill-health self-insurance pool within the Fund whereby a portion of all non-Council related employers' contributions into the Fund are allocated to a segregated ill-health section of the Fund. When a relevant ill-health retirement occurs, a funding strain (i.e. the difference between the value of the benefits payable to the ill-health member and the value that was assumed as part of the actuarial valuation) is generated in the employer's section of the Fund. As part of the self-insurance policy, assets equal to the funding strain are transferred from the segregated ill-health assets section of the Fund to the employer's section of the Fund to cover the funding strain.

10.3 Maturity risk

The maturity of a Fund (or of an employer in the Fund) is an assessment of how close on average the members are to retirement (or already retired). The more mature the Fund or employer, the greater proportion of its membership that is near or in retirement. For a mature Fund or employer, the time available to generate investment returns is shorter and therefore the level of maturity needs to be considered as part of setting funding and investment strategies.

The cashflow profile of the Fund needs to be considered alongside the level of maturity: as a Fund matures, the ratio of active to pensioner members falls, meaning the ratio of contributions being paid into the Fund to the benefits being paid out of the Fund also falls. This therefore increases the risk of the Fund having to sell assets in order to meet its benefit payments. The Fund regularly carries out cashflow modelling and scenario testing to assess the Fund's resilience to maturity risk and help manage cashflow requirements.

The government has published a consultation (*Local government pension scheme: changes to the local valuation cycle and management of employer risk*) which may affect the Fund's exposure to maturity risk. More information on this can be found in the Regulatory risks section below.

10.4 Regulatory risks

The benefits provided by the Scheme and employee contribution levels are set out in Regulations determined by central government. The tax status of the invested assets is also determined by the government.

The funding strategy is therefore exposed to the risks of changes in the Regulations governing the Scheme and changes to the tax regime which may affect the cost to individual employers participating in the Scheme.

However, the administering authority participates in any consultation process of any proposed changes in Regulations and seeks advice from the Fund Actuary on the financial implications of any proposed changes.

There are a number of general risks to the Fund and the LGPS, including:

- If the LGPS was to be discontinued in its current form it is not known what would happen to members' benefits.
- More generally, as a statutory scheme the benefits provided by the LGPS or the structure of the scheme could be changed by the government.
- The State Pension Age is due to be reviewed by the government in the next few years.

At the time of preparing this FSS, specific regulatory risks of particular interest to the LGPS are in relation to the McCloud/Sargeant judgements and the timing of future funding valuations consultation. These are discussed in the sections below.

10.5 McCloud/Sargeant judgements

The Court of Appeal judgment on the McCloud and Sargeant cases relate to age discrimination against the age-based transitional provisions put into place when the new judicial pension arrangements were introduced in 2015. The members argued that these transitional provisions were directly discriminatory on grounds of age and indirectly discriminatory on grounds of sex and race, based on the correlation between these two factors reflected in the judicial membership. The Tribunal ruled against the Government, deeming the transitional provisions as not a proportionate means of achieving a legitimate aim.

The Government subsequently applied to the Supreme Court to appeal the judgement but their application was denied on 27 June 2019. On 16 July 2020, the Government published a consultation on the proposed remedy to be applied to LGPS benefits in response to the McCloud and Sargeant cases. A ministerial statement in response to this was published on 13 May 2021 and revised Regulations are awaited to bring a remedy into play.

At the time of drafting this FSS, Regulations and therefore confirmation of the remedy are not yet finalised and are expected in 2023.

10.6 Cost control mechanism

As a result of the public service pension schemes reforms, the Government established a cost control mechanism for all those schemes to ensure a fair balance of risks between scheme members and the taxpayer. The process has been complex and has still not been fully resolved. Although the 2016 cost cap valuation report for the LGPS has been published, at the time of writing there is still a challenge outstanding regarding the inclusion of McCloud in the cost cap. Therefore, there is still a possibility that the 2016 valuation may have to be revisited with the small chance that benefit improvements will be required and potentially backdated to April 2019.

For the purposes of the 2022 valuation, we have made no allowance for any potential benefit changes. The Fund's prudence allowance already allows for an element of regulatory uncertainty and any potential impact is not deemed to be material.

10.7 Consultation: Local government pension scheme: changes to the local valuation cycle and management of employer risk

On 8 May 2019, the government published a consultation seeking views on policy proposals to amend the rules of the LGPS in England and Wales. The consultation covered:

- amendments to the local fund valuations from the current three year (triennial) to a four year (quadrennial) cycle;
- a number of measures aimed at mitigating the risks of moving from a triennial to a quadrennial cycle;
- proposals for flexibility on exit payments;
- proposals for further policy changes to exit credits; and
- proposals for changes to the employers required to offer LGPS membership.

The proposals for flexibility on exit payments and for further policy changes to exit credits have been finalised, however, the remaining three proposals are still to be finalised. This FSS will be revisited once the outcome is known and reviewed where appropriate.

Detail of the outstanding policy proposals are outlined below:

Timing of future actuarial valuations

LGPS valuations currently take place on a triennial basis which results in employer contributions being reviewed every three years. In September 2018 it was announced by the Chief Secretary to HMT, Elizabeth Truss, that the national Scheme valuation would take place on a quadrennial basis (i.e. every four years) along with the other public sector pension schemes. The results of the national Scheme valuation are used to test the cost control mechanism and HMT believed that all public sector schemes should have the cost control test happen at the same time.

Changes to employers required to offer LGPS membership

At the time of drafting this FSS, under the current Regulations further education corporations, sixth form college corporations and higher education corporations in England and Wales are required to offer membership of the LGPS to their non-teaching staff.

With consideration of the nature of the LGPS and the changes in nature of the further education and higher education sectors, the government has proposed to remove the requirement for further education corporations, sixth form college corporations and higher education corporations in England to offer new employees access to the LGPS. This could impact on the level of maturity of the Fund and the cashflow profile. For example, increased risk of contribution income being insufficient to meet benefit outgo, if not in the short term then in the long term as the payroll in respect of these types of employers decreases with fewer and fewer active members participating in the Fund.

This also brings an increased risk to the Fund in relation to these employers becoming exiting employers in the Fund. Should they decide not to admit new members to the Fund, the active membership attributable to the employers will gradually reduce to zero, triggering an exit under the Regulations and a potential significant exit payment. This has the associated risk of the employer not being able to meet the exit payment and thus the exit payment falling to the other employers in the Fund.

There are relatively few employers of this type currently participating in the Fund and so the risks are considered relatively low at present.

10.8 Employer risks

Many different employers participate in the Fund. Accordingly, it is recognised that a number of employer-specific events could impact on the funding strategy including:

- Structural changes in an individual employer's membership;
- An individual employer deciding to close the Scheme to new employees; and
- An employer ceasing to exist without having fully funded their pension liabilities.

However, the administering authority monitors the position of employers participating in the Fund, particularly those which may be susceptible to the events outlined, and takes advice from the Fund Actuary when required. In particular, the Fund regularly commissions an employer risk review from the Fund Actuary, to help identify the employers in the Fund that might be considered as high risk. In the case of admitted bodies, the Fund has a policy of requiring some form of security from the employer, in the form of a guarantee or a bond, in case of employer default where the risk falls to the Fund. Where the risk of default falls on the liabilities of an original letting authority, the Fund provides advice to the letting authority to enable them to make a decision on whether a guarantee, some other form of security or a bond should be required.

In addition, the administering authority keeps in close touch with all individual employers participating in the Fund to ensure that, as administering authority, it has the most up to date information available on individual employer situations. It also keeps individual employers briefed on funding and related issues.

10.9 Governance risks

Accurate data is necessary to ensure that members ultimately receive their correct benefits. The administering authority is responsible for keeping data up to date and results of the actuarial valuation depend on accurate data. If incorrect data is valued then there is a risk that the contributions paid are not adequate to cover the cost of the benefits accrued.

10.10 Climate change risks

There are a large number of interlinked systemic long term financial risks related to climate change which could potentially have a material impact on the assets and/or the liabilities of the Fund. The most obvious of these climate change risks will be the financial risks to the value of the Fund's assets, the potential increased volatility of markets and potential changes in life expectancy. It is possible that some of these factors will impact the assets and liabilities of the Fund in the same direction, although not necessarily by the same amount.

The Fund therefore has a fiduciary duty to consider climate change risk when making investment decisions and to ensure any decisions support the effective management of climate change. The Fund therefore expects their appointed investment managers to be informed about climate change risks and take investment opportunities accordingly within their processes.

As part of the 2022 valuation, the Fund Actuary provided the Fund with a climate risk analysis which assessed the potential exposure of the Fund's funding position to climate risk under different climate scenarios. The principles behind the analysis were agreed with the Government Actuary's Department (GAD).

The results of this analysis demonstrated that the funding strategy agreed as part of the 2022 valuation was sufficiently robust in the context of climate scenario analysis and any potential contribution impacts.

The Fund will continue to assess this risk on a regular basis.

10.11 Monitoring and review

This FSS is reviewed formally, in consultation with the key parties, at least every three years to tie in with the triennial actuarial valuation process.

The most recent valuation was carried out as at 31 March 2022, certifying the contribution rates payable by each employer in the Fund for the period from 1 April 2023 to 31 March 2026.

The timing of the next funding valuation is due to be confirmed as part of the government's *Local government pension scheme: changes to the local valuation cycle and management of employer risk* consultation which closed on 31 July 2019. At the time of drafting this FSS, it is anticipated that the next funding valuation will be due as at 31 March 2025.

The administering authority also monitors the financial position of the Fund between actuarial valuations and may review the FSS more frequently if necessary.

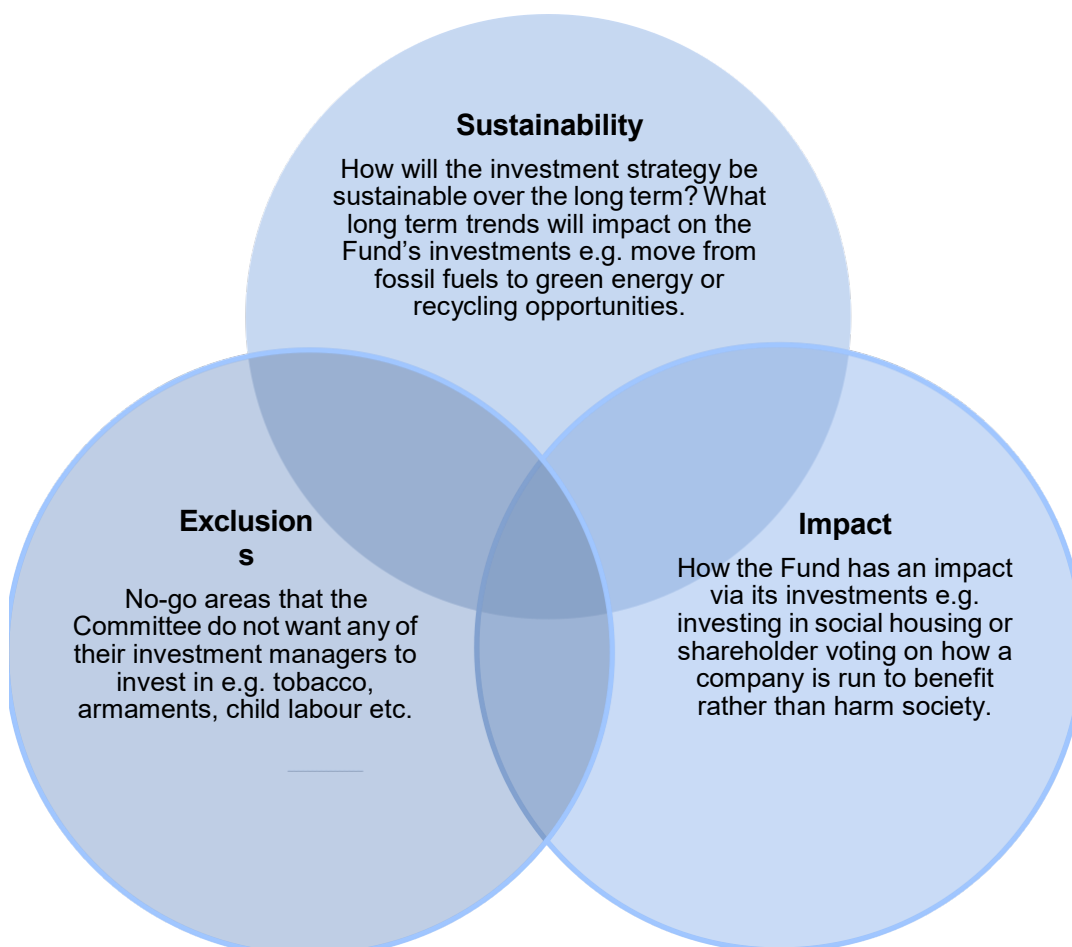

Environmental, Social and Governance (ESG) Investment Policy 2022/23

This Policy has been developed and set by the Pension Committee (“the Committee”) of the London Borough of Newham Pension Fund (“the Fund”) based on the belief that investment decisions should reflect environmental, social and governance considerations. This builds on the policy agreed on 26 February 2020 and updated on 21 May 2021.

This ESG Investment Policy applies to all applicable investments held by the Fund. However, the Committee recognises that there are practical difficulties (such as availability of suitable funds) that will act as an obstacle to the Policy being implemented in full at this time, without incurring material costs or having a likely negative impact on the investments’ performance.

The Committee are committed to the long-term aims of this Policy. In the short-term they will apply the Policy pragmatically, as much as possible and continue to monitor opportunities in the investment industry such that they can apply the Policy more fully as time passes.

The diagram below shows the way that the Committee consider ESG issues within this Policy.

The Financial Reporting Council has published the 2020 UK Stewardship Code. This defines stewardship as “the responsible allocation, management and oversight of capital to create long-term value for clients and beneficiaries leading to sustainable benefits for the economy, the environment and society”.

The Committee has adopted this definition of stewardship, and seeks to apply these principles within the assets that it holds.

The Committee is keen to be a progressive Local Authority when it comes to ESG issues and this is reflected in both the focus they have placed to date on ESG related issues, resulting in their current low exposure to fossil fuels, and the future focussed nature of this Policy. Following the recent consultation by the Department for Levelling Up, Housing and Communities, the Fund anticipates reporting under the Taskforce for Climate-related Financial Disclosures (TCFD).

The Committee will share this Policy with the Fund’s investment managers to encourage engagement and alignment and to highlight any areas of difference which can then be challenged. The Committee view this engagement process as helping identify developments that may help facilitate a more complete implementation of the Policy over time.

The appendices to this policy document provide further background on the external influences on the policy. They also expand on what is meant by financial and non-financial factors referred to within the policy document.

The Committee has identified the factors which they believe to be financial and non-financial in this Policy. In many cases investment decisions will often have a mixture of motivations. However, where the Committee considers that there is a financially positive rationale for taking a factor into account, it is identified in this policy as being a financial factor, notwithstanding that an additional non-financial motivation could also be identified. Where a factor is purely non-financial (i.e. there is not a strong case to take it into account as a financially positive factor), the Committee have aimed to quantify the impact of this factor to ensure that their decisions relating to this factor would at least not involve a risk of significant financial detriment to the Fund. The policy also sets out, in relation to non-financial factors, why the Committee consider that it should be taken into account in accordance with the views that the Committee consider the Fund’s members are likely to hold.

Ethical Investing

This document contains the Committee’s full ESG policy. Where the Committee wishes to impose ethical constraints on the investment policy these will also be reflected in this policy document.

Community Wealth Building

As, further discussed in the Impact section of this report, the Committee provides opportunities for their investment managers, and other professional firms associated with the Fund, to volunteer their time and knowledge to help with the financial education of population the London Borough of Newham. The Committee recognises the importance of these firms having Corporate Social Responsibility programs.

Examples of this include:

- Financial Education Forum – A forum to provide young adults from the London Borough of Newham with financial education and information on employment opportunities in finance.
- Climate Change Risk Forum – Building on the Council and Committee’s view on climate risk, a forum on climate change risk and its financial implications. This too will be focussed on helping young adults understand the financial and other implications of climate risk, and how it can be managed.

The forums mentioned above were due to take place in 2020. These were postponed due to the COVID pandemic. The Committee notes the disruption caused by covid in relation to these activities and intends to create these opportunities for engagement when the timing becomes appropriate. It remains within the Committee’s Business Plan.

Applicable Assets and Investments

The Committee will apply this Policy to the investments within the Fund but recognises that for some asset classes, ESG considerations cannot and need not be taken into account. The main asset classes that the Fund invests in are set out below with details of whether or not the Policy applies to them. By acknowledging which asset classes can be ignored when implementing the Policy, the Committee can focus on applying the Policy to the asset classes where they can have the most impact.

Category	Asset Class	ESG Policy Applicable?
Equities	Public Equity	Yes
	Private Equity	Yes
Alternatives	Infrastructure	Yes
	Agriculture	Yes
Property	Commercial Property	Yes
	Social Housing	Yes
Credit	Public Credit	Yes
	Private Credit	Yes
	Government Bonds	No – The Fund only invests in UK government bonds and the UK government does not have human rights violations (which would be an ESG concern relating to government bonds). In addition, the Net Zero Investment Framework Implementation Guide ¹ states that “investors may exclude domestic [government bond] issuance held for liability matching purposes” in assessing their climate impact. Other overseas government bonds are treated as public credit and therefore the ESG policy is applicable to these.
Protection	Equity Protection	No – achieved via contracts with banks
	Currency Hedging	No – achieved via contracts with banks
Cash	Cash	No

¹ https://www.parisalignedinvestment.org/media/2021/03/PAII-Net-Zero-Investment-Framework_Implementation-Guide.pdf

Market Enforced Limitations / Constraints

This Policy is designed to take account of the ESG investment aspirations of the Committee. However, the Committee recognises that there are certain limitations and constraints that mean that the policy cannot be implemented fully at this time. The key limitations and constraints have been identified and noted where relevant.

Sustainability

The Sustainability section of this Policy comprises of how the Committee is committed to the sustainability of its investments in the long term. It documents the trends which the Committee think will impact on the Fund's investments and how the Committee will incorporate these trends within its investments.

The tables below is intended to be a living document and will be updated when new trends are identified.

Financial Factors

Trend	Committee View	Impact on Investments	Timeframe
Fossil Fuels to Green Energy	<p>The Committee have recognised this trend within the fund by:</p> <ul style="list-style-type: none"> Moving their passive equity portfolio to a Paris Aligned Benchmark, which will exclude fossil fuel companies. Investing in infrastructure and agriculture funds which support green energy production. Following lobbying of the London CIV, switched their Global Bond Fund holding into a more ESG focussed version. Impressing on their investment managers the need to consider a Just Transition 	Moderate positive impact on return Lower volatility	Immediate
Increasing need for affordable housing	The Committee have invested in a fund providing social and affordable housing managed by Cheyne Capital.	Low	Immediate
Risk of tobacco litigation and decline of smoking	<p>The Committee have excluded tobacco manufacturing companies from their directly held assets.</p> <p>The Committee have shown their support of tobacco exclusions by becoming the first LGPS signatory of the Tobacco Free Portfolios pledge.</p>	Low	Immediate

Non-Financial Factors

Trend	Committee View	Impact on Investments	on Timeframe
Equality, diversity and gender	<p>It is in the asset owners' interests that investee companies are employing the best people for the job regardless of their race, gender etc and the way to measure the company's progress in this regard is by carrying out annual equality monitoring. It is also important that companies' most senior executives have been selected on merit and, as stated by the Financial Reporting Council's Corporate Governance Code, that the board has a wide diversity of talent. This is also in furtherance of the Davies Review 2011 into low representation of women on boards, which recommended that companies should aim for 25% representation by 2015.</p>		
Living wage and contracts	<p>Growth in productivity is in the shareholders' interests and this is a serious issue in the UK. Studies show that greater productivity comes from a workforce that is paid fairly.</p>		
UN Global Compact standards	<p>It is in shareholders' interests that directors fulfil their duties under Section 172 of the Companies Act 2006 by conforming to international conventions that protect people's rights to freedom of association within their own company and within the supply chain. Failure to do so may cause reputational damage, labour unrest and a fall in share value.</p>		
Labour ethics and modern slavery	<p>Section 172 of the Companies Act 2006 imposes a duty upon a director to promote the success of the company having regard to, among other factors, the interests of the company's employees and the desirability of the company maintaining a reputation for high standards of business conduct. This is also in furtherance of Principles One to Five of the UN Global Compact. The persistence of labour rights violations in supply chains is a pressing issue. Four 'core' ILO Conventions entail an absolute prohibition on forced labour and child labour.</p>		

Market Enforced Limitations / Constraints

Where the Committee accesses assets via pooled funds, the ability to exclude or adjust the asset allocation on the basis of non-financial factors is limited. However the Committee has, and will continue to, sought to engage with the Fund's investment managers to encourage them to influence the underlying companies that they invest in on behalf of the Fund. The Committee also engages regularly with the London CIV to share its views on the themes noted above in an attempt to influence the funds that the London CIV provides. The Committee will provide feedback to their investment managers on the activities carried out and will continue to highlight their participation in LAPFF and the voting guidance it provides managers with.

The Committee notes the developments within the London CIV in relation to ESG and its use of Hermes EOS to assist with the implementation of its ESG engagement/voting policies.

Exclusions

Where the Fund invests in a pooled fund, individual investors, such as the Fund, have no direct influence on the investments within the fund. The benefits of investing in a pooled fund may include access to illiquid asset classes through liquid investments or exposure to a more diversified range of underlying assets in a cost effective way. As per the MHCLG draft LGPS statutory guidance on asset pooling², "all administering authorities must pool their assets in order to deliver the benefits of scale and collaboration".

When investing in pooled funds, the Committee recognises that the exclusions may not be able to be applied in full. However, the Committee will seek to appoint pooled fund investment managers whose policies align with this Policy where possible so as to minimise indirect investment in companies that fall within the exclusions of this Policy wherever there is scope for this requirement to be accommodated.

Financial Factors

The Committee considers that there is a financial rationale for seeking to exclude certain types of investments from the Fund where it is possible to do so. Such exclusions may be for reasons of enhancing risk adjusted returns or reducing financial risks to the Fund.

Where possible, the Committee seeks to exclude the following types of investments on financial grounds:

- Fossil fuel companies.
- Companies that generate over half of their income from tobacco products.

Non-Financial Factors

The Committee believes that certain types of investments (non-financial factors) should be excluded from its direct investments. These are:

- Companies with significant involvement in the manufacture and production of controversial weapons which are defined follows:
 - Companies involved in the core weapons system, or components/services of the core weapons system, considered tailor-made and essential for the lethal use of the weapon.
 - Companies is involved in the production, maintenance/service, sale/trade, or research and development of the core weapons system.

² https://www.lgpsboard.org/images/Other/Draft_guidance_on_pooling-consultation.pdf

Controversial weapons manufacturers are predominantly domiciled in emerging markets and China in particular. In many jurisdictions they are illegal to invest in and we consider that the Fund's members would generally not want the Fund invested in these companies.

When considering these exclusions the Committee has looked at historic returns including and excluding these factors and is comfortable that they do not represent a worsening of the outlook for expected returns nor add material additional volatility. Therefore, the Committee believes that their exclusion would not involve a risk of significant financial detriment.

Market Enforced Limitations / Constraints

The Fund has incorporated LGIM's Future World Funds and Paris Aligned Equity Index Funds into the Strategic Asset Allocation. These funds meet many of the Committees requirements for a low-carbon, ESG focused equity index. Capital is allocated, within market sectors, to companies according to their ESG score and LGIM uses their voting to help raise the importance of such matters.

Impact

The Impact section of this Policy sets out how the Fund has an impact on ESG considerations via the investments it holds. Examples of this are how the equities that the Fund holds are voted and any special investments which are taken on to positively impact the environment or social causes.

In addition, the Committee engages with the investment managers of the Fund on their **Corporate Social Responsibility** policies and encourages the managers to engage with the London Borough of Newham when volunteering. When possible, the Committee will provide opportunities for their investment managers to volunteer their time and knowledge to help with the financial education of the population of the Borough in this regard.

Financial Factors Renewable Infrastructure

When making investments in infrastructure for growth and income, the Committee acknowledged the opportunity from changing energy usage and decided to make an investment in funds that held renewable energy assets as a result.

Social Housing

Over the couple of years leading up to 2020, the Committee had been exploring the opportunities to supplement its existing commitments to infrastructure by investing in local infrastructure projects. Whilst it was recognised that this would bring social impact, the rationale for doing so was driven by the return opportunity that it created.

The development in East London has brought with it commercial infrastructure opportunities and simultaneously increased demand for social infrastructure investment. Since 2020, the focus of the Pensions Committee has been to establish ways in which the Newham Pension Fund can benefit from the opportunities arising in social and affordable housing.

The Council of the London Borough of Newham have a stated intention to increase the supply of housing within the Borough. The Committee is mindful that it would be preferable if the investment programme it undertakes in relation to housing complements the approach being taken by the Council from a practical standpoint to avoid increasing costs associated with the Council's own development programme.

The Pensions Committee is also aware of its responsibility to ensure risk within the Fund is managed. Within the housing context this would be done through diversification. Consequently, diversification will be sought in terms of both the number and type of units used, as well as the location within London of the housing invested in. This latter point reflects the differing land costs across London, and the wider country, and the impact this has on the returns and viability of investments.

The Fund has now implemented an investment in social and affordable housing through an investment in a fund managed by Cheyne Capital.

Voting Policy

The Fund is a member of Local Authority Pension Fund Forum (LAPFF). LAPFF influences, where possible, the way in which assets are voted on. The Committee has a view that voting in line with LAPFF's guidance will have a positive impact on the companies it invests in over the long term along with positive benefits for the economy, the environment and society.

The Committee supplements the work done by LAPFF by agreeing their own voting policy, set out here. Whilst the Committee recognises that the influence it can have on the voting policies of its investment managers can be somewhat limited, it believes that by having clear expectations on voting reflected in this policy and sharing this policy with its investment managers, it can have a greater influence on the voting behaviour of its investment managers. The Committee's voting policy also provides a framework to measure the alignment of its investment managers' voting practices with the views of the Committee.

The list below sets out the Committee's views on various issues that can be reflected in the investment managers' voting and engagement with investee companies. The Committee recognises that constructive engagement with investee companies is vital not only for the investment managers' to share their views and understand the investee company's business, but also so that the investee company understands the reason behind any vote against management, board member or function or any vote in favour of a shareholder resolution. Similarly, having reviewed the engagement and voting activity of their investment managers the Committee will provide feedback to them along with indications of how those processes and practices will be monitored in future. In addition to being seen as a key way of establishing a well-functioning financial market, the Committee also recognise that as asset owners, they have responsibilities in relation to engagement and voting.

Voting in this way is seen as a form of escalation where engagement has not reached a satisfactory conclusion.

- **Climate change** – investee companies should work towards limiting or reversing climate change by making efforts to reduce carbon emissions and transition to a low carbon economy
- **Just Transition** – investee companies should connect their action on climate change with inclusive development pathways driving a 'just transition' for workers and communities as the world's economy responds to climate change
- **Pay inequality** – investee companies should provide a fair distribution of pay
- **Gender diversity** – investee companies should have (or be actively working towards) balanced gender representation in their organisation, throughout the workforce, including at the board level
- **Health** – investee companies should promote healthy lives and wellbeing for all stakeholders
- **Multicultural diversity** - investee companies should have (or be actively working towards) diverse ethnic and cultural composition of their organisation, throughout the workforce, including at the board level
- **Biodiversity and ecology** – where relevant, investee companies should promote biodiversity, conservation and nature-based solutions to allow nature and people to flourish
- **Packaging, waste and the circular economy** - where relevant, investee companies should aim to limit and reduce waste and make efforts to reduce their environmental impact, including considering the recyclability and re-use of their products
- **Sustainable land use** – investee companies should have (or be actively working towards) adequate policies and programmes designed to protect biodiversity and address community concerns on land use
- **Tax avoidance** – investee companies should pay fair levels of tax
- **Workplace safety and standards** – investee companies should have (or be actively working towards) policies and programmes designed to protect their workers and those in their supply chain

Market Enforced Limitations / Constraints

The Committee no longer holds any equities directly. The previous segregated mandate with Longview having been transferred into a fund within LCIV that is managed by Longview and in a similar manner to the previous holdings. This will mean that the Committee will have less influence on the voting of its active equity holdings. However, the Committee will work with the London CIV to try to influence their voting and engagement policy, noting the role that Hermes EOS play in that regard.

The Committee are aware that imposing a voting policy on a pooled equity fund can be more difficult than on a segregated mandate due to the investment manager's needs to reflect the best interests of all of their unitholders. They are working with their pooled equity managers to influence their voting policy.

Despite these practical constraints the Committee will provide their investment managers with feedback on the activities they are undertaking.

Monitoring and Governing the Policy

In order to give effect to its commitment to this Policy, the Committee will:

- Publish this Policy on its website. In doing so this will be available to members and beneficiaries of the Fund.
- Share this Policy with the Fund's investment managers to encourage alignment and highlight any areas of difference which can then be challenged.
- Review this Policy annually to ensure it remains relevant and modify the Policy if necessary.
- Monitor the Fund's investment managers for adherence to the Policy annually.
- Provide the investment managers with feedback on their engagement and voting activities.
- Encourage their investment managers to take part in industry wide initiatives aimed at improving ESG generally and promoting the benefit of a well-functioning financial system.
- Take the Policy into consideration when investing in a new product or investment manager.
- Monitor the investment landscape for new products or innovations which could be used by the Fund to enable better adherence to the Policy.

Appendix I - External agencies associated with the Policy

UN Principles for Responsible Investment (PRI)

The UN established 6 Principles for Responsible Investment for investment managers in 2006. The principles are set out in the Appendix.

The Committee expect the investment managers of relevant assets within the Fund to adhere to the UN PRI and will monitor the rating of the managers against these Principles.

When making new investment manager appointments the Committee will seek to appoint managers who adhere to the UN PRI.

2020 UK Stewardship Code

The 2020 UK Stewardship Code was established by the UK Financial Reporting Council (FRC). The Financial Conduct Authority (FCA) supports the UK Stewardship Code by requiring any authorised investment manager to “disclose the nature of its commitment to the Code”. If a manager does not feel it applies to them for any reason, they are required to explain why not.

The principles of the UK Stewardship Code are set out in the Appendix II.

The Committee expect the investment managers of relevant asset classes within the Fund to be signatories of the UN Stewardship Code and will monitor managers’ signatory status.

Where the asset class and geographical location are appropriate, the Committee expect managers to adhere to the 2020 UK Stewardship Code.

SRD II – Shareholder Directive Code II

The Committee expects the investment managers to engage with the companies in which it is invested and to publish an engagement policy and disclose annually how the main elements of their investment strategy contribute to the medium to long-term performance of their assets.

Local Authority Pension Fund Forum (LAPFF)

The Fund is a member of LAPFF. LAPFF’s aim is to maximise their influence as shareholders, while promoting corporate social responsibility and high standards of governance among companies in which they invest. The LAPFF comprises of UK public funds which engage as a united front with investee companies on issues such as climate change, child labour and breaches of best practice including the UK Code on Corporate Governance. Executive remuneration is an important governance issue for LAPFF and is focused on the subject of incorporating non-financial performance metrics into long term reward.

The LAPFF provides ad hoc briefings on companies where contentious votes are due or there are serious corporate governance failings or concerns. Where these relate to companies within the Fund’s portfolio, these concerns are raised with the relevant fund manager and appropriate action is taken. Where LAPFF issue a voting direction on a particular issue, fund managers will be expected to comply with this or explain any deviance.

Institutional Investors Group on Climate Change (IIGCC)

The Fund pursues engagement with companies through membership of the IIGCC, one of the core objectives of which is to engage in dialogue on environmental issues.

Appendix II – Key points of UNPRI and 2020 UK Stewardship Code UN Principles for Responsible Investment

1. Incorporate ESG issues into investment analysis and decision-making processes.
2. Be active owners and incorporate ESG issues into ownership policies and practices.
3. Seek appropriate disclosure on ESG issues by the entities in which they invest.
4. Promote acceptance and implementation of the Principles within the investment industry.
5. Work together to enhance their effectiveness in implementing the Principles.
6. Report on their activities and progress towards implementing the Principles.

2020 UK Stewardship Code Principles

1. Signatories' purpose, investment beliefs, strategy, and culture enable stewardship that creates long-term value for clients and beneficiaries leading to sustainable benefits for the economy, the environment and society.
2. Signatories' governance, resources and incentives support stewardship.
3. Signatories manage conflicts of interest to put the best interests of clients and beneficiaries first.
4. Signatories identify and respond to market-wide and systemic risks to promote a well- functioning financial system.
5. Signatories review their policies, assure their processes and assess the effectiveness of their activities.
6. Signatories take account of client and beneficiary needs and communicate the activities and outcomes of their stewardship and investment to them.
7. Signatories systematically integrate stewardship and investment, including material environmental, social and governance issues, and climate change, to fulfil their responsibilities.
8. Signatories monitor and hold to account managers and/or service providers.
9. Signatories engage with issuers to maintain or enhance the value of assets.
10. Signatories, where necessary, participate in collaborative engagement to influence issuers.
11. Signatories, where necessary, escalate stewardship activities to influence issuers.
12. Signatories actively exercise their rights and responsibilities.

Appendix III - Financial and Non-Financial Factors

In 2014, the Law Commission made clear that private sector pension trustees' fiduciary duty is to take account of financially material considerations, whatever their source. Where ESG considerations are financially material, decision makers should take account of them. The Law Commission went on to say that this applies in exactly the same way as other risks in pension scheme investment, for example interest rate risk, liquidity risk, market risk, political and counterparty risk.

According to the Law Commission, when making an investment decision based on a non-financial consideration, private sector trustees have a duty to **ensure that the decision would not involve a risk of significant financial detriment to the fund and that it would be reasonable to assume that the scheme members agree with that decision**. A related provision may be found in LGPS statutory guidance which contemplates that an LGPS investment may similarly be influenced by wider social, ethical or environmental considerations, so long as that does not risk material financial detriment to the fund. So for example, an administering authority may take account of social housing needs (but only if an investment in such stands up as an investment in its own right) or may choose to take into account the public health implications of an investment (but only if the result of such consideration is the replacement of these investments with assets producing a similar return). In practice, investment decisions will often have a mixture of motivations and therefore a clear non-financial motivation (separate from the financial motivations for an investment decision) may be difficult to identify. However, for the purpose of this guidance **non-financial factors are those which influence investment decisions and are primarily motivated by considerations other than financial**, This is taken to mean any decision to disinvest or invest for which the primary motivation excludes consideration of the potential financial outcome.

Communication Policy 2022/23

Introduction

The London Borough of Newham is the Administering Authority for the Newham Pension Fund (the Fund). The Council is committed to providing a consistent high quality service to its members and other stakeholders.

This Communications Policy Statement has been prepared with the aim of enhancing the understanding, transparency and visibility of the Fund. This Policy Statement will be reviewed on an annual basis.

Each stakeholder group has different communication requirements and the Fund aims to use the most appropriate methods for its various audiences.

This document sets out the Fund's Communication Policy and the methods used to communicate with its stakeholders.

There are six distinct stakeholder groups with whom the Fund needs to communicate; these are:

- Members of the Pension Fund
- Pension committee members
- Prospective scheme members
- Trade Unions
- Scheme employers
- Pension Fund Officers

1. Members of the Pension Fund

The Internet

Policy Statements plus the Annual Accounts are published on the Council's web-site. A dedicated web-site for the Fund has been set-up which contains a range of information including Scheme details and will contain a secure member area for Committee members. There will also be links to other organisations relevant to members of the Pension Fund e.g. The London Pensions Partnership Administration (LPPA), who undertake the Schemes administration, and scheme employers.

The current intranet site provides access to the Fund's statutory documentation, the Accounts, Annual Report, Investment Strategy Statement, Governance Policy and Governance Statement and the Funding Strategy Statement.

Benefit Statements

Annual Benefit Statements are sent to members of the Fund and deferred beneficiaries by the end of September.

Scheme Literature

The Human Resources Directorate of the Council arranges the production of scheme literature either directly or via LPPA. The literature is made available to employers and scheme members. Copies of this literature are accessible via the Fund's web-site www.newham.gov.uk

Pay Advice

The payroll sections from each of the Scheme employers issue monthly pay advice. These can be used to communicate specific messages and for other purposes such as requesting a prompt notification of change of address. The pay advice is also used to communicate details

of annual pension increases. Details of Annual Pension paid and the tax deducted are notified by P60 to Pensioners and the Inland Revenue.

Annual General Meeting

A General Meeting is held each year to discuss issues concerning the Fund. The meeting will be open to all Committee members, Union Representatives and employers. It will seek to provide an update on the legislation and regulation changes within the LGPS.

General Correspondence

The Fund utilises both surface mail and e-mail to receive and send correspondence.

Telephone Help Line

Scheme members can access a telephone help line to deal with any queries relating to their Pension and this is widely publicised in Scheme literature. The telephone number for LPPA is 020 7369 6105.

Pensions Road-shows

Several road shows are conducted throughout the year by Fund staff and LPPA.

Pre-Retirement Seminars

Several pre-retirement seminars are conducted annually by Fund staff and LPPA. Details of future events can be located on the Fund's website.

2. Pension Committee Members

The Committee oversees the management of the Fund's assets. Although not trustees, the members of the Committee owe a fiduciary duty similar to that of trustees to council-tax payers, who would ultimately have to meet any shortfall in the Assets of the Fund, as well as to the contributors and beneficiaries of the Fund. Whilst appointments to the Committee are annual, several members have served for a number of years, helping to build up knowledge and understanding of the pensions market. This, together with the members wide range of Council and Professional expertise, ensures that decisions are fully scrutinised.

Committee Meetings

Committee meetings take place quarterly. The performance of the Fund's Investments is a standing item. Issues with Fund managers are addressed on an exception basis, with meetings with the Fund managers generally held outside of the Committee.

Members also receive a variety of reports from the Corporate Director of Resources on matters requiring decisions. These reports along with agendas and minutes of the Pension Committee meetings are available via the Fund's web-site.

IT Resources

Members have Internet access to electronic resources, which allow for the monitoring of various aspects of the Fund e.g. proxy voting, and corporate and Environmental, Social and Governance (ESG) issues.

Where there is a requirement for a decision outside of the normal committee cycle an email vote is not appropriate an emergency Committee Meeting will be required.

Training

Committee members are required to undertake a minimum of three days training per year. The Fund's investment managers, advisors, independent committee member and other experts, such as the Local Authority Pension Fund Forum, provide a range of events which members can attend. The commitment to training is recognised within the Fund's annual Business Plan. Opportunities also exist for knowledge building with special events being organised by officers.

Members receive notification of training events via Email. Booking arrangements are managed by Member Services. New members can receive an induction to the Fund.

Trade Unions

Representatives of Unison, UNITE and NUT unions are invited to attend all meetings. As observers they have no voting rights. The current representatives are also members of the Scheme.

3. Prospective Scheme Members

Scheme Booklet

All new prospective Scheme members will be provided with a Scheme booklet upon appointment. The booklet is issued by LPP.

Website

LPP have a web-site which contains specific information for those who have yet to join the Fund. It will highlight the process by which a member should be given the relevant information to make an informed choice, as well as detailing the administrative process that should be followed to "opt out" of the Scheme.

Non Joiner Campaigns

LPPA send out periodic letters to all non-contributors. In the future the Fund will request formal notification of non-joiners from Scheme employers. This information will be used to market the Scheme to specific groups and if necessary developing dedicated literature and campaigns.

Pension Road-shows

As well as being a valuable aid for pensioners and current scheme members, road shows are used to target specific non-members enabling them to make an informed choice with regards to their pension provision. Road shows are available on request via LPPA.

Pay Advice

Prospective Scheme members will be identified via payroll, and pay advice containing marketing information will be used in specific campaigns carried out in conjunction with Scheme employers. Pay advice will also be used to inform members employed by the Council and prospective Scheme members of changes to the Scheme.

4. Trade Unions

Trade Unions are valuable ambassadors for the Pension Scheme. They ensure that details of the Local Government Pension Scheme's availability are brought to their members' attention and assist in negotiations under TUPE transfers in order to ensure, whenever possible, continued access to the Local Government Pension Scheme.

The Fund works closely with the Trade Unions to ensure the Scheme is transparent and easily understood. Upon request, branch officers will be provided with training.

5. Scheme Employers

Alongside the Council the following employer organisations are partners in the Pension Fund:

Scheduled Bodies:

- | | |
|---|--|
| 1. Agate Momentum Trust | 14. Leading Learning Trust (Newham Community Learning) |
| 2. Big Education Trust (formally School 21) | 15. Learning in Harmony |
| 3. Bobby Moore Academy - David Ross Trust | 16. London Academy of Excellence |
| 4. Boleyn Trust | 17. London Design and Engineering UTC (based at UEL) |
| 5. Brampton Manor Trust | 18. New Vision MAT |
| 6. Britannia Education Trust | 19. Newham College of Further Education |

| 12. Mitie | |
| 13. Newham Partnership Working | |

Pension Fund Officers

Team Meetings

The Head of Pensions and Treasury host regular team meetings with the Fund's finance and administration staff. If required, issues can be escalated through the Corporate Director of Resources to Chief Officers.

Senior Finance Staff Management Team Meetings

The Head of Pensions and Treasury is a member of the Senior Finance Staff Management Team and attend regular meetings convened by the Corporate Director of Resources. This enables the Corporate Director of Resources to be kept up to date with current issues affecting the Fund.

Fund Management Meetings

Annual meetings are arranged with all Fund Managers within the Fund. Where required advisor representation may be requested.

Intranet

All office-based staff has access to the intranet. This provides timely information on a wide range of matters including documentation and LGPS circulars directly to their place of work.

Induction

New members of staff receive an induction session and each receives an induction / personnel manual.

Emails

Where contact needs to be made with all scheme members, letters will be used rather than emails.

Data Protection

To protect any personal information held on computer, The London Borough of Newham is registered under the Data Protection Act 1998. This allows members to check that their details held are accurate. The Fund may, if it chooses, pass certain details to a third party, if the third party is carrying out an administrative function of the Fund, for example, the Fund's AVC provider.

The Administering Authority is under a duty to protect the public funds it administers, and to this end may use information for the prevention and detection of fraud. It may also share this information with other bodies administering public funds solely for these purposes.

Newsletters

Newsletters are issued periodically by LPPA. In the event of changes to the Fund's Regulations then specific notices are also issued.

Main Contacts

The contact details of the Pension Fund's main service providers can be found in the Pension Fund Statement of Accounts.

Taxation

Investments of the Fund are exempt from Capital Gains Tax but tax on UK Dividends is irrecoverable. All Value Added Tax paid is recoverable. There is a liability for Income Tax at 20% for pensions compounded into a lump sum.

Governance Statement 2022/23

1. Introduction

The London Borough of Newham is the administering authority for the Newham Pension Fund ("The Fund"); it administers the Local Government Pension Scheme on behalf of the participating employers.

This Policy and Compliance Statement outlines the governance arrangements for the Fund, as required by Regulation 55 of the Local Government Pension Scheme Regulations 2013 ("The Regulations").

Under that provision all LGPS Funds in England and Wales are required to produce a Governance Compliance Statement, keep it under review, revise it following any material change in its delegation arrangements and publish it, following such consultation as it considers appropriate. The statement is required to set out:

- a) whether the administering authority delegates their function or part of their function in relation to maintaining a pension fund to a committee, a subcommittee or an officer of the authority;
- b) if they do so
 - i. the terms, structure and operational procedures of the delegation;
 - ii. the frequency of any committee or sub-committee meetings;
 - iii. whether such a committee or subcommittee includes representatives of employing authorities (including authorities which are not Scheme employers) or members, and if so, whether those representatives have voting rights;
- c) the extent to which a delegation, or the absence of a delegation, complies with guidance given by the Secretary of State and, to the extent that it does not so comply, the reasons for not complying;
- d) details of the terms, structure and operational procedures relating to the local pension board established under regulation 53.

Each administering authority is required to:

- a) keep the statement under review and make such revisions as are appropriate following a material change in respect of any of the matters mentioned in points a) to d) above;
- b) when reviewing and making revisions to the Governance Policy and Compliance Statement the authority must consult such persons as it considers appropriate.

2. About the Newham Pension Fund

Under the Local Government Pension Scheme Regulations 2013, the London Borough of Newham is required to maintain a pension fund for its employees and those of other Scheme Employers within its area.

Benefits are prescribed by, and the Fund is invested in accordance with, the provisions of the following regulations under the Public Service Pensions Act 2013 (all as amended):

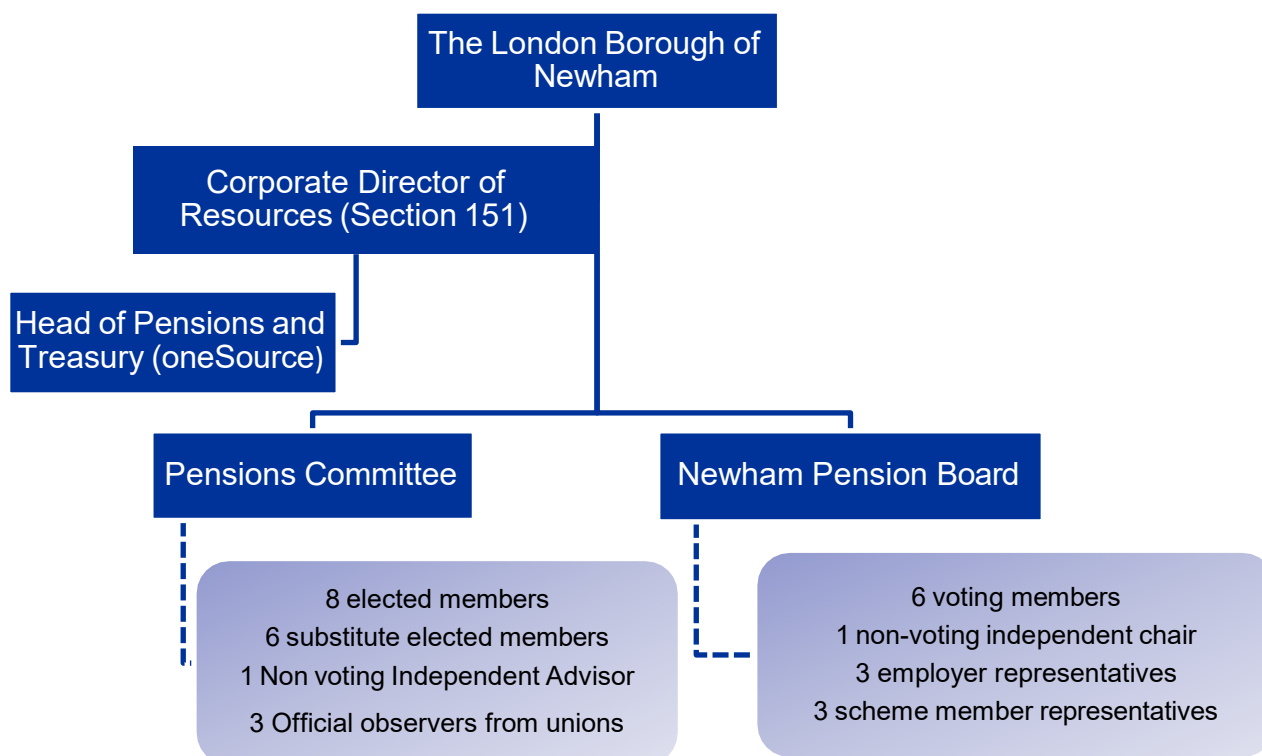

- Local Government Pension Scheme (LGPS) Transitional Provisions, Savings and Amendment Regulations 2014;
- Local Government Pension Scheme (LGPS) Regulations 2013;
- The Local Government Pension Scheme (Management and Investment of Funds) Regulations 2009 and other saved provisions from previous sets of LGPS regulations.

With effect from 1 April 2014 employee contributions have been banded according to

employees' annual pensionable pay. The rates payable vary from 5.5% to 12.5% of annual pensionable pay.

3. Governance Structure

The Newham Pension Fund governance structure is illustrated below. This structure relates to the administering authority responsibilities only. The London Borough of Newham is also an employer within the Newham Pension Fund. A separate governance structure and Scheme of Delegation is in place in relation to the London Borough of Newham employer responsibilities:

4. Quorum

Pension Committee	The Newham Pension Board
<p>3 members of the committee are required for a meeting to be quorate.</p> <p>Members may arrange for a substitute member to attend in their absence.</p> <p>The business of the Committee shall be carried out in accordance with the Constitution.</p>	<p>3 voting members of which at least 1 employer representative and 1 scheme member representative.</p> <p>In the absence of the chair the members attending can appoint a Deputy Chair for that meeting.</p> <p>The business of the Board shall be carried out in accordance with the Terms of Reference.</p>

5. Responsibilities

Pensions Committee (formally Investment and Accounts Committee)

The Pensions Committee has responsibility for:

- determining an overall investment strategy and strategic asset allocation, with regards to diversification and the suitability of asset classes;
- appointing the investment managers, an independent custodian, the actuary and any external consultants considered necessary;
- reviewing on a regular basis (quarterly) the investment managers' performance against benchmarks, and satisfying themselves as to the managers' expertise and the quality of their internal systems and controls;
- reviewing on a regular basis (quarterly) the asset pool, London CIV, satisfying themselves as to the managers' expertise and the quality of their internal systems and controls;
- The Chair of the Pensions Committee is the Administrative Authority's representative at London CIV, and fund manager meetings.
- reviewing policy on social, environmental and ethical considerations, and on the exercise of voting rights;
- agreeing the Communications Policy, Governance Statement and the Annual Business plan;
- monitoring compliance with legislation and best practice;
- determining the admission policy and agreements, including the deficit recovery period of Admitted and Scheduled Bodies;
- setting principles and statements in relation to the Fund's Investment Strategy Statement (ISS) and Funding Strategy Statement (FSS), monitoring compliance and reviewing them;
- ensuring that equality issues are addressed in the development of policies and the provision of services and are appropriately monitored.

Corporate Director of Resources

The Committee has delegated the responsibility to the Corporate Director of Resources:

- all decisions relating to the administration of the Superannuation Fund, crediting contributions, dividends and interest, realising and making investments to manage the Fund's cash flow up to a limit of £5 million, providing notices to members, arranging for periodical valuations and keeping audited accounts.
- to exercise all powers and duties of the Council as an employer in respect of contracted-out persons under the Pensions Schemes Act 1993;
- to exercise and perform any powers and duties under this Act which fall to be exercised or performed by the Council by virtue of its being an employer (powers and duties relating to stakeholder pensions) under The Welfare Reform and Pensions Act 1999.

The Pension Board

The role of the local Pension Board as defined by sections 5 (1) and (2) of the Public Service Pensions Act 2013, is to;

- a) Assist the London Borough of Newham Administering Authority as Scheme Manager;
- b) Secure the effective and efficient governance and administration of the LGPS for the London Borough of Newham Pension Fund
- c) in such other matters as the LGPS regulations may specify
- d) Provide the Scheme Manager with such information as it requires ensuring that any member of the Pension Board or person to be appointed to the Pension Board does not have a conflict of interest.

In accordance with the Regulations, the Pension Board shall secure compliance with:

- The Regulations
- Other legislation relating to the Governance and administration of the LGPS; and
- The requirements imposed by the Regulator in relation to the LGPS, and
- To ensure the effective and efficient governance and administration of the LGPS.

The Pension Board will ensure it effectively and efficiently complies with the code of practice on the governance and administration of public service pension schemes issued by the Pension Regulator.

6. Terms of Reference

Pensions Committee

- a) To make all decisions under Regulations made pursuant to Sections 7, 12 or 24 of the Superannuation Act not otherwise falling to the Executive Director, Resources to determine as set out in the officers' scheme of delegation.
- b) Consideration of the external auditors Pension Fund audit plan and audit letter before it is published.
- c) The Committee shall be a member of the Local Authority Pension Fund Forum.
- d) The Committee shall be entitled to set up Sub-committees and delegate any of their functions to such Sub-committees or officers of the Council.

7. Meetings

Pensions Committee	The Newham Pension Board
<ol style="list-style-type: none"> a. The Committee meets on a quarterly basis with support from the Corporate Director of Resources and independent advisers. Members are provided with a quarterly report on performance of the Fund along with a business plan update, investment strategy update and administration report. b. Representatives from the Trade Unions are invited to participate in the meeting; however they are not permitted to vote. c. Members of the public are permitted to attend, non-exempted agenda item segments but are not permitted to participate without prior approval of the chair. 	<ol style="list-style-type: none"> a. The Committee meets on a sufficiently regular basis to discharge its duties and responsibilities effectively, with support from Corporate Director of Resources and independent advisers. Members are provided with a quarterly report on performance of the Fund along with a business plan update b. In the absence of the Chair, at any meeting, the members can appoint a Deputy Chair for that meeting. c. The Pensions Administration Manager shall give notice to all Pension Board members of every meeting of the Pension Board. The Pensions Administration Manager shall ensure that a formal record of Pension Board proceedings is maintained. Following the approval of the minutes by the Chair of the Board, they shall be circulated to all members. d. There will be a minimum of 3 Pension Board meetings a year to be held per year, with 1 Annual meeting being held at the beginning of the committee cycle. The meetings are expected to be held in a Town Hall Committee room.

8. Members and Officers Knowledge and Skills

Pensions Committee	The Newham Pension Board
<p>a. Members of the Committee are required to attend 3 days (21 hours) appropriate training from time to time. The Pension Fund Manager will invite members to such training.</p> <p>b. The Committee shall be entitled to determine whether certain training is desirable or compulsory for all members or certain positions. Where the Committee deems training compulsory, Members shall not be entitled to sit on the Committee until they have attended such training.</p> <p>c. Member and officer knowledge and skills are recognised as important, and a range of measures are in place to equip members to undertake their role. This is a major factor in the governance arrangements of the Fund in ensuring Committee members and officers have the relevant skills and knowledge. The Fund applies the CIPFA Knowledge and Skills Framework to achieve this objective.</p> <p>d. Six areas of knowledge and skills have been identified as core technical requirements for those associated with LGPS pension funds:</p> <ol style="list-style-type: none"> 1) pensions legislation and governance context; 2) pension accounting and auditing standards; 3) financial services procurement and relationship management; 4) investment performance and risk management; 5) financial markets and products knowledge; and 6) actuarial methods, standards and practices. <p>e. It is not the intention that Committee members should individually become technical experts, but collectively they have the ability, knowledge and confidence to question and challenge the information and advice they are given, and to make effective and rational decisions.</p> <p>f. Officers advising members and implementing decisions should have a more detailed knowledge appropriate to their duties. Officers are expected to demonstrate their professional competency against the framework through appropriate 'continuing professional development' (CPD) arrangements'.</p> <p>g. Each year a questionnaire is sent out to members to identify key areas that training can be arranged to address. From the</p>	<p>a. A member of the Pension Board must have capacity to become conversant with –</p> <ol style="list-style-type: none"> 1) The legislation and associated guidance of the Local Government Pension Scheme (LGPS). 2) Any document recording policy about the administration of the LGPS which is for the time being adopted by the London Borough of Newham Pension Fund. <p>b. A member of the Pension Board must have capacity to gain knowledge and understanding of –</p> <ol style="list-style-type: none"> 1) The law relating to pensions, and 2) Any other matters which are prescribed in regulations. <p>c. It is for individual Pension Board members to be satisfied that they have the appropriate degree of knowledge and understanding to enable them to properly exercise their functions as a member of the Pension Board.</p> <p>d. In line with this requirement Pension Board members are required to be able to demonstrate their knowledge and understanding and to refresh and keep their knowledge up to date. Pension Board members are therefore required to maintain a written record of relevant training and development.</p> <p>e. Pension Board members will undertake a personal training needs analysis and regularly review their skills, competencies and knowledge to identify gaps or weaknesses.</p> <p>f. Pension Board members will comply with the Scheme Manager's training policy.</p>

Pensions Committee	The Newham Pension Board
<p>questionnaire a bespoke training schedule is established and agreed by the Committee.</p> <p>h. The Fund includes in its annual report and accounts details of the knowledge and skills development undertaken by its Committee members. It is being proposed that it will become a regulatory requirement for funds to explain their compliance with the CIPFA framework and in particular cover:</p> <ol style="list-style-type: none"> 1) how the framework has been applied; 2) what assessment of training needs has been undertaken; and 3) what training has been delivered against the identified training needs. 	

9. Reporting Breaches

The Pension Board

The Board should in the first instance report its requests, recommendations or concerns to the Pensions Committee. In support of this any member of the Board may attend a Committee meeting as an observer.

The Board should report any concerns over a decision made by the Committee to the Committee subject to the agreement of at least 50% of voting Board members provided that all voting members are present. If not all voting members are present then the agreement should be of all voting members who are present, where the meeting remains quorate.

On receipt of a report the Committee should, within a reasonable period, consider and respond to the Board.

Where the Board is not satisfied with the response received it may request that a notice of its concern be placed on the website and in the Fund's annual report.

Where the Board is satisfied that there has been a breach of regulation which has been reported to the Committee and has not been rectified within a reasonable period of time it is under an obligation to escalate the breach.

The appropriate internal route for escalation is to the Monitoring Officer and/or the Section 151 Officer.

The Board may report concerns to The Pensions Regulator for consideration subsequent to, but not instead of, using the appropriate internal route for escalation.

Pension Board members are also subject to the requirements to report breaches of law under the Act and the Code [and the whistleblowing provisions set out in the Administering Authority's whistle blowing policy].

10. Budget

The Pension Board

The Board is to be provided with adequate resources to fulfil its role, in doing so the budget for the Pension Board will be met from the Fund and must be approved by the Pensions Committee.

11. Publication of Information

Scheme members and other interested parties will want to know that the London Borough of Newham Pension Fund is being efficiently and effectively managed. Minutes of meetings, policies and other information of interest will be published on the London Borough of Newham website.

12. Governance Compliance Statement

Compliance Requirement	Compliance	Notes
Structure		
The management of the administration of benefits and strategic management of fund assets clearly rests with the main committee established by the appointing council.	Compliant	As set out in the Pensions Committee responsibilities.
That representatives of participating Local Government Pension Scheme (LGPS) employers, admitted bodies and scheme members (including pensioner and deferred members) are members of either the main or secondary committee established to underpin the work of the main committee.	Compliant	Representative of the employers and scheme members are Pension Board rather than members of the Pensions Committee.
That, where a secondary committee or panel has been established, the structure ensures effective communication across both levels.	Not applicable	All Pension Fund matters are considered by the Pensions Committee.
That, where a secondary committee or panel has been established, at least one seat on the main committee is allocated for a member from the secondary committee or panel.	Not applicable	All Pension Fund matters are considered by the Pensions Committee.
Committee membership and representation		
That all key stakeholders are afforded the opportunity to be represented within the main or secondary committee structure. These include: <ul style="list-style-type: none"> ▪ employing authorities (including non-scheme employers, e.g. admitted bodies) ▪ scheme members (including deferred and pensioner scheme members) ▪ independent professional observers ▪ expert advisers (on an ad-hoc basis). 	Compliant	Trade unions appoint representative for the employees. Representative of the employers and scheme members are Pension Board rather than members of the Pensions Committee. Expert advisers attend the Pensions Committee and/or the Pension Board as required.
That, where lay members sit on a main or secondary committee, they are treated equally in terms of access to papers and meetings, training and are given full opportunity to contribute to the decision making process, with or without voting rights.	Compliant	All Pension Fund matters are considered by the Pensions Committee.

Compliance Requirement	Compliance	Notes
Selection and role		
That the committee or panel members are made fully aware of the status, role and function they are required to perform on either a main or secondary committee.	Compliant	As set out in the Pensions Committee responsibilities.
That at the start of any meeting, committee members are invited to declare any financial or pecuniary interest related to specific matters on the agenda.	Compliant	This is a standing agenda item on the Pensions Committee.
Voting		
The policy of individual administering authorities on voting rights is clear and transparent, including the justification for not extending voting rights to each body or group represented on main LGPS committees.	Compliant	As set out in the Pensions Committee responsibilities.
Training/Facility Time/Expenses		
That in relating to the way in which statutory and related decisions are taken by the administering authority, there is a clear policy on training, facility time and reimbursement of expenses in respect of members involved in the decision-making process.	Compliant	As set out in the Council's allowances policy and the Pension Fund Knowledge and Skills document.
Meetings		
That an administering authority's main committee or committees meet at least quarterly	Compliant	As set out in the Pensions Committee responsibilities.
That an administering authority's secondary committee or panel meet at least twice a year and is synchronised with the dates when the main committee sits.	Not applicable	All Pension Fund matters are considered by the Pensions Committee.
That administering authorities who do not include lay members in their formal governance arrangements, provide a forum outside of those arrangements by which the interest of key stakeholders can be represented.	Compliant	Represented on the Pension Board.

Compliance Requirement	Compliance	Notes
Access		
That subject to any rules in the council's constitution, all members of main and secondary committees or panels has equal access to committee papers, documents and advice that falls to be considered at meetings of the main committee.	Compliant	As set out in the Council's Constitution.
Scope		
That administering authorities have taken steps to bring wider scheme issues within the scope of their governance arrangements.	Compliant	As set out in the Pensions Committee responsibilities.
Publicity		
That administering authorities have published details of their governance arrangements in such a way that stakeholders with an interest in the way in which the scheme is governed, can express an interest in wanting to be part of those arrangements.	Compliant	All Pensions Committee minutes reports and Pension Fund policies are published on the Council's website.

Glossary

Accounting period - The period of time covered by the Council's accounts. The Council's financial year is from the period 1st April to the following 31st March.

Accounting policies – The specific principles, bases, conventions, rules, and practices applied by the Council in preparing and presenting the financial statements.

Accounting standards - A set of rules explaining how accounts are to be kept (See 'International Financial Reporting Standards').

Accrual - The recognition of income and expenditure in the year that they occur and not when any cash is received or paid.

Active member - Current employee who is contributing to a pension scheme.

Actuary - An independent professional who advises the Council on the financial position of the Fund. Every three years the actuary values the assets and liabilities of the Fund and determines the funding level and the employers' contribution rates.

Additional Voluntary Contributions (AVC) - An option available to active scheme members to secure additional pension benefits by making regular contributions to separately held investment funds managed by the Fund's AVC provider

Administering Authority -The Administering Authority is responsible for maintaining and investing its own Fund for the LGPS. This means the Administering Authority is responsible for making all decisions relating to the operation of the Fund.

Admitted Body - An organisation, whose staff can become members of the Fund by virtue of an admission agreement made between the Council and the organisation. It enables contractors who take on the Council's services with employees transferring, to offer those staff continued membership of the Fund.

Admission Agreement - an agreement made between the administering authority, a Scheme employer and a contracted company to allow the contractor to become part of the LGPS.

Asset allocation - The apportionment of a fund's assets between different types of investments (or asset classes). The long-term strategic asset allocation of a Fund will reflect the Fund's investment objectives.

Balance Sheet - A statement of all the assets, liabilities and other balances of the Council at the end of an accounting period.

Basis Points (BPS) - A unit of measure for interest rates and percentages. One basis point is equal to 1/100th of 1%.

Benchmark - A measure against which the investment policy or performance of an investment manager can be compared.

Billing Authority – Refers to a local authority that is responsible for the collection of tax, both on behalf of itself and local authorities in its area.

Budget - A forecast of future expenditure plans for the Council. Detailed revenue budgets are prepared for each year.

Career Average Revalued Earnings (CARE) - from 1 April 2014 the LGPS became a Career Average Revalued Earnings Scheme. The pension built up from 1 April 2014 is based on a CARE scheme basis and the pension built up prior to 1 April 2014 is linked to Final Salary.

Cash equivalents – Highly liquid, safe investments that can easily be converted into cash.

Chartered Institute of Public Finance and Accountancy (CIPFA) – A professional accountancy body, specialising in the Public Sector. It promotes best practice by issuing guidelines and Codes of Practice.

Collective Investment Vehicle (CIV) - is any entity that allows investors to pool their money and invest the pooled funds, rather than buying securities directly as individuals

Contingent Liability - Where possible “one-off” future liabilities or losses are identified but the level of uncertainty is such that the establishment of a provision is not appropriate.

Consumer Price Index (CPI) – Measures the average change in retail prices of a basket of goods and services purchased by most UK households, to provide an indication of the rate of inflation. The CPI includes some financial services in the basket of goods not included in the RPI.

COVID-19 – Coronavirus pandemic.

Creditors - Amount of money owed by the Council for goods and services received, also referred to as Payables.

Death Grant - an amount paid to a current or former member's estate or nominated beneficiaries in the event of death in service, death after retirement or death of a deferred beneficiary

Debtors - Amount of money owed to the Council by individuals, and organisations, also referred to as Receivables.

Deferred Benefits (may be called preserved benefits) - benefits retained in the pension fund when a member leaves without an entitlement to the immediate payment of those benefits. If a transfer of benefits does not take place before hand, deferred benefits are usually paid from the member's normal retirement date.

Defined Benefit Scheme - A pension scheme which defines benefits independently of the contributions payable. Benefits are not directly related to the investments of the Pension Fund.

Deferred Income – Receipt in Advance – This represents a receipt received as part of entering into a building lease. The credit is being released over the term of the lease.

Deferred Liabilities – These are future payments that the Council is contractually obliged to pay in future years. These liabilities relate to Private Finance Initiative (PFI) schemes.

Deferred members - Scheme members, who have left employment or ceased to be an active member of the scheme whilst remaining in employment, but retain an entitlement to a pension from the scheme.

Discretion - this is the power given by LGPS regulations to enable Scheme employers or administering authorities to choose how they will apply the Scheme rules in respect of certain provisions.

Employer rates - The percentage of the salary of employees that employers pay as a contribution towards the employees' pension.

Equities - Ordinary shares in UK and overseas companies traded on a stock exchange.

Shareholders have an interest in the profits of the company and are entitled to vote at shareholders' meetings.

Exit Cap - The cap limits the exit payments made to employees of public sector bodies.

Fair Value - In relation to the value of financial instruments, it is the amount for which an asset can be exchanged or a liability settled between knowledgeable and willing parties in an arm's length transaction.

Financial Instrument - Any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another.

Fixed interest securities – Investments, mainly in government stocks, which guarantee a fixed rate of interest. The securities represent loans which are repayable at a future date but which can be traded on a recognised stock exchange in the meantime.

Good Governance Framework – SAB commissioned report reviewing the governance of the LGPS on effectiveness and reviewing existing models.

Guaranteed minimum Pension (GMP) - Is the minimum guaranteed level of pension, which a pension scheme had to provide to members if they were contracted out of the SERPS between 6 April 1978 and 5 April 1997.

Index - A calculation of the average price of shares, bonds, or other assets in a specified market to provide an indication of the average performance and general trends in the market.

Interest Rate Risk - The uncertainty of interest paid/received on variable rate instruments and the effect of fluctuations in interest rates on the fair value of an instrument.

Internal Disputes Resolution Procedure (IDRP) – a complaints procedure governed by regulation providing any current or former scheme member with the opportunity to settle any dispute or complaint they may have in respect of any decision made regarding their entitlements under scheme rules.

International Financial Reporting Standards (IFRS) – The set of international accounting standards issued by the International Accounting Standards Board (IASB). Local Authorities are required to produce accounts based on IFRS.

Investment Properties – Those properties that are held solely to earn rentals and/ or for capital appreciation, rather than for the delivery of services.

Investment Strategy Statement (ISS) – LGPS regulations require administering authorities to prepare and maintain an ISS. The ISS outlines the Fund's investment objectives and investment beliefs, identifies the risks the Fund faces and outlines how this risks are controlled/mitigated.

Long-Term Assets - Assets that yield benefit to the Council and the services it provides for a period of more than one year.

McCloud - The McCloud judgement refers to the Court of Appeal's ruling that Government's 2015 public sector pension reforms unlawfully treated existing public sectors differently based upon members' age

Minimum Revenue Provision (MRP) - The amount that has to be charged to revenue to provide for the redemption of debt. Not applicable to the HRA.

National Fraud Initiative - Exercise that matches electronic data within and between public and private sector bodies to prevent and detect fraud.

Pension Administration Strategy – Strategy which outlines the processes and procedures allowing the administrator and employers to work together in a cost effective way to administer the LGPS.

Pooled Investment vehicles - Funds which manage the investments of more than one investor on a collective basis. Each investor is allocated units which are revalued at regular intervals. Income from these investments is normally returned to the pooled fund and increases the value of the units.

Project PACE – LPPA led project to implement new Pension Administration system.

Provisions - Amounts set aside for liabilities and losses, which are certain or very likely to occur but where the exact amount or timing of the payment are uncertain.

Public Service Pension Act 2013 (PSPA13) - An Act to make provision for public service pension schemes; and for connected purposes.

Rates and Adjustment Certificate - a certificate issued by the Actuary following a valuation of the Fund which sets out the employer contribution rates payable by each of the associated scheme bodies.

Return - The total gain from holding an investment over a given period, including income and increase or decrease in market value.

Reserves - Amounts set aside which do not fall within the definition of a provision, to fund items of anticipated expenditure. These include general reserves or balances which every Council must maintain as a matter of prudence.

Retail Price Index (RPI) – Measures the average change in retail prices of a basket of goods and services purchased by most UK households, to provide an indication of the rate of inflation. The RPI includes mortgage interest payments and council tax in the basket of goods not included in the CPI.

Scheduled body - An organisation that has the right to become a member the Local Government Pension Scheme under the scheme regulations. Such an organisation does not need to be admitted, as its right to membership is automatic.

Triennial Valuation - Every three years the Actuary reviews the assets and liabilities of the Pension Fund and reports to the Council on the fund's financial position and recommended employers' contribution rates.

Unrealised gains/ losses - The increase or decrease in the market value of investments held by the fund since the date of their purchase.

Value For Money (VFM) – This term is used to describe the relationship between the economy, efficiency, and effectiveness (known as the 'three Es') of a service, function or activity. Value for money is high when there is an optimum balance between all three.
